CHAPTER TWO

INSTITUTIONAL ARRANGEMENTS AND THE PROCESS OF ECONOMIC POLICY-MAKING IN GREECE: 1953 - 1983

I. Introduction	21
II. The Financial Sector	25
1. The Main Institutional Arrangements	25
a. The Greek Financial Institutions	26
b. The Currency Committee	26
c. The Bank of Greece	27
d. The Capital Market Committee	30
e. Private and State-owned Financial Institutions	31
2. The Period 1953 - 1963	35
a. Policy Objectives	35
b. Instruments Employed	36
3. The Period 1963 - 1973	37
a. Policy Objectives	37
b. Instruments Employed	38

4. The Period 1973 - 1983	40
a. Policy Objectives	40
b. Instruments Employed	43
III. The Public Sector	49
1. The Main Institutional Arrangements	49
2. The Period 1953 - 1963	56
a. Policy Objectives	56
b. Instruments Employed	57
3. The Period 1963 - 1973	59
a. Policy Objectives	59
b. Instruments Employed	59
4. The Period 1973 - 1983	61
a. Policy Objectives	61
b. Instruments Employed	62
IV. Balance of Payments Arrangements	70
1. The Main Institutional Arrangements	70
2. The Period 1953 - 1963	73
a. Policy Objectives	73
b. Instruments Employed	74
3. The Period 1963 - 1973	75
a. Policy Objectives	75
b. Instruments Employed	76
4. The Period 1973 - 1983	79
a. Policy Objectives	79
b. Instruments Employed	79
V. The Real Sector	81

CHAPTER THREE**A SURVEY OF RECENT MACROECONOMIC STUDIES OF
THE GREEK ECONOMY**

I. Introduction	102
II. Models of the Real Sector of the Economy	102
1. The Model of Garganas	104
2. The Model of Sallas	114
3. The Model of Vernardakis	119
4. The Model of Tsoiris	124
III. Integrated Models of the Real and Monetary Sectors	132
1. The Model of Kouzionis	133
2. The Model of Voloudakis, Brissimis, and Leventakis	139
IV. Studies Dealing with Special Macroeconomic Problems	144
1. Analysis of the Special Studies	145
2. Evaluation of the Special Studies	161
V. An Overall Evaluation of the Models Reviewed	163

CHAPTER FOUR**A THEORETICAL STAGFLATION-MODEL FOR GREECE**

I. Basic Characteristics	170
II. The System of Equations	171
1. The Demand Side Specification	171
2. The Analysis of the Supply Side	175
a. The Production Function	175
b. Labor Demand and Supply	177
c. The Energy Market	183
d. The Equilibrium Condition of the Output Market	184
3. Endogenous, Exogenous Variables and Expectations Hypotheses	185
4. Long-Run Implications and Compatibility with Standard Rational Expectations Models	188
III. Solution of the Model with Adaptive Expectations	194
1. The Output Equation	197
2. The Employment Equation	204
3. The Inflation Rate Equation	208
IV. Solution of the Model with Rational Expectations	208
1. The Output Equation	209
2. The Employment Equation	216
3. The Inflation Rate Equation	217
V. Concluding Remarks	222

CHAPTER FIVE**THE EMPIRICAL ANALYSIS**

I. Introductory Remarks	224
1. Restrictions	224
2. The Data Problem	228
3. Statistical Procedures	229
4. The Testing Strategy	231
II. Computation of Expected Values	231
1. Exponential Smoothing Procedures	232
2. Expected Values under Rational Expectations	234
III. Empirical Results of the Adaptive Expectations Model	238
1. Output Results	238
2. Employment Results	241
3. Inflation Rate Results	243
IV. Empirical Results of the Rational Expectations Model	248
1. Output Results	248
2. Employment Results	252
3. Inflation Rate Results	255

CHAPTER SIX**CONCLUDING REMARKS AND POLICY IMPLICATIONS**

I. Discussion of Important Empirical Results	262
II. Policy Implications	266

APPENDIX I**CONSTRUCTION OF SPECIAL VARIABLES****APPENDIX II****DATA SERIES****BIBLIOGRAPHY**
