<i>In Dedication to Edgar Basil Zurif</i>	<i>xix</i>

PART I Architecture of the Language System

<i>Chapter 1</i>	<i>Fodorian Modularity and Representational Modularity</i>	
	Ray Jackendoff	
	Problems with Fodorian Modularity on the Input Side	4
	What Is the Output of Language Perception?	8
	Representational Modularity	11
	Differences between F-Modularity and Representational Modularity . .	17
	The Bidomain Specificity of Interface Modules	19
	The Relation of Processing to the Linguist's Grammar	22
	Degrees of Modularity	25
	References	28
<i>Chapter 2</i>	<i>Remarks on the Architecture of Language Processing Systems</i>	
	Merrill Garrett	
	The Goals of the Discussion	31
	A Background Assumption	31
	Some Experimental Examples and Perspectives from Parsing Studies . .	32
	The Electrophysiological Record	39
	Language Production Study	43
	Another Path: Language Production as a Comprehension Filter	47
	Summary Remarks	62
	References	65

<i>PART II</i>	<i>The Comprehension–Production Interface</i>	
<i>Chapter 3</i>	<i>Overarching Agrammatism</i>	
	Yosef Grodzinsky	
	Production: A Tree-Pruning Hypothesis	75
	Receptive Abilities: A Restrictive Trace-Deletion Hypothesis	79
	Overarching Agrammatism Examined	82
	A Tribute to Edgar Zurif	84
	References	85
<i>Chapter 4</i>	<i>Speech Perception, Conduction Aphasia, and the Functional Neuroanatomy of Language</i>	
	Gregory Hickok	
	Introduction	87
	Evidence for Bilateral Organization of Speech Perception Systems	90
	Evidence for Left Posterior Supratemporal Plane Participation in Speech Production	93
	Relation between Phonological Encoding, Repetition, and Naming Deficits in Conduction Aphasia	95
	Other Areas Previously Implicated in Speech Perception May Reflect a Network Supporting Auditory–Motor Interaction	96
	Implications for Anatomical Models of Language	97
	Summary	101
	References	102
<i>Chapter 5</i>	<i>Overarching Agrammatism: When Comprehension Involves Production</i>	
	Janet L. Nicol and Tracy Love	
	Introduction	105
	Experiment 1	107
	Experiment 2	112
	General Discussion	115
	References	119
<i>PART III</i>	<i>The Memory–Language Interface</i>	
<i>Chapter 6</i>	<i>Verbal Working Memory and Its Connections to Language Processing</i>	
	Edward E. Smith and Anat Geva	
	Introduction	123
	Neuroimaging Studies of Working Memory	124

	Verbal Working Memory and Language Processing	128
	Other Kinds of Working Memories for Language Understanding	133
	Summary	138
	References	139
<i>Chapter 7</i>	<i>Sentence Memory in Amnesia</i>	
	Laird S. Cermak	
	Introduction	143
	Encoding Deficits	144
	Retrieval of Stored Material	145
	Sentence Comprehension	146
	Conclusions	151
	References	153
<hr/>		
<i>Part IV</i>	<i>The Lexical–Structural Interface</i>	
<i>Chapter 8</i>	<i>Toward a Neurochemistry of Naming and Anomia</i>	
	Martin L. Albert	
	Neurochemistry of Output Anomia	158
	Neurochemistry of Lexical Semantic Anomia	160
	Conclusions	162
	References	163
<i>Chapter 9</i>	<i>Language Deficits in Broca’s and Wernicke’s Aphasia: A Singular Impairment</i>	
	Sheila E. Blumstein and William P. Milberg	
	Introduction	167
	Theoretical Framework	169
	Lexical Processing Deficits in Aphasia	170
	Syntactic Deficits in Aphasia: A Preliminary Proposal	175
	Semantic Integration	179
	References	181
<i>Chapter 10</i>	<i>Right Hemisphere Contributions to Understanding Lexical Connotation and Metaphor</i>	
	Hiram Brownell	
	Introduction	185
	Neuropsychological Investigation of Connotation	188
	Neuropsychological Investigation of Metaphor	191
	Summary and Some Unresolved Issues	195
	References	199

<i>Chapter 11</i>	<i>Aspects of Lexical Access: Evidence from Aphasia</i>	
✓	Alfonso Caramazza	
	Modality-Specific Deficits	204
	The Organization of the Lexical System: Must We Postulate Modality-Neutral Lexical Nodes?	210
	The Organization of the Lexical System: Morphology in Spoken and Written Language	215
	Evaluating Computational Models of Lexical Access in Aphasia	219
	How Good a Fit?	221
	And If the Fits Had Been Good?	222
	The Globality Assumption and the Data from Modality-Specific Lexical Deficits	224
	Conclusion	225
	References	226
<i>Chapter 12</i>	<i>Using the Recording of Event-Related Brain Potentials in the Study of Sentence Processing</i>	
	Enriqueta Canseco-Gonzalez	
	Introduction	229
	Event-Related Brain Potentials and Semantic Processing	231
	Event-Related Brain Potentials and Grammatical Processing	232
	Slow Potentials in the Study of Language Processing	260
	Conclusion	262
	References	264
<i>Chapter 13</i>	<i>Grammatical Gender Is Not Always Syntactic</i>	
✓	Harold Goodglass	
	The Nature of Grammatical Gender	268
	How Does a Speaker Know a Word's Gender	269
	Conclusions	271
	References	272
<i>Chapter 14</i>	<i>The Time-Course of Lexical Access and the Role of Context: Converging Evidence from Normal and Aphasic Processing</i>	
	David Swinney, Penny Prather, and Tracy Love	
	Preface	273
	Introduction	274
	The Basic Evidence	275
	Lexical Access and Context Effects: Evidence from Neurologically Involved and Non-neurologically Involved Populations	285
	Differential Cerebral Hemispheric Contributions to Lexical Access (and Context Effects)	287

An Integrated View of Lexical Access and Context Effects: Converging Evidence from Normal and Aphasic Populations	289
References	290

Part V The Syntax–Discourse Interface

Chapter 15 Comprehension of Discourse-Linked and Non-Discourse-Linked Questions by Children and Broca’s Aphasics

✓ *Sergey Avrutin*

Introduction	295
Background	298
Experimental Results	301
Consistency with Other Findings	308
Conclusions	311
References	311

Chapter 16 Positron Emission Tomographic Studies of Syntactic Processing

✓ *David Caplan*

Methods	316
Experiments with Young Subjects Using Relative Clauses	317
Experiments with Young Subjects Using Active and Passive Sentences	322
Experiments with Elderly Subjects Using Relative Clauses	322
Discussion	323
References	325

Chapter 17 Canonicity in Broca’s Sentence Comprehension: The Case of Psychological Verbs

Maria Mercedes Piñango

Psychological Verbs	330
The Argument Linking Hypothesis	334
Predictions by the Trace Deletion Hypothesis and the Argument Linking Hypothesis	337
Previous and New Empirical Evidence	341
Discussion and Conclusions	345
References	348

Chapter 18 A Simple Argument for Subject Gaps

Joan Maling

References	354
----------------------	-----

Chapter 19	<i>Some Recent Investigations of Gap Filling in Normal Listeners: Implications for Normal and Disordered Language Processing</i>	
	Lewis P. Shapiro	
	Study 1: VP-Ellipsis	357
	The Present Study	360
	Study 2: Wh-Questions	364
	Experiment 1: <i>Who</i> and <i>What</i> Questions	369
	Experiment 2: <i>Which-NP</i> Questions	372
	References	375
