

TABLE OF CONTENTS

<i>Preface for Teachers</i>	xi
<i>Acknowledgments</i>	xv
PART 1: <i>Introduction: Philosophy of Technology?</i>	
1. Introduction	3
Case/Technology: Nuclear Technology and the Atomic Bomb	3
1.1. Thinking about Technology?	4
1.2. Approach, Structure of the Book, and Overview of Chapters	7
Review Questions	11
Discussion Questions	11
Key Terms	11
2. History and Landscape	12
Case/Technology: Search Engines, Knowledge, and Memory	12
2.1. Beginnings: Two Ancient Myths	13
In Focus: Bernard Stiegler	14
2.2. A Brief History of the Discipline	20
Case/Technology: The Machine	20
2.3. Historical Context, Landscape of the Discipline, and Critical Questions	25
Case/Technology: The Industrial Revolution	25
In Focus: Carl Mitcham	26
Review Questions	29
Discussion Questions	29
Recommended Reading	30
Key Terms	30

PART 2: *Thinking about Technology by Starting from Theory*

3. Phenomenology and Hermeneutics: Heidegger, McLuhan, and Contemporary Work	33
Case/Technology: Robotics and Artificial Intelligence and the Question about Mastery	33
3.1. Heidegger's Essay Concerning Technology: Beyond an Instrumental Understanding of Technology	34
In Focus: Martin Heidegger	34
3.2. McLuhan's Understanding of Media	39
In Focus: Marshall McLuhan	40
In Focus: Maurice Merleau-Ponty	42
Case/Technology: The Internet	43
3.3. Some Contemporary Work in Phenomenology and Hermeneutics of Technology	46
Case/Technology: Artificial Intelligence	46
In Focus: Hubert Dreyfus	47
Review Questions	49
Discussion Questions	49
Recommended Reading	50
Key Terms	50
4. Postphenomenology, Material Hermeneutics, and Mediation Theory	51
Case/Technology: Driving a Car	51
4.1. Introduction: The Empirical Turn	52
4.2. Ihde's Postphenomenology and Material Hermeneutics	52
In Focus: Don Ihde	53
Case/Technology: Robot as Quasi-Other	55
4.3. Contemporary Postphenomenology and Mediation Theory	57
In Focus: Peter-Paul Verbeek	58
Case/Technology: Medical Sonography/Ultrasound	60
4.4. Critical Discussion	64
Review Questions	68
Discussion Questions	68
Recommended Reading	69
Key Terms	69

5. Critical Theory and Feminism	70
Case/Technology: Digital Technologies in a Corporate and Capitalist Context	70
5.1. Marx: Political Economy and Technology	70
In Focus: Karl Marx	71
5.2. Marx 2.0: Social Media and Exploitation	75
Case/Technology: Social Media and Web 2.0	75
5.3. Critical Theory about Technology beyond Marx: From Marcuse and Foucault to Feenberg and Winner	78
In Focus: Michel Foucault	83
Case/Technology: Surveillance: The Panopticon and Airport Security	84
Case/Technology: Biased Algorithms and Algorithms Not in the Interest of Consumers: Job Selection, Criminal Justice, and Online Stores	86
In Focus: Andrew Feenberg	87
In Focus: Langdon Winner	93
5.4. Feminist Thinking about Technology	95
Case/Technology: Design of Household Robots	96
In Focus: Donna Haraway	97
5.5. Critical Discussion	100
Review Questions	103
Discussion Questions	103
Recommended Reading	103
Key Terms	104
6. Pragmatism, Analytic Approaches, and Transcultural Philosophy	105
Case/Technology: Neonatal Care and Technology	105
6.1. Pragmatism	106
In Focus: John Dewey	107
6.2. Analytic Philosophy of Technology	112
Case/Technology: Money and Contemporary Financial Technologies (Cryptocurrencies and Blockchain)	114
John Searle's Social Ontology	116
6.3. Intercultural and Transcultural Philosophy of Technology?	117
In Focus: Gilbert Simondon	119

Case/Technology: Digital Communication Technologies and the Good Life	124
Review Questions	127
Discussion Questions	127
Recommended Reading	127
Key Terms	128

PART 3: *Thinking about Technology by Starting from Technology*

7. From Information Technologies to Philosophy and Ethics of Information	131
Case/Technology: Digital and Virtual Worlds, <i>The Matrix</i> , and Beyond	131
7.1. Introduction	132
In Focus: Norbert Wiener	132
7.2. All about Information: Floridi's Philosophy and Ethics of Information	133
Case/Technology: Fake News and the Internet	138
7.3. Critical Discussion	138
7.4. Conclusions for Philosophy of Technology	145
Review Questions	147
Discussion Questions	147
Recommended Reading	148
Key Terms	148
8. From Robotics and AI to Thinking about Moral Status and Human Relationships	149
Case/Technology: Self-Driving Cars	149
8.1. Introduction	150
8.2. Moral Machines? The Discussion about Moral Agency	151
Case/Technology: Biased Algorithms	151
8.3. The Discussion about Moral Patency	156
8.4. Changing the Question: Toward More Relational Thinking	161
In Focus: Emmanuel Levinas	164

8.5. The Debate about Sex Robots and Human Relationships:	
Feminist (or Egalitarian) Questions	166
Case/Technology: Sex Robots	166
8.6. Humans, Non-Humans, and the More-Than-Human	170
Review Questions	170
Discussion Questions	171
Recommended Reading	171
Key Terms	171
9. From Genetic Engineering and Cyborgs to Transhumanism and Posthumanism	172
Case/Technology: Gene Editing	172
9.1. Introduction	173
9.2. Transhumanism and Human Enhancement	176
9.3. Posthumanism and Cyborgs	180
In Focus: Donna Haraway	183
In Focus: Stelarc	184
In Focus: Bruno Latour	186
Review Questions	190
Discussion Questions	190
Recommended Reading	190
Key Terms	190
10. From Climate Change and Geoengineering to Questioning “Nature” and Thinking in and about the “Anthropocene”	191
Case/Technology: (Solar) Radiation Management as a Method of Geoengineering	191
10.1. Introduction: Earth, We Have a Problem	191
10.2. The Problem with “Nature”: Modern Versus Non-Modern Approaches	195
Case/Technology: Central Heating Versus Wood-Burning Stove	195
10.3. The Anthropocene: Some Philosophical Responses	199
Review Questions	205
Discussion Questions	206

Recommended Reading 206

Key Terms 206

PART 4: *Thinking about Technology by Going Beyond
Philosophy of Technology (Philosophy of Technology +)*

11. Philosophy of Technology and Other Philosophy: (Re)Connecting
with Other Philosophical Subdisciplines 209
- Case/Technology: Social Media and Its Effects
 on Our Lives 209
- 11.1. Introduction 210
- 11.2. Ethics and Moral Philosophy: Thinking about Virtue
 and Thinking about Technology 212
- 11.3. Philosophical Anthropology: Thinking about the Human
 and Thinking about Technology 216
- Case/Technology: Cochlear Implants 218
- 11.4. Philosophy of Language: Thinking about Language
 and Thinking about Technology 220
- In Focus: John Searle 221
- In Focus: Ludwig Wittgenstein 223
- 11.5. Other Subfields: Some Examples 226
- 11.6. Conclusions for Philosophers of Technology 228
- Review Questions 228
- Discussion Questions 229
- Recommended Reading 229
- Key Terms 229
12. Philosophy of Technology and Other Academic Disciplines:
Interdisciplinarity and Transdisciplinarity 230
- Case/Technology: Robotics and Interdisciplinarity 230
- 12.1. Introduction 231
- 12.2. Some Examples of Interdisciplinary and Transdisciplinary
 Work for Philosophers of Technology 234
- In Focus: Deborah Johnson 236
- Case/Technology: Humanoid Robots 237

In Focus: Wiebe Bijker	241
12.3. Challenges for Transdisciplinary Work	246
Review Questions	252
Discussion Questions	252
Recommended Reading	253
Key Terms	253
13. Philosophy of Technology and Practices beyond Academia	254
Case/Technology: “Killer Drones” and Activism	254
13.1. Beyond Academia: Innovation, Policy, and Art	255
In Focus: Jeroen van den Hoven	257
In Focus: Robert Frodeman	259
Case/Technology: Smartphones, Tablets, and Other Smart Devices	261
13.2. Some Directions and Recommendations Concerning the Future of Research in Philosophy of Technology and Its Potential Implications for Education	265
Review Questions	268
Discussion Questions	268
Key Terms	268
<i>References</i>	269
<i>Glossary</i>	290
<i>Index</i>	302
