

## CONTENTS

PARTICIPANTS .....	IX
OBSERVERS .....	XII
E. SCHMID, Welcome Speech .....	1
D. FLAMM, Life and Personality of Ludwig Boltzmann .....	3
E. BRODA, Philosophical Biography of Ludwig Boltzmann .....	17
M.J. KLEIN, The Development of Boltzmann's Statistical Ideas .....	53
G.E. UHLENBECK, The Validity and the Limitations of the Boltzmann Equation .....	107
C. CERCIGNANI, Comment to Professor Uhlenbeck's Paper .....	121
J.D. FOCH, Jr., On Higher Order Hydrodynamic Theories of Shock Structure .....	123
G.W. FORD, Sound From the Boltzmann Equation .....	141
E.G.D. COHEN, The Generalization of the Boltzmann Equation to Higher Densities .....	157
J.V. SENGERS, The Three-Particle Collision Term in the Generalized Boltzmann Equation ....	177
J.R. DORFMAN, Velocity Correlation Functions for Moderately Dense Gases .....	209
L. WALDMANN, On Kinetic Equations for Particles with Internal Degrees of Freedom .....	223
S. HESS, Flow-Birefringence in Gases, An Example of the Kinetic Theory Based on the Boltzmann Equation for Rotating Particles .....	247

VIII

J.J.M. BEENAKKER, Non-Equilibrium Angular Momentum Polarization in Rotating Molecules .....	267
R. KUBO, The Boltzmann Equation in Solid State Physics .....	301
K. SEEGER and H. PÖTZL, Experimental and Theoretical Investigations in Semiconductors Concern- ing the Boltzmann Equation .....	341
M. KAC, Some Probabilistic Aspects of the Boltzmann Equation .....	379
I. PRIGOGINE, The Statistical Interpretation of Non-Equilibrium Entropy .....	401
W.W. WOOD, A Review of Computer Studies in the Kinetic Theory of Fluids .....	451
I. KUŠČER, A Survey of Neutron Transport Theory ....	491
S.R. DE GROOT, Relativistic Boltzmann Theory .....	529
I.M. KHALATNIKOV, Kinetic Equation for Elementary Excitations in Quantum Systems .....	563
Ya.G. SINAI, Ergodic Theory .....	575
D. RUELE, Ergodic Theory .....	609
O.E. LANFORD, Ergodic Theory and Approach to Equilibrium for Finite and Infinite Systems .....	619
K. PRZIBRAM, Erinnerungen an Boltzmanns Vorlesungen .....	641
