

## Contents

<i>Preface</i> .....	<i>v</i>
<i>Contributors</i> .....	<i>xi</i>
1 What Is New in (Plant) Proteomics Methods and Protocols: The 2015–2019 Quinquennium .....	1
<i>Jesus V. Jorrin-Novó</i>	
2 Multiple Biomolecule Isolation Protocol Compatible with Mass Spectrometry and Other High-Throughput Analyses in Microalgae .....	11
<i>Francisco Colina, María Carbó, Ana Alvarez, Mónica Meijón, María Jesús Cañal, and Luis Valledor</i>	
3 Protein Interaction Networks: Functional and Statistical Approaches .....	21
<i>Mónica Escandón, Laura Lamelas, Víctor Rocas, Victor M. Guerrero-Sanchez, Mónica Meijón, and Luis Valledor</i>	
4 Specific Protein Database Creation from Transcriptomics Data in Nonmodel Species: Holm Oak ( <i>Quercus ilex</i> L.) .....	57
<i>Víctor M. Guerrero-Sanchez, Ana M. Maldonado-Alconada, Rosa Sánchez-Lucas, and Maria-Dolores Rey</i>	
5 Subcellular Proteomics in Conifers: Purification of Nuclei and Chloroplast Proteomes .....	69
<i>Laura Lamelas, Lara García, María Jesús Cañal, and Mónica Meijón</i>	
6 Apoplastic Fluid Preparation from <i>Arabidopsis thaliana</i> Leaves Upon Interaction with a Nonadapted Powdery Mildew Pathogen .....	79
<i>Ryohai Thomas Nakano, Nobuaki Ishihama, Yiming Wang, Junpei Takagi, Tomohiro Uemura, Paul Schulze-Lefert, and Hirofumi Nakagami</i>	
7 Shotgun Proteomics of Plant Plasma Membrane and Microdomain Proteins Using Nano-LC-MS/MS .....	89
<i>Daisuke Takahashi, Bin Li, Takato Nakayama, Yukio Kawamura, and Matsuo Uemura</i>	
8 A Protocol for the Plasma Membrane Proteome Analysis of Rice Leaves .....	107
<i>Ravi Gupta, Yu-Jin Kim, and Sun Tae Kim</i>	
9 Isolation, Purity Assessment, and Proteomic Analysis of Endoplasmic Reticulum .....	117
<i>Xin Wang and Setsuko Komatsu</i>	
10 Dimethyl Labeling-Based Quantitative Proteomics of Recalcitrant Cocoa Pod Tissue .....	133
<i>Yoel Esteve-Sánchez, Jaime A. Morante-Carriel, Ascensión Martínez-Márquez, Susana Sellés-Marchart, and Roque Bru-Martínez</i>	

## Contents

11	Quantitative Profiling of Protein Abundance and Phosphorylation State in Plant Tissues Using Tandem Mass Tags .....	147
	<i>Gaoyuan Song, Christian Montes, and Justin W. Walley</i>	
12	Optimizing Shotgun Proteomics Analysis for a Confident Protein Identification and Quantitation in Orphan Plant Species: The Case of Holm Oak ( <i>Quercus ilex</i> ) .....	157
	<i>Isabel Gómez-Gálvez, Rosa Sánchez-Lucas, Bonoso San-Eufrasio, Luis Enrique Rodríguez de Francisco, Ana M. Maldonado-Alconada, Carlos Fuentes-Almagro, and Mari Angeles Castillejo</i>	
13	Combining Targeted and Untargeted Data Acquisition to Enhance Quantitative Plant Proteomics Experiments .....	169
	<i>Gene Hart-Smith</i>	
14	A Phosphoproteomic Analysis Pipeline for Peels of Tropical Fruits .....	179
	<i>Janet Juarez-Escobar, José M. Elizalde-Contreras, Víctor M. Loyola-Vargas, and Eliel Ruiz-May</i>	
15	Label-Free Quantitative Phosphoproteomics for Algae .....	197
	<i>Megan M. Ford, Sheldon R. Lawrence II, Emily G. Werth, Evan W. McConnell, and Leslie M. Hicks</i>	
16	Targeted Quantification of Phosphopeptides by Parallel Reaction Monitoring (PRM) .....	213
	<i>Sara Christina Stolze and Hirofumi Nakagami</i>	
17	Enrichment of N-Linked Glycopeptides and Their Identification by Complementary Fragmentation Techniques .....	225
	<i>Eduardo Antonio Ramirez-Rodriguez and Joshua L. Heazlewood</i>	
18	High-Resolution Lysine Acetylome Profiling by Offline Fractionation and Immunoprecipitation .....	241
	<i>Jonas Giese, Ines Lassowskat, and Iris Finkemeier</i>	
19	A Versatile Workflow for the Identification of Protein–Protein Interactions Using GFP-Trap Beads and Mass Spectrometry-Based Label-Free Quantification .....	257
	<i>Guillaume Née, Priyadarshini Tilak, and Iris Finkemeier</i>	
20	In Vivo Cross-Linking to Analyze Transient Protein–Protein Interactions .....	273
	<i>Heidi Pertl-Obermeyer and Gerhard Obermeyer</i>	
21	Proteome Analysis of 14-3-3 Targets in Tomato Fruit Tissues .....	289
	<i>Yongming Luo, Yu Lu, Junji Yamaguchi, and Takeo Sato</i>	
22	The Use of Proteomics in Search of Allele-Specific Proteins in (Allo)polyploid Crops .....	297
	<i>Sebastien Christian Carpentier</i>	
23	Methods for Optimization of Protein Extraction and Proteogenomic Mapping in Sweet Potato .....	309
	<i>Thualfeqar Al-Mohanna, Norbert T. Bokros, Nagib Ahsan, George V. Popescu, and Sorina C. Popescu</i>	

24	In Silico Analysis of Class III Peroxidases: Hypothetical Structure, Ligand Binding Sites, Posttranslational Modifications, and Interaction with Substrates . . . . .	325
	<i>Sabine Lüthje and Kalaivani Ramanathan</i>	
25	MALDI Mass Spectrometry Imaging of Peptides in <i>Medicago truncatula</i> Root Nodules . . . . .	341
	<i>Caitlin Keller, Erin Gemperline, and Lingjun Li</i>	
26	Cystatin Activity–Based Protease Profiling to Select Protease Inhibitors Useful in Plant Protection . . . . .	353
	<i>Marie-Claire Goulet, Frank Sainsbury, and Dominique Michaud</i>	
27	A Pipeline for Metabolic Pathway Reconstruction in Plant Orphan Species . . . . .	367
	<i>Cristina López-Hidalgo, Mónica Escandón, Luis Valledor, and Jesus V. Jorrin-Novo</i>	
28	Detection of Plant Low-Abundance Proteins by Means of Combinatorial Peptide Ligand Library Methods . . . . .	381
	<i>Egisto Boschetti and Pier Giorgio Righetti</i>	
29	iTRAQ-Based Proteomic Analysis of Rice Grains . . . . .	405
	<i>Marouane Baslam, Kentaro Kaneko, and Toshiaki Mitsui</i>	
	<i>Index</i> . . . . .	415
