<i>Acknowledgments</i>	x
<i>Preface</i>	xi
<b>1 Introduction</b>	<b>1</b>
<i>Providing a Conceptual Overview</i>	3
<i>Contrasting Linear Models</i>	7
<i>Univariate Analysis</i>	11
Multiple Regression	12
Analysis of Variance	12
<i>Multivariate Analysis</i>	13
Multivariate Analysis of Variance	13
Structural Equation Modeling	15
<i>Multilevel Data Structures</i>	16
Multilevel Multivariate Model	18
Multilevel Structural Model	19
<i>Summary</i>	21
<i>References</i>	23
<b>2 Getting Started with Multilevel Analysis</b>	<b>26</b>
<i>Introduction</i>	26
<i>The Big Picture</i>	27
<i>From Single-level to Multilevel Analysis</i>	28
Summarizing Some Differences between Single-level and Multilevel Analyses	32
<i>Developing a General Multilevel Modeling Strategy</i>	35
Step 1: Partitioning the Variance in an Outcome	36
Step 2: Adding Level-1 Predictors to Explain Variability in Intercepts	40
Step 3: Adding Level-2 Predictors to Explain Variability in Intercepts	41
Step 4: Examining Possible Variation in Level-1 Slopes	42
Step 5: Adding Predictors to Explain Variation in Slopes	44
<i>Specifying the Basic Two-level Model with Path Diagrams</i>	46
<i>Model Estimation</i>	48
Maximum Likelihood Estimation	49

vi *Contents*

Model Convergence and Fit 51  
Considerations for ML Estimation 52  
An ML Illustration 54  
Bayesian Estimation 54  
Bayesian and ML Estimation with a Limited Number of Groups 56  
*Summary* 59  
*References* 61

**3 Multilevel Regression Models**

66

*Introduction* 66  
*Building a Model to Explain Employee Morale* 67  
Model 1: One-way ANOVA or Null Model 70  
Model 2: Random-Intercept with Level-1 Predictors 74  
Model 3: Specifying a Level-1 Random Slope 81  
Model 4: Explaining Variation in the Level-2 Intercept  
and Slope 83  
Model 4 Output 84  
*Examining Residuals* 87  
*Centering Predictors* 92  
Centering Predictors in Models with Random Slopes 96  
*Summary* 98  
*References* 100

**4 Extending the Two-level Regression Model**

101

*Introduction* 101  
*Three-level Univariate Model* 101  
Developing a Three-level Univariate Model 103  
Research Questions 103  
Data 104  
Model 1: Null (No Predictors) Model 105  
Model 2: Defining Predictors at Level 1 106  
Model 3: Defining Predictors at Level 2 107  
Model 4: Examining an Interaction at Level 2 110  
Model 5: Examining a Randomly Varying Slope at Level 3 111  
Model 6: Adding Level-3 Predictors 112  
*Accounting for Variance* 114  
*Cross-classified Data Structures* 114  
Students Cross-classified in High Schools and Postsecondary  
Institutions 117  
Research Questions 118  
Model 1: Developing a Null Model 118  
Model 2: Adding Within-cell (Level-1) Predictors 121  
Model 3: Adding Between-cell Predictors 122  
Model 4: Adding a Randomly Varying Level-1 Slope 123  
Model 5: Explaining Variability in Random Slopes 124  
*Summary* 126  
*References* 130

<b>5</b>	<b>Methods for Examining Individual and Organizational Change</b>	<b>131</b>
	<i>Introduction</i>	132
	<i>Analyzing Longitudinal Data</i>	132
	Repeated Measures ANOVA	133
	Growth Modeling and Other Approaches	133
	<i>Random-coefficients Growth Modeling</i>	134
	Defining the Level-1 Model	135
	Defining the Level-2 Model	138
	<i>Extending the Model to Examine Changes Between Groups</i>	139
	<i>Examining Changes in Students' Math Scores</i>	139
	Model 1: Unconditional Means Model	140
	Model 2: Unconditional Growth Model	141
	Model 3: Unconditional Growth Model with Random Time Parameter	144
	Investigating Subsets of Individuals' Trajectories	144
	Model 4: Adding a Quadratic Polynomial Term	144
	Model 5: Adding a Between-subjects Predictor	148
	Model 6: Deciding on the Level-1 Covariance Structure	149
	<i>Building a Two-level Growth Model Using Age</i>	152
	Model 1: Unconditional Growth Model with Random Age Variable	153
	Model 2: Final Growth Model with Between-subjects Predictor	154
	<i>Examining Changes in Institutions' Graduation Rates</i>	155
	Model 1: Unconditional Means Model	157
	Model 2: Unconditional Growth Model with Random Time Slope	157
	Model 3: Adding a Time-Varying Covariate	159
	Model 4: Examining Whether Instructional Support Influences Growth in Graduation	160
	Model 5: Testing a Random Effect for Instructional Support	161
	Model 6: Adding Between-Institution Covariates	161
	<i>Developing Piecewise Growth Models</i>	163
	Examining Student Growth in Literacy	163
	Changes Due to a Policy	165
	<i>Fixed-effects Regression Models</i>	167
	Graduation Growth in One Higher Education System	170
	<i>Summary</i>	173
	<i>References</i>	178
<b>6</b>	<b>Multilevel Models with Categorical Variables</b>	<b>180</b>
	<i>Introduction</i>	180
	<i>Estimating the Models</i>	182
	<i>Specifying Models for Binary, Ordinal, and Nominal Outcomes</i>	185
	Binary Outcome	185
	Logit Link Function	186
	Probit Link Function	189
	Estimating the Intraclass Correlation	193
	Ordinal Logit Outcome	193
	Ordinal Probit Outcome	198
	MPLUS Latent Response Formulation	200

Unordered Categorical (Nominal) Outcome 201  
*Explaining Student Persistence* 202  
Binary Outcome 202  
Null Model 203  
Ordinal Outcome 205  
Estimating Probabilities from Logit and Probit Coefficients 206  
Dichotomous Outcome: Adding Level-1 and Level-2 Predictors 207  
Ordinal Outcomes: Adding Level-1 and Level-2 Predictors 209  
Examining a Cross-level Interaction with Continuous by Categorical  
Predictors 211  
Examining a Cross-level Interaction with Two Continuous Variables 213  
Count Data 217  
Building a Level-1 and Level-2 Model 220  
*Summary* 223  
*References* 226

**7 Multilevel Structural Equation Models**

228

*Multilevel Models with Latent Variables* 228  
*Multilevel Measurement Models* 231  
Multilevel Factor Variance Components 234  
*Types of Multilevel Factors* 236  
Model 1: Individual-level Factor 236  
Model 2: Within-cluster Factor 236  
Model 3: Shared Cluster-level Factor 237  
Model 4: Configural Factor Structure 238  
Model 5: Shared and Configural Factors 239  
*Estimating MCFA Models* 239  
*Developing a Two-level Model* 242  
Model 1 and Model 2 Results 243  
Model 3 and Model 4 Results 246  
*Extending the CFA Model to Three Levels* 249  
Model 5: Defining a Configural Factor Model at Levels 1, 2, and 3 251  
Model 6: Restricting Errors to Zero at Level 2 252  
*Multilevel CFA with Ordinal Observed Indicators* 255  
Developing a CFA Model 256  
*Multilevel Models with Latent Variables and Covariates* 261  
Model 1: Specifying a Two-level Latent Factor Model with Covariates 263  
Model 2: Specifying a Random Level-1 Slope 268  
Model 3: Adding a Latent Factor Between Groups 270  
Model 4: Testing an Indirect (or Mediating) Effect 275  
*Summary* 277  
*References* 281

**8 Multilevel Latent Growth and Mixture Models**

285

*Introduction* 286  
*Latent Growth Models* 286

Intercept and Slope (IS) and Level and Shape (LS) Models	287
<i>Defining the Latent Growth Model</i>	288
Measurement Model	289
Structural Model	291
Multilevel Analysis of Growth	293
Examining Variables that Influence Student Growth in Science	294
Piecewise Latent Growth Model	298
<i>Latent Variable Mixture Modeling</i>	300
Defining Latent Profiles and Classes	302
An Example Latent Profile Analysis	306
Two-level Models	313
Examining Heterogeneity in Intercepts	313
Investigating Latent Classes for Random Slopes at Level 2	320
Alternative Model Specification	324
Growth Mixture Models	324
Examining Latent Classes in Students' Growth in Science	326
Two-level GMM	330
<i>Summary</i>	335
<i>References</i>	339
<b>9 Data Considerations in Examining Multilevel Models</b>	<b>343</b>
<i>Complex Samples, Design Effects, and Sample Weights</i>	343
An Example Using Multilevel Weights	347
<i>Parameter Bias and Statistical Power</i>	350
Parameter Bias	350
Power	351
An Example	352
Anticipated Effect Size and Power	355
Mplus Monte Carlo Study	358
<i>Design Complexity</i>	362
<i>Missing Data</i>	363
Missing Data at Level 2	367
Imputed Data Sets	368
<i>Concluding Thoughts</i>	372
