Preface — V

0 Preliminaries — 1

0.1 Real numbers — 1

0.2 Sets — 2

0.3 Quantifiers and logic — 4

0.4 Functions — 6

0.5 Countable and uncountable sets — 7

0.6 Equivalence relations and partitions — 10

0.7 Partial orders — 12

1 Topologies — 21

1.1 The Euclidean metric — 21

1.2 Open sets in metric spaces — 27

1.3 Topologies — 31

1.4 Basis for a topology — 39

1.4.1 Neighborhood bases — 47

1.5 Closure and interior — 52

1.5.1 Boundary points — 56

1.6 Limit points — 61

2 New topologies from existing topologies — 65

2.1 Subspaces — 65

2.2 Finite products of spaces — 69

2.3 Quotient spaces — 75

3 Continuity — 85

3.1 Continuity — 85

3.2 Special continuous functions — 93

3.2.1 Homeomorphisms — 93

3.2.2 Projection functions — 98

3.2.3 Coordinate functions — 99

4 Connectedness — 103

4.1 Connectedness — 103

4.2 Path connectedness — 109

5 Compactness — 115

5.1 Compactness — 115

5.2 Compactness in metric spaces — 124

- 6 Metric spaces and real analysis — 133**
 - 6.1 Metric spaces — 133
 - 6.2 Infinite products and functional analysis — 143
 - 6.3 The cocountable topology — 153

- 7 Separation axioms and compactifications — 157**
 - 7.1 Separation axioms — 157
 - 7.2 Separation by continuous functions — 163
 - 7.3 Compactifications — 167
 - 7.4 Proof of the Tychonoff theorem — 176

- 8 Alexandroff spaces — 181**
 - 8.1 Alexandroff topologies — 182
 - 8.2 Quasiorders — 188
 - 8.3 Alexandroff topologies as quasiorders — 194

- 9 Lattice properties — 201**
 - 9.1 Lattice theory — 201
 - 9.2 Compact and Hausdorff topologies in $T(X)$ — 207
 - 9.3 sublattices and complements in $T(X)$ — 213

- 10 Partially ordered topological spaces — 219**
 - 10.1 Partially ordered topological spaces — 219
 - 10.2 Normally ordered topological spaces — 226

- 11 Variations on metric spaces — 233**
 - 11.1 Pseudometrics — 233
 - 11.2 Quasi-metrics — 238
 - 11.3 Partial metrics — 245
 - 11.4 Other variations of metrics — 249

- 12 Uniform structures — 253**
 - 12.1 Uniform continuity in metric spaces — 253
 - 12.2 Uniformities — 258
 - 12.2.1 Relations — 259
 - 12.2.2 Filters — 260
 - 12.2.3 Uniformities — 261
 - 12.2.4 Base for a uniformity — 263
 - 12.3 The uniform topology — 266
 - 12.3.1 Closure and interior — 266
 - 12.3.2 The square of a uniform space — 268
 - 12.3.3 Uniform continuity — 272

12.4	Uniformities and pseudometrics —	274
12.5	Quasi-uniformities —	278
13	Continuous deformation of sets and curves —	283
13.1	Continuous deformation of closed sets in \mathbb{R}^2 —	283
13.2	Continuous deformation of planar curves —	289
13.3	The fundamental group —	294
13.4	The Vietoris topology and the Hausdorff metric —	299
Index —		307
Bibliography —		313
