

Contents

<i>Preface</i>	(v)
1. Plant Pathology	1
• Objectives of Plant Pathology; History of Plant Pathology; Development of Plant Pathology as a science; Modern Plant Pathology; Biological Control of Plant Pathogens	
2. Resistance of Plant Pathogens	34
• Black Rot And Frogeye Leafspot ; Morphology of the causal organism ; Polymerase Chain Reaction Techniques ; Choice of Diagnostic Techniques ; Plant Pathogens and Parasitic Fungi; The exposure and identification of Plant Pathogens	
3. Pathogenic Fungi	64
• Mutation In Fungi; Reproduction of Fungi; Fungi and their Habitats; Fungi Mutate; Variation Due To Hybridization; Inheritance of Factors; Toxicoses and Poisonous Fungi	
4. Plant Disease	113
• Introduction; What Causes Plant Disease?; Definitions of Plant Disease; Diseases Caused by Viruses and Viroids; Plant Disease Epidemiology; Classification of Plant Diseases by Causal Agent; Conditions for Disease Development; Nature and Importance of Plant Diseases; Soil pH	
5. Plant Fungus Interactions	140
• Bacterial Diseases damage of Greenhouse Crops; Fungal Endophytes of Plants; Industrial Uses of Fungal Enzymes; Phytopathogenic Fungi ; Fungal Insecticides ; Fungal Cytoplasm	

6. Plant Fungal Diseases	170
• Fungal Ecology; Fungal metabolism; Fungal Diseases of Plants; Fungal Diseases Affecting Humans; Damping Off– Crown and Root Rots ; Fungal Factors	
7. Transmission of Virus Diseases	206
• History of virus diseases ; The Nature Of The Virus ; Diagnosis of virus diseases ; Viruses and Human Disease	
8. Plant Nematodes	232
• Introduction to Nematodes; The History of Nematodes; Features of Nematodes ; Methods of Plant Nematode Control; Nematode Endurance Strategies; Nematode Management	
<i>Bibliography</i>	244
<i>Index</i>	247
