

Eidesstattliche Erklärung .....	
Danksagung .....	
Abstract .....	V
Zusammenfassung.....	VII
List of abbreviations .....	IX
List of figures.....	XII
List of tables.....	XVI
List of supporting information .....	XVI
<b>1 General introduction.....</b>	<b>3</b>
1.1 Ubiquitous plastic.....	3
1.2 The fate of plastic.....	5
1.3 Alternative waste management and materials.....	7
1.4 <i>Pseudomonas</i> for bio-upcycling .....	11
1.5 Scope of this thesis.....	14
<b>2 Material and Methods .....</b>	<b>19</b>
2.1 Chemicals, media and cultivation conditions.....	19
2.2 Molecular work .....	26
2.2.1 DNA procedures .....	26
2.3 Analytical methods.....	26
2.3.1 Growth monitoring methods.....	26
2.3.2 Extracellular metabolites.....	27
2.3.3 Genome sequencing.....	27
2.3.4 Proteomics.....	27
2.3.5 Detection of dehydrogenase and CoA activity .....	28
2.3.6 Statistics.....	28
<b>3 Laboratory evolution reveals the metabolic and regulatory basis of ethylene glycol metabolism by <i>Pseudomonas putida</i> KT2440 .....</b>	<b>32</b>
3.1 Introduction.....	32
3.2 Results and Discussion .....	34

3.2.1	Redox equivalent homeostasis in the utilization of ethylene glycol as co-substrate ...	34
3.2.2	Metabolic engineering approach for ethylene glycol utilization .....	36
3.2.3	Isolation of mutants able to utilize ethylene glycol as sole carbon source by adaptive laboratory evolution.....	37
3.2.4	Genomic and metabolic context of adaptive mutations.....	39
3.2.5	Reverse engineering of ethylene glycol metabolism .....	44
3.3	Conclusions.....	47
<b>4</b>	<b>Unraveling 1,4-butanediol metabolism in <i>Pseudomonas putida</i> KT2440 .....</b>	<b>51</b>
4.1	Introduction.....	51
4.2	Results .....	53
4.2.1	Isolation of strain with enhanced growth on 1,4-butanediol by ALE.....	53
4.2.2	Developing leads for 1,4-butanediol degradation pathways.....	55
4.2.1	Pathway validation .....	62
4.3	Discussion .....	69
4.4	Conclusion .....	74
<b>5</b>	<b>Consolidation for strains utilizing PU monomers .....</b>	<b>79</b>
5.1	Introduction.....	79
5.2	Results .....	80
5.2.1	Enabling growth on adipic acid .....	80
5.2.2	The molecular basis for growth on adipic acid.....	86
5.2.3	Investigation in genes responsible for adipic acid degradation.....	89
5.2.4	Consolidation of the metabolism of adipic acid, 1,4-butanediol, ethylene glycol.....	91
<b>6</b>	<b>General discussion and outlook .....</b>	<b>101</b>
6.1	Plastic monomer degrading <i>P. putida</i> .....	101
6.2	Challenges to overcome .....	103
6.2.1	Plastic monomer co-utilization.....	103
6.2.2	Developing plastic monomer utilizing strains for industrial production.....	104
	<b>Appendix .....</b>	<b>109</b>
	<b>References .....</b>	<b>133</b>
