

Part I Introduction and Background

Chapter 1 Why Do Economists Study Education Policy?	1	Prelude The Education of Benjamin Franklin	18
Prelude The U.S. Educational Attainment Gap	1	2.1 Defining Education Markets	19
1.1 Defining the Economics of Education	3	The Levels of Education in the United States	22
What Is Education?	3	DEEP DIVE: International Schooling Comparisons	25
What Is Economics?	5	Providers in Education Markets	27
1.2 Studying the Economics of Education	8	Arguments for the Role of Government and Nonprofits in Education	30
Scientific Method and the Economics of Education	9	2.2 The Roles of Government in Education	32
Questions for the Economics of Education Markets in Education	9	Regulations and Mandates in Education	32
1.3 What Can Economics Teach Us About Education Policies?	11	Public Funding for Education	33
The Different Types of Education Policies	11	2.3 Development of Education Institutions and Attainment in the United States	33
Policies as a Set of Incentives	13	Mid-Nineteenth Century: The Common School Movement	35
1.4 The Road Ahead: Objectives and Organization of the Book	14	1910–1940: The High School Movement	35
1.5 Conclusion	16	1940–1975: Expansion at the Postsecondary Level	36
Chapter 2 The Structure and History of Education Markets in the United States	18	1975–Today: The Growth in Demand for Skills and the Shift to Market-Based Schooling Policies	37
		2.4 Conclusion	39

Chapter 3 Empirical Tools of Education Economics	42
<u>Prelude</u> Why Does College Enrollment Differ by Family Income?	42
3.1 Descriptive Evidence and the Distinction Between Correlation and Causation	44
TOOLBOX: Descriptive Statistics	44
DEEP DIVE: Why Is It Important to Distinguish Correlation from Causation?	47
3.2 Randomized Control Trials: The Experimental Ideal	48

3.3 Nonexperimental Methods	51
Regression Analysis	52
TOOLBOX: Omitted Variables Bias	54
Policy Changes and the Difference-in-Difference Approach	58
Instrumental Variables	62
Regression Discontinuity: Examining Sharp Breaks	63
3.4 Conclusion	65

Part II: The Foundations of Education Production and Investment

Chapter 4 The Human Capital Model	68
<u>Prelude</u> The Education Investment Decisions of Morgan and Stanley	68
4.1 What Is Human Capital?	69
4.2 The Costs and Benefits of an Education	71
4.3 Basic Setup of the Human Capital Model	72
TOOLBOX: Present Value and Compound Interest	73
4.4 Present Value Formulation and Educational Investments	75
4.5 Predictions from the Investment Model of Education	76
Changes in Direct Costs	76
Changes in Indirect Costs	76
Changes in Benefits	77
4.6 Continuous Schooling Choices	78

TOOLBOX: Calculating Marginal Rates of Return: The Mincer Formulation	79
4.7 Why Does Educational Attainment Differ Among Individuals?	80
People Differ in Their Ability to Finance Direct Costs	81
People Differ in the Benefits They Receive from Education	82
Policy Implications of Differences in Attainment	83
4.8 Conclusion	84
Chapter 5 The Signaling Model: An Alternative to the Human Capital Framework	87
<u>Prelude</u> How Would You Hire the Best Workers?	87
5.1 The Motivation for the Signaling Model	88
5.2 Setup of the Signaling Model	89

5.3 Signaling Model Equilibrium	91	DEEP DIVE: Estimating the Returns to Education Using "Random" Variation in Education from Quarter of Birth	122
Separating Equilibrium	92		
Pooling Equilibrium	94		
5.4 Signals and Indices	95	6.3 Empirical Evidence on the Social Returns to Educational Attainment	125
5.5 The Importance of Distinguishing Between the Human Capital and Signaling Models	96	6.4 Empirical Evidence on the Private Returns to Education Quality	128
The Private and Social Returns to Education	96	Defining College Quality	129
5.6 Empirical Evidence on Signaling Models	102	Estimating the Causal Effect of College Quality on Earnings	130
Distinguishing Between Human Capital and Signaling Models	102	DEEP DIVE: The Returns to Two- and Four-Year Colleges	132
Empirical Evidence	102	DEEP DIVE: Estimating the Return to College Quality Using a Regression Discontinuity Design	134
DEEP DIVE: Estimating the Labor Market Signaling Value of a GED	103	Why Is There a Return to College Quality?	136
DEEP DIVE: Estimating the Labor Market Signaling Value of a High School Diploma	104	6.5 Conclusion	137
DEEP DIVE: Sheepskin Effects in the Returns to Education	106	Chapter 7 How Knowledge Is Produced: The Education Production Function	140
5.7 Conclusion	107	Prelude Knowledge Production Versus the Production of Computers	140
Chapter 6 The Returns to Education Investment	110	7.1 Microeconomics of Production Functions	141
Prelude Is Investing in Education "Worth It"?	110	The Production Function	142
6.1 The Difficulty of Estimating the Causal Effect of Education on Earnings	113	Choosing Input Levels	143
Selection When Ability Is One-Dimensional	113	TOOLBOX: The Efficient Allocation of Inputs	144
TOOLBOX: Ability Bias in Estimating the Returns to Education	114	DEEP DIVE: Technology in the Classroom: Changing Input Prices and Education Production	147
Selection When Ability is Multidimensional	116	The Education Production Function with Many Inputs	148
6.2 Empirical Evidence on the Private Returns to Educational Attainment	117	7.2 Implications for Education Policy	149
The Mincer Equation	117	Different Types of Education Policies	149
Modern Approaches to Estimating the Private Returns to Schooling	118	Theoretical Arguments for Different Education Policies	151
DEEP DIVE: Estimating the Returns to Education Using Data on Identical Twins	120		

7.3 Challenges to Estimating Education Production Functions	152
Measuring Inputs	153
Measuring Outputs	155

Specifying the Production Process	156
Choosing the Unit of Analysis	157

7.4 Conclusion	157
-----------------------	-----

Part III: Elementary and Secondary Education Policy

Chapter 8 The Financing of Local Public Schools	160
---	-----

<i>Prelude</i> <i>Serrano v. Priest</i>	160
---	-----

8.1 School Financing in the United States: Trends and Levels	162
--	-----

8.2 Local School Choice: Voting with Your Feet	164
--	-----

The Free Rider Problem	165
The Tiebout Model	165
Challenges for the Tiebout Model	166
Empirical Evidence on Tiebout Sorting	167

8.3 The School Finance Reform Movement	170
--	-----

Local Versus Centralized Financing	170
Judicial Action and Legislative Response	171

8.4 Forms of School Finance Centralization and Aid	174
--	-----

The Community Budget Constraint	174
Block and Matching Grants	176
Actual State Aid Formulas	178
Paying for School Finance Equalization	182

DEEP DIVE: "Robin Hood and His Not So Merry Plan"	183
---	-----

School Finance Reform in Practice	183
-----------------------------------	-----

8.5 Conclusion	185
-----------------------	-----

Chapter 9 Does Money Matter? The Relationship Between Education Inputs and Educational Outcomes	188
---	-----

<i>Prelude</i> <i>The Coleman Report</i>	188
--	-----

9.1 The Hanushek Critique	190
----------------------------------	-----

The Relationship Between Total Resource Policies and Outcomes	190
--	-----

DEEP DIVE: The Relationship Between State Spending and Student Test Scores	193
--	-----

Explanations for Small Total Resource Effects	195
---	-----

Measurement Problems in Capturing Resource Effects	196
---	-----

DEEP DIVE: The Effects of Education Resources on Long-Run Outcomes	198
--	-----

DEEP DIVE: The Effects of School Finance Reforms on Educational Outcomes	200
--	-----

9.2 The Effect of Class Size Reduction Policies	201
---	-----

Project STAR	202
--------------	-----

DEEP DIVE: The Difficulty of Running a Social Experiment	205
--	-----

DEEP DIVE: Long-Run Class Size Effects	206
---	-----

Nonexperimental Class Size Studies	207
------------------------------------	-----

Evidence from Policy Variation	208
--------------------------------	-----

DEEP DIVE: The California Class Size Reduction Policy	209
---	-----

9.3 Teacher Quality	210
----------------------------	-----

Value-Added and the Measurement of Teacher Quality	211
---	-----

TOOLBOX: Estimating Teacher Value-Added	213
--	-----

DEEP DIVE: Nonexperimental and Simulation Evidence on the Validity of Value-Added Models	215
---	-----

How Much Does Teacher Quality Matter?	216
---------------------------------------	-----

The Relationship Between Teacher Quality and Teacher Characteristics	217
---	-----

9.4	Conclusion	218
Chapter 10	School Choice: A Market-Based Approach to Education Reform	221
<u>Prelude</u>	The Founding of KIPP Schools	221
10.1	Economic Theory of School Choice	222
	Matching Student Demand and Local Public Schools	223
TOOLBOX	Utility Maximization and Optimal Consumption Decisions	225
	Introducing School Choice Mechanisms	227
	The Supply Side of the Market and School Choice	228
10.2	School Choice Policies	231
	Charter Schools	232
	Open Enrollment	234
	Private and Parochial School Tuition Vouchers	235
	Magnet Schools	235
	Homeschooling	236
10.3	Effects of School Choice Policies on Student Outcomes	236
	The Role of Selection in School Choice Studies	237
	Empirical Evidence on the Effect of School Choice on Student Achievement	237
TOOLBOX	Calculating the Intent to Treat and the Treatment Effect on the Treated	240
DEEP DIVE	The Harlem Children's Zone	241
DEEP DIVE	Parental Information About School Quality and Open Enrollment Policies	244
10.4	Effects of School Choice Policies on Competition and Traditional Public Schools	248
	Empirical Challenges	248
	Evidence on How School Choice Policies Affect Competition and Traditional Public Schools	249

10.5	Conclusion	251
Chapter 11	Test-Based Accountability Programs	255
<u>Prelude</u>	The Rise of Test-Based Accountability	255
11.1	Accountability: Measurement, Rewards, and Punishment	256
	What Is Test-Based Accountability?	256
	School Accountability in the United States	257
DEEP DIVE	The Politics of Common Core Standards	260
DEEP DIVE	The Design of No Child Left Behind	263
11.2	School Accountability Measures	264
11.3	Do School Accountability Policies Change Student Performance?	267
	The Effect of School Accountability Policies on Student Achievement	267
DEEP DIVE	The Effect of the Florida Accountability System on Student Achievement	269
	Effects on the Distribution of Student Achievement	271
	Explaining Achievement Effects: School Responses to Accountability Pressure	272
	Unintended Effects: Evidence of Gaming and Cheating	272
DEEP DIVE	How Schools and Teachers Respond to Accountability Pressure	273
11.4	Do Student Accountability Policies Change Student Performance?	275
11.5	Conclusion	276
Chapter 12	Teacher Labor Markets	278
<u>Prelude</u>	Classrooms Without Teachers: The Teacher "Shortage" Problem	278

12.1 Supply and Demand in Teacher Labor Markets	279	What Are Teachers Unions?	292
Teacher Supply, Demand, and Wage Schedules	279	A Brief History of the Teacher Unionization and Collective Bargaining Movement	293
Compensating Differentials	282	The Structure of Union Contracts	295
12.2 Who Becomes a Teacher, and Does It Matter?	282	Evidence on the Effect of Unions on School Districts and Students	297
The Roy Model and Occupational Choice	282	12.4 Teacher Incentive Pay	300
Changes in the Composition of Teachers over Time	286	The Principal-Agent Model	301
DEEP DIVE: The Link Between Teacher Compensation and Student Outcomes	289	Different Forms of Teacher Merit Pay	302
Teacher Mobility over the Career Cycle	290	Does Teacher Incentive Pay Affect Student Achievement?	303
12.3 Teachers Unions	292	12.5 Teacher Certification	306
		DEEP DIVE: The Effect of Teach for America Teachers on Student Achievement	308
		12.6 Conclusion	309

Part IV Higher Education Policy

Chapter 13 Market Dimensions of Higher Education in the United States	312	"Mass" Higher Education	326
Prelude The Higher Education Market in Chicago	312	Twenty-First-Century Supply-Side Changes	330
13.1 What Do Universities Do?	314	13.3 The Financing of Higher Education	331
The University as a Firm	314	Revenues and Expenses	331
The Government's Role in Higher Education	318	Higher Education Costs and Prices	332
The Optimization Problem for Colleges and Universities	321	13.4 Heterogeneity and Stratification in the Market for Higher Education	341
13.2 The History and Structure of Higher Education in the United States	323	Heterogeneity in Higher Education	341
Eighteenth- and Nineteenth-Century Higher Education	323	Stratification in Public Higher Education	344
DEEP DIVE: The Founding of Cornell University	323	Stratification in Private Higher Education	345
Origins of United States Research Universities	324	Competition and Stratification over Time in the Higher Education Market	345
		13.5 Conclusion	349
		Chapter 14 Paying for College: Student Financial Aid Policies and Collegiate Enrollment	352

<u>Prelude</u> Financing a College Investment	352
14.1 <u>Inequality and Inefficiency in Collegiate Enrollment and Attainment</u>	353
Differences in College Investment by Income	354
Short-Run Versus Long-Run Credit Constraints	354
Empirical Evidence on Short-Run Credit Constraints	357
DEEP DIVE: Credit Constraints and Housing Markets	359
Other Barriers to Enrollment	360
14.2 <u>The Structure of Financial Aid in the United States</u>	360
The Different Types of Aid Policies	360
Federal Financial Aid	362
DEEP DIVE: The Price of Borrowing	366
Other Sources of Financial Aid	367
DEEP DIVE: Place-Based "Promise" Programs	369
How Is Need-Based Aid Determined?	370
DEEP DIVE: Calculating Financial Aid Eligibility	373
14.3 <u>The Effect of Net Price and Financial Aid on Behavior</u>	374
Empirical Framework and Estimation Challenges	374
Federal Aid	375
DEEP DIVE: The Role of Complexity and Student Knowledge	378
State Merit Aid	380
14.4 <u>Student Debt</u>	382
Levels and Trends of Student Debt	382
Default and Repayment of Student Debt	384
Repayment Alternatives	385
14.5 <u>Conclusion</u>	388

Chapter 15 <u>The Economics of College Life: Admissions, Peer Effects, and Graduation</u>	392
<u>Prelude</u> College Choices as Economic Choices	392
15.1 <u>The Economics of College Choice</u>	393
College Application and Admissions	393
DEEP DIVE: College Admissions Essays	397
15.2 <u>Policies to Improve Matching Students and Colleges</u>	405
Early Decision and Early Action	405
Race-Based Affirmative Action Policies	406
15.3 <u>Peer and Student Inputs in Knowledge Production</u>	411
Peer Effects	411
Working and Studying	414
15.4 <u>Choosing a Major</u>	417
15.5 <u>College Completion</u>	420
15.6 <u>Conclusion</u>	424
Appendix A <u>Description of Data Sets Commonly Used in the Economics of Education</u>	428
A.1 <u>Large, Nationally Representative Government Surveys</u>	429
Current Population Survey (CPS)	429
U.S. Decennial Census and American Community Survey (ACS)	430
A.2 <u>Longitudinal Individual-Level Data Sets</u>	431
National Longitudinal Study of 1972 (NLS72)	431

High School and Beyond (HS&B)	432
National Education Longitudinal Study of 1988 (NELS:88)	433
Educational Longitudinal Study of 2002 (ELS:2002)	434
Early Childhood Longitudinal Study, Kindergarten Class of 1998-99 (ECLS-K)	435
National Longitudinal Survey of Youth (NLSY), 1979 and 1997	436
Panel Study of Income Dynamics (PSID)	437

A.3 State Administrative Data Sets 438

Texas	438
North Carolina	439
Florida	440

<u>A.4</u> Institutional-Level Data from the U.S. Department of Education	440
Integrated Postsecondary Education Data System (IPEDS)	441
Common Core of Data (CCD)	441
National Assessment of Education Progress (NAEP)	442

Glossary	444
