

Table of contents

Preface

XVIX

CHAPTER 1

Language as a biological adaptation

1

1.1 Historical notes 1

1.1.1 Functionalism in biology 1

1.1.2 Structuralism 3

1.1.3 Direct descent 6

1.2 Language, information and communication 7

1.2.1 Preamble 7

1.2.2 The cognitive representation system 8

1.2.3 The peripheral codes 12

1.2.4 The grammar code 12

1.3 Change and variation 17

1.3.1 Adaptive function, evolutionary change and population variation
in biology 17

1.3.2 Functional motivation, typological variability
and diachronic change in linguistics 20

CHAPTER 2

The bounds of generativity and the adaptive basis of variation

31

2.1 Preamble 31

2.2 Categories, natural and otherwise 35

2.2.1 Preliminaries 35

2.2.2 Philosophical antecedents 35

2.2.3 Antecedents in psychology 38

2.2.4 Prototypes: The bio-adaptive middle ground 38

2.2.5 The adaptive underpinnings of natural categories 40

2.3 Non-discrete grammatical relations 43

2.3.1 Criterial properties 43

- 2.3.2 Cross-linguistic variation 45
- 2.3.3 Intra-linguistic variation 48
- 2.4 Synchronic variability in rule application 58
 - 2.4.1 Non-discreteness and gradation due to ongoing change 58
 - 2.4.2 Residual semantic-pragmatic sensitivity of synchronic grammar 58
 - 2.4.3 Extraposed relative clauses in English 60
- 2.5 Frequency distribution of 'generative' vs. 'emergent' grammar in text 62
- 2.6 Discussion 67

CHAPTER 3

The demise of competence

71

- 3.1 The (non-)configurationality caper 71
- 3.2 Oral vs. written grammar 74
- 3.3 Methodology 78
 - 3.3.1 Text production 78
 - 3.3.2 Notational conventions 79
- 3.4 The grammar of subject and direct-object arguments in intonation units containing verbs 79
 - 3.4.1 Argument-coding syntactic devices 79
 - 3.4.2 Results 83
- 3.5 The grammar of verbless intonation units 99
 - 3.5.1 Discontinuous NPs 99
 - 3.5.2 Scattered ('gapped') VPs 108
- 3.6 Are verbless intonation units well-governed? 115
- 3.7 Discussion 120
 - 3.7.1 Whither 'configurationality'? 120
 - 3.7.2 Whither 'competence'? 121
 - 3.7.3 Whither 'generativity'? 121

CHAPTER 4

Human language as an evolutionary product

123

- 4.1 Introduction 123
- 4.2 A functional-adaptive overview of human communication: Recapitulation 124
 - 4.2.1 The cognitive representation system 125
 - 4.2.2 The symbolic communicative codes 127

4.3	The primate visual information-processing system	134	
4.3.1	Directionality and hierarchy	134	
4.3.2	Iconic spatial ('retinotopic') maps	135	
4.3.3	The two streams of visual information processing	135	
4.4	The correspondence between visual, cognitive and linguistic information systems	135	
4.5	The neurology of human language	137	
4.5.1	Preamble: Modularity vs. interaction	137	
4.5.2	The semantic modules	139	
4.5.3	Episodic memory	140	
4.5.4	The peripheral coders and de-coders	142	
4.5.5	Grammar and Broca's area	143	
4.5.6	Interim summary	145	
4.6	Evolutionary hypothesis	147	
4.7	Supporting arguments	147	
4.7.1	The rise of a visual-gestural coding	147	
4.7.2	The shift to auditory-oral coding	149	
4.7.3	The evolution of grammar	152	
4.8	Recapitulation and analogy	156	
4.8.1	Preamble	156	
4.8.2	The philosophy of science argument	156	
4.8.3	The not-the-same-neurology argument	157	
4.8.4	The neural-mechanism argument	157	
4.8.5	The developmental trends	158	
4.9	Closure	160	
CHAPTER 5			
An evolutionary account of language processing rates			163
5.1	Preamble	163	
5.2	The temporal rate of natural language processing	163	
5.2.1	Natural spoken language	163	
5.2.2	Psycholinguistic studies of mental activation	167	
5.2.3	Neuro-psychological studies of brain activation	167	
5.3	Language and visual information processing	168	
5.4	Hypothesis	171	
5.5	Experiment I: Event processing rates	171	
5.5.1	Subjects	171	
5.5.2	Stimuli and their presentation	171	

- 5.5.3 Instructions and post-viewing procedures 172
- 5.5.4 Data coding and analysis 172
- 5.5.5 Results 175
- 5.5.6 Statistical analysis 176
- 5.6 Experiment II: Participants ('objects') procession rates 178
 - 5.6.1 Subjects 178
 - 5.6.2 Stimuli and their presentation 178
 - 5.6.3 Instructions and post-viewing procedures 178
 - 5.6.4 Data coding and analysis 179
 - 5.6.5 Results 180
- 5.7 Discussion 182
 - 5.7.1 The fit of results to predictions 182
 - 5.7.2 Appropriateness of the methodology 182
 - 5.7.3 Why these particular processing rates? 183

CHAPTER 6

- The diachronic foundations of language universals 205**
- 6.1 Background 205
 - 6.1.1 Between diversity and universals 205
 - 6.1.2 Taxonomy 207
- 6.2 The typology of passive constructions 209
- 6.3 The rise of grammatical morphology 216
- 6.4 Discussion 219
 - 6.4.1 The diachronic foundations of typological diversity 219
 - 6.4.2 The diachronic underpinnings of language universals 220
 - 6.4.3 Diachrony and evolution 222

CHAPTER 7

- The neuro-cognitive interpretation of 'context':
Anticipating other minds 225**
- 7.1 The objectivization of 'context' 225
- 7.2 Mental models 227
 - 7.2.1 Preamble 227
 - 7.2.2 The human memory and attention systems 227
- 7.3 The three memory types as repositories of the 'shared
communicative context' in language processing 230
 - 7.3.1 Preamble 230

- 7.3.2 Referent accessibility due to shared cultural context
(permanent semantic memory) 230
- 7.3.3 Accessibility due to shared current discourse/text
(episodic memory) 233
- 7.3.4 Accessibility due to shared speech situation
(working memory; current attention focus) 236
- 7.4 The selectivity of mental models 239
- 7.5 The automatization of context: The use of grammar
to manipulate the hearer's perspective 245
 - 7.5.1 Preliminaries 245
 - 7.5.2 Tense 246
 - 7.5.3 Aspect 248
 - 7.5.4 Modality 251
 - 7.5.5 Negation 252
 - 7.5.6 Focus and contrast 254
 - 7.5.7 Pre-posed adverbial clauses 255
- 7.6 Discussion 256
 - 7.6.1 Explicit vs. implicit mental models 256
 - 7.6.2 Context as a mental entity: The legacy of objectivism 257
 - 7.6.3 Grammar as an automated language processor 259
 - 7.6.4 Other minds 259

CHAPTER 8

- The grammar of the narrator's perspective in narrative fiction** 263
- 8.1 The narrator's perspective 263
- 8.2 First-person vs. third-person narrator 264
 - 8.2.1 First-person narrative 264
 - 8.2.2 Third-person narrative 265
- 8.3 The deployment of perspective in *Cold Mountain* 266
 - 8.3.1 Preliminaries 266
 - 8.3.2 Perspective and irrealis scope 267
 - 8.3.3 The distribution of perspective-indicating expressions
in *Cold Mountain* 271
- 8.4 Qualitative distribution of subjective predications
in *Cold Mountain* 277
- 8.5 The scattering of perspective 282
- 8.6 The use of referential devices to code perspective 288
- 8.7 Revenge of the omniscient narrator 296

8.8 Final reflections 299

CHAPTER 9

The society of intimates

303

9.1 Language and social cooperation:

The cultural context of inter-personal cooperation 303

9.2 Rational Choice vs. cultural conventions 304

9.3 The society of intimates 307

9.3.1 Preliminaries 307

9.3.2 General characteristics 308

9.4 Kinship-based cooperation: The Trobriand case 311

9.4.1 Land ownership, land-use and residence 311

9.4.2 Kinship and marriage 311

9.4.3 The life-cycle of cooperation 312

9.4.4 The logic of the Trobriand yam exchange 313

9.4.5 Kinship and reciprocity 313

9.5 Dealing with strangers 314

9.5.1 Enmity and de-alienation: The Western Apache case 314

9.5.2 De-alienation in other contexts 316

9.6 Mitigating the hazards of communication

in the society of intimates 317

9.6.1 Preamble 317

9.6.2 Private discourse and the costs of new information 318

9.6.3 The irrelevance of relevance in public discourse 319

9.7 How culture co-opts individual choice 322

9.8 Culture as a mechanism of automated social action 323

9.9 The persistent relevance of the society of intimates 325

9.9.1 Historical perspective 325

9.9.2 The legitimacy of government 326

9.9.3 Recapturing old evolutionary wisdom 327

9.9.4 Rituals of de-alienation 329

9.9.5 The persistence of the society of intimates 329

9.9.6 Maladaptive features of the society of intimates 329

9.10 What of Rational Choice? 331

CHAPTER 10

On the ontology of academic negativity

335

10.1 Introduction 335

10.2 Philosophy of Science: The logic and sociology of falsification	335
10.3 Linguistics: The communicative pragmatics of negation	338
10.4 Anthropology: The social undesirability of negation	341
10.5 Discussion	344
Epilogue: Joseph Greenberg as a theorist	347
Bibliography	357
Index	377
