

Contents

1	Convex Sets	1
1.1	Algebraic Properties	1
1.2	Combinatorial Properties	12
1.3	Topological Properties	17
1.4	Support and Separation	23
1.5	Extremal Representations	33
2	Convex Functions	41
2.1	Properties and Operations	41
2.2	Regularity	52
2.3	The Support Function	61
3	Brunn–Minkowski Theory	73
3.1	The Space of Convex Bodies	73
3.2	Volume and Surface Area	86
3.3	Mixed Volumes	93
3.4	The Brunn–Minkowski Theorem	115
3.5	The Alexandrov–Fenchel Inequality	126
3.6	Steiner Symmetrization	136
4	From Area Measures to Valuations	147
4.1	Mixed Area Measures	148
4.2	An Existence and Uniqueness Result	156
4.3	A Local Steiner Formula	169
4.4	Projection Bodies and Zonoids	179
4.5	Valuations	196
5	Integral-Geometric Formulas	207
5.1	Invariant Measures	208
5.2	Projection Formulas	221
5.3	Section Formulas	226
5.4	Kinematic Formulas	233

6 Solutions of Selected Exercises	239
6.1 Solutions of Exercises for Chap. 1	239
6.2 Solutions of Exercises for Chap. 2	249
6.3 Solutions of Exercises for Chap. 3	256
6.4 Solutions of Exercises for Chap. 4	268
6.5 Solutions of Exercises for Chap. 5	278
