<i>Preface</i>	page ix
<i>Acknowledgments</i>	xvii
<b>Part I Basics</b>	1
1 Economics and Econophysics	3
1.1 Physics	3
1.2 Economics	7
1.3 Econophysics	17
1.4 Physics, Reality, and the Natural World	20
1.5 Economics, Reality, and the Real World	27
1.6 Econophysics and the Empirical World	33
2 Measuring the Income Distribution	56
2.1 Basic Definitions and Results	56
2.2 Two-Components Distribution	63
2.3 Income Distribution Functions	64
2.4 Empirical Evidence	81
2.5 Limitations of Curve Fitting	102
3 Piketty's <i>Capital in the Twenty-First Century</i>	105
3.1 Data-Driven Analysis	105
3.2 Phenomenology	107
3.3 Pluralistic Economic Theory	115
3.4 Fundamental Laws of Capitalism	116
3.5 The Mechanisms for Rising Inequality	136
3.6 Summary of the Main Results	141
3.7 Econophysics after Piketty	142

<b>Part II</b>	<b>Statistical Econophysics</b>	145
4	Stochastic Dynamics of Income and Wealth	147
	4.1 Uncertainty and Risk in Physics and Economics	148
	4.2 Kinetic Models of Income and Wealth Distribution	154
	4.3 Political Economy	182
	4.4 Class Redistribution	190
	4.5 Econophysics of Income Distribution and Piketty	194
<b>Part III</b>	<b>Economic Cycles</b>	199
5	Circular Flows in Economic Systems	201
	5.1 Economic Growth and Trade Cycles	202
	5.2 Uncertainty, Confidence, Investment, and Instability	205
	5.3 The Goodwin Growth-Cycle Macroeconomic Dynamics	210
	5.4 Empirical Evidence of the Goodwin Macrodynamics	223
	5.5 Conclusions	241
6	Goodwin-Type Distributive Macrodynamics	243
	6.1 Structural Stability	244
	6.2 Cyclic Evolution in the Tsallis Distribution	247
	6.3 The Boyd–Blatt Model	249
	6.4 The Keen Model	262
	6.5 Other Extensions of the Goodwin Model	269
	<i>Postface</i>	275
	<i>References</i>	277
	<i>Subject Index</i>	301
	<i>Author Index</i>	311
