<i>Preface</i>	v
Introduction	1
1 The Commodity Space	1
2 Consumers	3
3 Producers	10
4 Markets	14
5 Correspondences	17
6 Exercises	19
1. Exchange Economies	21
1 Economies and Allocations in the Economy	21
2 Existence of Equilibria	27
3 The Survival Condition and Hierarchic Equilibria	36
4 Admissible Preferences	40
5 Fixed Point Theorems for General Equilibrium Theory	45
6 Exercises	50
2. Economies with Production	53
1 Walras Equilibria in Economies with Production	54
2 Linear Models of Production and Growth	59
3 International Trade and Factor Price Equalization	73
4 Exercises	80

- 3. Welfare Theorems and Market Failures 83
 - 1 Pareto-optimality 83
 - 2 Pareto-optimality and Social Optimum 98
 - 3 Quantifying the Lack of Efficiency 105
 - 4 Separation Theorems for Convex Sets 108
 - 5 Exercises 111
- 4. Cooperative Game Theory and Equilibria 115
 - 1 The Core of an Economy 115
 - 2 Allocations Induced by Other Game Theoretic Solutions 125
 - 3 Fuzzy Games and Equilibria 135
 - 4 Exercises 138
- 5. Large Economies 141
 - 1 Economies with Many Agents 141
 - 2 Economies with Many Commodities 158
 - 3 Large-square Economies 171
 - 4 Exercises 172
- 6. Uniqueness and Stability of Equilibria 175
 - 1 The Uniqueness Problem 175
 - 2 Stability 186
 - 3 Excess Demand Functions 190
 - 4 Exercises 196
- 7. The Equilibrium Manifold and Probabilistic Equilibrium Theory 199
 - 1 The Equilibrium Manifold 199
 - 2 Probabilistic Equilibrium Theory 207
 - 3 Exercises 231

8. General Equilibrium and Imperfect Competition	233
1 The Subjective Demand Approach	233
2 Equilibrium with Objective Demand	239
3 Exercises	248
9. Incentives and Mechanisms in General Equilibrium	251
1 Implementing Economic Equilibria	251
2 Strategic Market Games	253
3 Hurwicz's Theorem and the Walras Correspondence	256
4 Allocation Processes and Information	258
5 The VCG Mechanism and Equilibrium Allocations . .	266
6 Exercises	271
10. Market Failures	275
1 Introduction: The Classical Market Failures	275
2 External Effects	276
3 Public Goods	284
4 Natural Monopolies	291
5 Exercises	295
11. Time and General Equilibrium	299
1 Time and Economic Activity	299
2 Temporary Equilibrium	305
3 Exercises	310
12. Overlapping Generations Economies	313
1 The Overlapping Generations (OLG) Model	313
2 Pareto Optimality of Equilibria Over Time	317
3 Indeterminacy of Walras Equilibrium in the OLG Model	324
4 Cycles in the OLG Model	328
5 Exercises	331

13. Uncertainty and General Equilibrium	333
1 Introduction	333
2 Contingent Commodities	334
3 Equilibrium of Plans, Prices and Price Expectations	337
4 Sunspot Equilibria	345
5 Exercises	351
14. Financial Markets	355
1 One-Period Models of Financial Equilibrium	355
2 Dynamic Models of Financial Markets	370
3 Exercises	374
15. Economies with Incomplete Markets	377
1 Equilibria in Economies with Financial Assets	377
2 Pseudoequilibria in Economies with Real Assets	380
3 Exercises	395
16. General Equilibrium and Money	399
1 Money and Decentralized Exchange	399
2 Cybercurrencies and Blockchain	409
3 Money and Memory	412
4 Exercises	418
<i>Bibliography</i>	421
<i>Index</i>	429
