Part I: Surgical Planning

| | |
|-------------------------------------------------------------------------------------------|----|
| 1 Collaborative Planning in Epilepsy Surgery | 2 |
| <i>Ignacio Delgado-Martínez, Rodrigo Rocamora, Gerardo Conesa Bertran, and Luis Serra</i> | |
| 1.1 Introduction | 1 |
| 1.2 Epileptology Phase: Establishing the Plan | 1 |
| 1.2.1 Computer Processing of Neuroimaging Data | 2 |
| 1.2.2 Planning Using Regions of Interest..... | 3 |
| 1.3 Neurosurgical Phase: Building the Plan | 3 |
| 1.3.1 The Vascular Network during Trajectory Planning | 3 |
| 1.3.2 Virtual Reality during the Planning Process..... | 6 |
| 1.4 Revision Phase: Locking the Plan | 7 |
| 1.5 Implantation Phase: Executing the Plan | 7 |
| 1.5.1 Frame-Based Implantation Approaches | 7 |
| 1.5.2 Frameless Implantation Approaches | 8 |
| 1.5.3 Robot-Assisted Implantation Approaches | 8 |
| 1.5.4 Augmented-Reality Approaches | 8 |
| 1.6 Validation Phase: Evaluating the Plan | 9 |
| 1.7 Collaborative Workflow Systems: Planning Together | 9 |
| 1.7.1 SYLVIUS: A VR-CWS for Epilepsy Surgery..... | 9 |
| 1.8 Conclusion | 11 |
| 2 Intraoperative Neuronavigation | 14 |
| <i>Katherine L. Dickerson, Allen Ho, and Casey H. Halpern</i> | |
| 2.1 Introduction | 14 |
| 2.2 Frame Based | 14 |
| 2.3 Frameless | 15 |
| 2.4 Robotics | 15 |

Part II: Invasive EEG Studies

| | |
|---------------------------------------------------------------------------------------------------|----|
| 3 Invasive EEG Studies: Peg, Strip, and Grid Implantation | 22 |
| <i>Vivek P. Buch, Benjamin Kennedy, Gregory G. Heuer, Gordon H. Baltuch, and Phillip B. Storm</i> | |
| 3.1 Introduction | 22 |
| 3.2 History | 22 |
| 3.3 Patient Selection | 23 |
| 3.4 Electrode Types | 23 |
| 3.5 Planning Electrode Placement | 24 |
| 3.6 Surgical Technique | 24 |

| | | |
|-----------------------------------------|-------------------------------------------------------------------------------------------|----|
| 3.7 | Postimplant Management | 26 |
| 3.8 | Outcomes/Complications | 27 |
| 3.9 | Conclusion | 27 |
| 4 | Depth Electrodes | 29 |
| | <i>Om James Neeley, Irina Podkorytova, and Bradley Lega</i> | |
| 4.1 | Introduction | 29 |
| 4.2 | Preoperative Planning | 29 |
| 4.3 | Operative Process | 29 |
| 4.4 | Bone Fiducial Placement | 32 |
| 4.5 | Frame Placement and Positioning | 32 |
| 4.6 | Bolt Placement and Preparation for Electrode Insertion | 33 |
| 4.7 | Frameless Stereotactic Insertion Method | 34 |
| 4.8 | Frame-Based Methods | 34 |
| 4.9 | Electrode Insertion | 34 |
| 4.10 | Postoperative Care | 35 |
| 4.11 | Complications | 35 |
| 4.12 | Epilepsy Monitoring Unit Stay | 35 |
| 4.13 | Explant | 35 |
| 4.14 | Postdischarge Care | 36 |
| Part III: Cortical Resection | | |
| 5 | Radiofrequency Lesions through Depth Electrodes | 38 |
| | <i>Michele Rizzi and Massimo Cossu</i> | |
| 5.1 | Introduction | 38 |
| 5.2 | Technical Details of RF-TC | 39 |
| 5.2.1 | Side-Effects and Morbidity of RF-TC | 39 |
| 5.3 | Illustrative Case | 39 |
| 5.3.1 | RF-TC Tips and Tricks | 40 |
| 5.4 | Conclusions | 42 |
| 6 | Temporal Lobectomy and Amygdalohippocampectomy | 44 |
| | <i>Patrick Connolly and Gordon H. Baltuch</i> | |
| 6.1 | Introduction | 44 |
| 6.2 | Layout of the Operating Room and Positioning the Patient | 44 |
| 6.3 | Surface Anatomy and Designing the Incision for Right Temporal Lobectomy | 45 |
| 6.4 | Incision and Extracranial Dissection | 45 |
| 6.5 | Durotomy and Surface Exposure | 46 |
| 6.6 | Lateral Lobectomy | 46 |
| 6.7 | Microsurgical Resection of the Mesial Temporal Lobe | 47 |
| 6.8 | Closure | 48 |
| 6.9 | Conclusion | 51 |
| 7 | Selective Amygdalohippocampectomy | 52 |
| | <i>Warren W. Boling</i> | |
| 7.1 | Introduction | 52 |
| 7.2 | Surgical Anatomy of the Temporal Lobe with Emphasis on the Mesial Structures | 53 |
| 7.3 | Surgery for Temporal Lobe Epilepsy | 55 |
| 7.3.1 | Temporal Lobectomy | 55 |
| 7.3.2 | Cortico amygdalohippocampectomy | 55 |
| 7.3.3 | Cortico amygdalectomy | 55 |
| 7.3.4 | Selective Amygdalohippocampectomy | 56 |

| | | |
|--------------|----------------------------------------------------------------------------------------------|----|
| 7.4 | Surgical Technique of Selective Amygdalohippocampectomy | 56 |
| 7.4.1 | Keyhole Approach in Selective Amygdalohippocampectomy | 58 |
| 7.5 | Results of Selective Amygdalohippocampectomy on Seizure Tendency | 59 |
| 7.6 | Conclusion | 59 |
| 8 | Parahippocampectomy: A New Surgical Technique for Temporal Lobe Epilepsy | 61 |
| | <i>Mario A. Alonso Vanegas</i> | |
| 8.1 | Introduction | 61 |
| 8.2 | Historical Evolution of Some Surgical Techniques for SAH | 61 |
| 8.3 | Proposed Approach: Parahippocampectomy | 62 |
| 8.3.1 | Rationale | 62 |
| 8.3.2 | Surgical Technique | 63 |
| 8.3.3 | Indications for Parahippocampectomy | 65 |
| 8.3.4 | Contraindications for Parahippocampectomy | 65 |
| 8.4 | Concluding Remarks | 65 |
| 9 | Hippocampal Transection | 67 |
| | <i>Michiharu Morino</i> | |
| 9.1 | Introduction | 67 |
| 9.2 | Surgical Procedure | 67 |
| 9.2.1 | Position, Incision, and Extent of Craniotomy | 67 |
| 9.2.2 | Opening the Sylvian Fissure and Approach to the Inferior Horn of the Lateral Ventricle | 67 |
| 9.2.3 | Resection of the Amygdala and Hippocampal Recording | 69 |
| 9.2.4 | Incision of the Alveus and Transection of the Pyramidal Cell Layer | 69 |
| 9.2.5 | Transection of the Parahippocampal Gyrus and Entorhinal Area | 70 |
| 9.3 | Memory Outcome | 71 |
| 9.4 | Conclusion | 71 |
| 10 | Frontal Lobe Resection in Refractory Epilepsy | 72 |
| | <i>Arthur Cukiert</i> | |
| 10.1 | Introduction | 72 |
| 10.2 | Patient Workup and Outcome | 72 |
| 10.3 | Technical Issues | 74 |
| 10.4 | Complications | 78 |
| 10.5 | Conclusion | 84 |
| 11 | Cortical Resection: Central Region | 85 |
| | <i>David Segar and G. Rees Cosgrove</i> | |
| 11.1 | Introduction | 85 |
| 11.2 | Anatomical Considerations | 85 |
| 11.3 | Seizures of the Central Region | 87 |
| 11.4 | Etiology of Central Seizures | 88 |
| 11.5 | Presurgical Evaluation | 88 |
| 11.6 | Clinical Features | 88 |
| 11.6.1 | Neuroimaging | 88 |
| 11.7 | Electroencephalographic Investigation | 88 |
| 11.7.1 | Neuropsychological Testing | 89 |
| 11.8 | Psychosocial Assessment | 89 |
| 11.9 | Diagnostic Surgical Options | 89 |
| 11.10 | Therapeutic Surgical Options | 89 |
| 11.11 | Surgical Results of Central Resections | 89 |
| 11.12 | Conclusions | 90 |

| | | |
|--------------|-------------------------------------------------------------------------------------------|-----|
| 12 | Posterior Quadrant Resections | 91 |
| | <i>Marcelo Volpon Santos and Helio R. Machado</i> | |
| 12.1 | Introduction | 91 |
| 12.2 | Indications for Surgery | 91 |
| 12.3 | Surgical Technique | 91 |
| 12.3.1 | Temporo-Parieto-Occipital (Posterior Quadrant) Resection. | 91 |
| 12.3.2 | Outcome. | 93 |
| 12.3.3 | Complications | 94 |
| 13 | Surgery of the Insula | 96 |
| | <i>Christopher R. Mascott</i> | |
| 13.1 | Introduction | 96 |
| 13.2 | Insular Seizure Semiology | 97 |
| 13.3 | Insular Anatomy and Function | 97 |
| 13.4 | Vascular Anatomy and the Insular Lobe | 98 |
| 13.5 | Risks of Surgical Approaches to the Insula | 98 |
| 13.6 | Insular Tumors Presenting with Epilepsy | 99 |
| 13.6.1 | Tumors: Surgical Technique | 99 |
| 13.6.2 | Nonlesional Epilepsy Surgery and the Insula | 102 |
| 13.7 | Investigations and Workup | 102 |
| 13.7.1 | Noninvasive Studies | 102 |
| 13.7.2 | Invasive Studies | 102 |
| 13.8 | Resective Surgery | 103 |
| 13.8.1 | Technical Considerations. | 103 |
| 13.8.2 | Alternatives to Open Resection | 103 |
| 13.9 | Where to Go from Here: Clinical Perspectives | 104 |
| 13.10 | Conclusions and Future Perspectives | 104 |
| 14 | Treatment Strategies for Hypothalamic Hamartomas: Microsurgery versus Endoscopy .. | 107 |
| | <i>Ruth E. Bristol and P. David Adelson</i> | |
| 14.1 | Introduction | 107 |
| 14.2 | Pathophysiology | 107 |
| 14.3 | Clinical Features | 107 |
| 14.4 | Diagnosis and Neuroimaging | 108 |
| 14.5 | Indications for Intervention | 108 |
| 14.6 | Surgical Technique | 109 |
| 14.6.1 | Open Surgery—Craniotomy (Interhemispheric or Orbitozygomatic). | 109 |
| 14.6.2 | Endoscopic Resection | 109 |
| 14.7 | Alternative Approaches | 110 |
| 14.7.1 | Stereotactic Laser Ablation | 110 |
| 14.8 | Specific Considerations | 111 |
| 14.9 | Surgical Pearls | 111 |
| 14.10 | Surgical Risks | 111 |
| 14.11 | Outcome and Prognosis | 112 |
| 14.12 | Stereotactic Laser Thermoablation | 112 |
| 14.13 | Conclusion | 112 |
| 15 | Multiple Subpial Transections | 113 |
| | <i>Francesco G. Pucci and Albert E. Telfeian</i> | |
| 15.1 | Introduction | 113 |
| 15.2 | From Bench to Operating Theater | 113 |
| 15.3 | Surgical Technique | 114 |

| | | |
|-------------|------------------------------------------------------------------------------|-----|
| 15.4 | Preoperative Evaluation | 115 |
| 15.5 | Specific Indications | 116 |
| 15.6 | Outcome Data | 117 |
| 15.7 | Future Considerations | 117 |
| 16 | Laser-Induced Thermal Therapy for Medically Refractory Epilepsy | 120 |
| | <i>Nitesh V. Patel, Timothy Wong, and Shabbar F. Danish</i> | |
| 16.1 | Introduction | 120 |
| 16.2 | History | 120 |
| 16.3 | Relevant Pathophysiology | 121 |
| 16.4 | Physics and Hardware Considerations | 121 |
| 16.5 | Surgical Steps | 122 |
| 16.6 | Outcomes | 124 |
| 16.6.1 | Mesial Temporal Lobe Epilepsy | 124 |
| 16.6.2 | Developmental Anomalies/Lesional Epilepsy | 126 |
| 16.6.3 | Pediatric Epilepsy Syndromes | 127 |
| 16.7 | Complications | 127 |
| 16.8 | Future Directions | 128 |
| 16.9 | Conclusion | 128 |

Part IV: Intraoperative Mapping

| | | |
|-------------|-------------------------------------------------------------------------------------|-----|
| 17 | Motor, Sensory, and Language Mapping in Epilepsy Surgery | 132 |
| | <i>Brett E. Youngerman, Pranav Nanda, Marla J. Hamberger, and Guy M. McKhann II</i> | |
| 17.1 | Introduction | 132 |
| 17.2 | History | 132 |
| 17.3 | Patient Selection and Preoperative Functional Localization | 132 |
| 17.4 | Intraoperative Stimulation Technique | 134 |
| 17.5 | Language Task Selection and Patterns of Language Function | 136 |
| 17.6 | Clinical Outcomes following Resection | 137 |
| 17.7 | Limitations | 138 |
| 17.8 | Conclusions | 138 |

Part V: Disconnection

| | | |
|-------------|----------------------------------------------------------------------|-----|
| 18 | Cortical Disconnections | 142 |
| | <i>Helio R. Machado and Marcelo Volpon Santos</i> | |
| 18.1 | Introduction | 142 |
| 18.2 | Preoperative Evaluation Workup | 142 |
| 18.3 | Indications for Surgery | 142 |
| 18.4 | Surgical Anatomy | 143 |
| 18.4.1 | Cerebral Cortex | 143 |
| 18.4.2 | White Matter Pathways | 146 |
| 18.5 | Disconnective Procedures | 147 |
| 18.5.1 | Surgical Adjuncts | 147 |
| 18.5.2 | Frontal Disconnection | 147 |
| 18.5.3 | Temporo-Parieto-Occipital (Posterior Quadrantic) Disconnection | 148 |
| 18.5.4 | Parieto-Occipital Disconnection | 150 |
| 18.5.5 | Combined Disconnection/Subtotal Hemispherectomy | 150 |
| 18.5.6 | Extension to Hemispheric Disconnection | 150 |
| 18.6 | Complications | 151 |
| 18.7 | Outcome | 151 |

| | | |
|-------------|---------------------------------------------------------------------------------------|-----|
| 19 | Corpus Callosotomy | 152 |
| | <i>Bertil Rydenhag</i> | |
| 19.1 | Introduction | 152 |
| 19.2 | Open Classic Corpus Callosotomy | 153 |
| 19.3 | Other Techniques as Described in the Literature | 154 |
| 19.3.1 | Endoscopy-Assisted Procedures | 154 |
| 19.3.2 | The Use of Laser Techniques in Performing Corpus Callosotomy | 155 |
| 19.3.3 | Corpus Callosotomy Using Radiosurgery | 155 |
| 19.4 | Comments and Discussion | 156 |
| 20 | Endoscopic Callosotomy and Hemispherotomy: Bimanual Endoscopic Technique | 157 |
| | <i>Sandeep Sood and Gary Benjamin Rajah</i> | |
| 20.1 | Evolution of Endoscopic Surgical Techniques | 157 |
| 20.1.1 | Endoscopic Approaches to Disconnective Surgery | 157 |
| 20.2 | Equipment/Medications | 158 |
| 20.2.1 | Operating Room Setup | 158 |
| 20.3 | Anterior Interhemispheric Endoscopic Complete Callosotomy: Precoronal | 158 |
| 20.4 | Posterior Interhemispheric Endoscopic Complete Corpus Callosotomy | 160 |
| 20.4.1 | Procedure | 160 |
| 20.5 | Precoronal Endoscopic (Hemispherotomy) Technique | 161 |
| 20.5.1 | Procedure | 161 |
| 20.6 | Benefits and Results | 162 |
| 20.7 | Conclusion and Future Directions | 163 |
| 21 | Anatomical Hemispherectomy | 164 |
| | <i>Vivek P. Buch, Benjamin C. Kennedy, Gregory G. Heuer, and Phillip B. Storm</i> | |
| 21.1 | Introduction | 164 |
| 21.2 | Background | 165 |
| 21.3 | Surgical Technique | 165 |
| 21.4 | Postoperative Care | 168 |
| 21.5 | Complications | 168 |
| 21.6 | Conclusions | 168 |
| 22 | Functional Hemispherectomy and Peri-insular Hemispherotomy | 169 |
| | <i>Jean-Pierre Farmer and Roy W. R. Dudley</i> | |
| 22.1 | Introduction | 169 |
| 22.2 | Indications | 169 |
| 22.3 | Operative Techniques | 171 |
| 22.3.1 | Functional Hemispherectomy | 171 |
| 22.3.2 | Resection of the Central Region | 173 |
| 22.3.3 | Peri-insular Hemispherotomy | 174 |
| 22.4 | Conclusion | 176 |
| 23 | Endoscopic-Assisted Hemispherotomy | 177 |
| | <i>P. Sarat Chandra, Jitin Bajaj, Heri Subianto, and Manjari Tripathi</i> | |
| 23.1 | Introduction | 177 |
| 23.2 | Principles | 177 |
| 23.3 | Surgical Technique | 178 |
| 23.4 | Outcomes following Surgery | 181 |
| 23.5 | Summary with Important Points to Note | 183 |

| | | |
|-------------------------------------|------------------------------------------------------------------------------------------|-----|
| 24 | Vertical Parasagittal Hemispherotomy | 185 |
| | <i>Georg Dorfmueller, Mikael Levy, and Sarah Ferrand-Sorbets</i> | |
| 24.1 | Introduction | 185 |
| 24.2 | Historical Background | 185 |
| 24.3 | Description of the Surgical Technique of VPH | 186 |
| 24.3.1 | Approach to the Ventricle: Posterior Frontal Resection (► Fig. 24.1)..... | 186 |
| 24.3.2 | Posterior Callosotomy (► Fig. 24.2)..... | 187 |
| 24.3.3 | Interrupting the Hippocampal Tail (► Fig. 24.2)..... | 188 |
| 24.3.4 | Laterothalamic Disconnection (► Fig. 24.3)..... | 188 |
| 24.3.5 | Anterior Callosotomy (► Fig. 24.4)..... | 189 |
| 24.3.6 | Frontal Disconnection (► Fig. 24.5)..... | 190 |
| 24.4 | Results | 190 |
| 24.5 | Complications | 190 |
| 24.6 | Incomplete Disconnection | 192 |
| 24.7 | Conclusion | 192 |
| Part VI: Neuromodulation | | |
| 25 | Vagus Nerve Stimulation | 196 |
| | <i>Jared M. Pisapia, Gregory G. Heuer, and Gordon H. Baltuch</i> | |
| 25.1 | Preclinical Studies | 196 |
| 25.2 | Surgical Indications | 196 |
| 25.3 | Device | 196 |
| 25.4 | Surgical Anatomy | 198 |
| 25.5 | Surgical Implantation | 198 |
| 25.6 | Stimulation Programming | 200 |
| 25.7 | Battery Change and System Removal | 200 |
| 25.8 | Adverse Events and Complications | 200 |
| 25.9 | Conclusion | 201 |
| 26 | Hippocampal Deep Brain Stimulation in Refractory Temporal Lobe Epilepsy | 202 |
| | <i>Arthur Cukiert</i> | |
| 26.1 | Introduction | 202 |
| 26.2 | Rationale | 202 |
| 26.3 | Development Timeline | 203 |
| 26.4 | Patient Selection | 203 |
| 26.5 | Targeting | 203 |
| 26.6 | Hip-DBS Efficacy and Paradigms | 203 |
| 26.7 | Effects on Memory | 205 |
| 27 | Deep Brain Stimulation: Stimulation of the Anterior Nucleus of the Thalamus | 206 |
| | <i>Kai Lehtimäki</i> | |
| 27.1 | General Anatomy | 206 |
| 27.2 | ANT as a Stereotactic Target | 207 |
| 27.3 | Surgical Trajectory to the ANT | 207 |
| 28 | Responsive (Closed-Loop) Stimulation | 209 |
| | <i>Sanjeet S. Grewal, William O. Tatum, and Robert E. Wharen Jr.</i> | |
| 28.1 | Introduction | 209 |
| 28.2 | Localization of Cortical Function | 209 |

| | | |
|-------------|-------------------------------------------------------------|-----|
| 28.3 | Deep Brain Stimulation for Epilepsy | 209 |
| 28.4 | Cortical Stimulation for Epilepsy | 210 |
| 28.5 | External Responsive Neurostimulation | 210 |
| 28.6 | The Implantable RNS System | 211 |
| 28.6.1 | System Components | 211 |
| 28.6.2 | Surgical Implantation | 212 |
| 28.7 | Clinical Trials | 214 |
| 28.7.1 | Feasibility Clinical Trial | 214 |
| 28.7.2 | RNS System Pivotal Clinical Investigation in Epilepsy | 214 |
| 28.7.3 | RNS System: After the Pivotal Trial | 215 |
| 28.8 | Case Examples | 215 |
| 28.8.1 | Case 1 | 215 |
| 28.8.2 | Case 2 | 216 |
| 28.9 | Conclusions | 219 |

Part VII: Further Topics

| | | |
|-------------|-------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 29 | radiosurgery for Medically Refractory Epilepsy | 222 |
| | <i>Ricardo André Amorim Leite, Alessandra Gorgulho, Bruno Fernandes de Oliveira Santos, Rafael Costa Lima Maia, and Antonio De Salles</i> | |
| 29.1 | Introduction | 222 |
| 29.2 | Developments Permitting Noninvasive Techniques | 222 |
| 29.3 | Basic Principles of Radiobiology | 223 |
| 29.4 | Vascular Effects and Seizure Control | 223 |
| 29.5 | Effects of Radiation in the Epileptic Focus | 224 |
| 29.6 | Radiosurgery in Mesial Temporal Epilepsy | 224 |
| 29.7 | Radiosurgery for Hypothalamic Hamartoma | 225 |
| 29.8 | Other Focal Epilepsy Syndromes Treated by Radiosurgery | 226 |
| 29.9 | Conclusion | 226 |
| 30 | Focused Ultrasound as a Surgical Treatment for Epilepsy | 229 |
| | <i>Robert F. Dallapiazza, Tony R. Wang, Shayan Moosa, and W. Jeffrey Elias</i> | |
| 30.1 | Introduction | 229 |
| 30.2 | Barriers in Transcranial MR-Guided FUS for Epilepsy Treatments | 230 |
| 30.2.1 | Therapeutic Envelope of Current Systems | 230 |
| 30.2.2 | Volume Mismatch in Acoustic Focus and Epileptic Target | 230 |
| 30.3 | Potential Applications | 231 |
| 30.3.1 | Hypothalamic Hamartoma | 231 |
| 30.3.2 | Malformations of Cortical Development | 232 |
| 30.3.3 | Mesial Temporal Sclerosis | 232 |
| 30.3.4 | Disconnection Procedures | 232 |
| 30.3.5 | Other Focal Lesions Causing Epilepsy | 232 |
| 30.4 | Conclusions | 232 |
| | Index | 234 |
