1	Introduction	1
1.1	Setting the Scene	1
1.1.1	Climate Change in the Coastal Context	1
1.1.2	The Need for Coastal Adaptation	2
1.1.3	Adaptation in a Broader Sense	3
1.1.4	The Role of Law	3
1.2	Definitions	4
1.2.1	Climate and Climate Change	4
1.2.2	Climate Change Mitigation and Adaptation	5
1.2.3	Vulnerability and Resilience	5
1.2.4	Hazard, Risk and Hazard Risk	6
1.2.5	Coastal Zone	6
1.2.6	Coastal Hazards	7
1.3	On the Comparative Aspect	7
1.3.1	Reasons for Choosing Germany and New Zealand As Examples	7
1.3.1.1	Factual Similarities and Differences	7
1.3.1.2	Institutional Differences	8
1.3.2	Comparative Aspects of This Thesis	9
1.3.2.1	The Functional Method and the Presumption of Similarity	9
1.3.2.2	Comparison of Overall Concepts	10
1.4	Scope of the Thesis	11
1.4.1	Purpose of This Work	11
1.4.2	Limitations	11
	References	12
2	Scientific Background	15
2.1	Climate Change and Rising Sea Levels	15
2.1.1	Changing Climate	15

2.1.2	Global Mean Sea Level Rise	17
2.1.3	Tipping Points and Abrupt Changes	17
2.1.4	Different Types of Sea Level	18
	2.1.4.1 Overview	18
	2.1.4.2 Regional Sea Level Rise Projections for Germany and New Zealand	20
2.2	Consequences of Rising Sea Levels	20
	2.2.1 Coastal Flooding	21
	2.2.2 Coastal Erosion	22
	2.2.3 Coastal Squeeze and Other Impacts	22
	2.2.4 Need for Adaptation	23
	2.2.5 Predictions for Germany	23
	2.2.5.1 North Sea	23
	2.2.5.2 Baltic Sea	24
	2.2.6 Predictions for New Zealand	25
2.3	Examples of Past Coastal Hazard Events	26
	2.3.1 Storm Surge 1962 at the North Sea	26
	2.3.2 New Zealand Flood Events in February 2018	26
	2.3.3 A Worldwide Problem: The Example of Hurricane Katrina	27
2.4	Coastal Adaptation Strategies	27
2.5	Overview of Coastal Adaptation Actions	28
	2.5.1 Risk Assessment and Hazard Mapping	29
	2.5.2 Structural “Hard” Defences	29
	2.5.3 “Soft” Defences	31
	2.5.3.1 Dunes	31
	2.5.3.2 Sand Nourishment	32
	2.5.3.3 Buffer Zones	33
	2.5.4 Risk Avoidance	34
	2.5.5 Accommodation	35
	2.5.5.1 Flood-Resistant Design	35
	2.5.5.2 Insurance	35
	2.5.6 Retreat Strategies	36
	2.5.6.1 Managed Retreat	36
	2.5.6.2 Coastal Setbacks	38
2.6	General Challenges for Coastal Adaptation to Rising Sea Levels	38
	2.6.1 Complexity of Coastal Adaptation	38
	2.6.2 Long-Term Perspective	39
	2.6.3 Coping with Uncertainty	39
	2.6.4 Avoiding Maladaptation	40
2.7	Intersection with Other Areas and Demands	40
2.8	Impact on the State, Its Responsibilities and the Role of Law	41
	2.8.1 The State’s Role in Coastal Adaptation	41

2.8.2	Human Risk Perception	42
2.8.3	The Role of Law	43

3.8	Retreat Strategies: Existing Development	104
3.8.1	Managed Retreat	105
3.8.1.1	General	105
3.8.1.2	Implementation	106
3.8.1.3	Conflicting Property Rights	106
	3.8.1.3.1 Grandfathered Rights	107
	3.8.1.3.2 Expropriation	107
3.8.1.4	Positive Obligations	108
	3.8.1.4.1 Positive Obligations with Regards to Natural Hazards	108
	3.8.1.4.2 Limitations	109
3.8.1.5	Redevelopment of Settlements	110
3.8.1.6	Summary	111
3.8.2	Coastal Setbacks	111
3.8.2.1	Existing Setbacks	111
3.8.2.2	Setbacks as Multipurpose Instruments	112
3.9	Intersecting Legal Regimes	112
3.9.1	Nature Conservation	113
3.9.1.1	Protected Areas	114
3.9.1.2	Impact Regulation	115
3.9.1.3	Nature Conservation as a Parameter for Coastal Adaptation	116
3.9.1.4	Environmental Impact Assessment	117
3.9.1.5	Obligations to Protect Nature	117
	3.9.1.5.1 Obligation to Protect the Natural Foundations of Life Under the Basic Law	117
	3.9.1.5.2 Obligations Under the Federal Nature Conservation Act	118
3.9.2	Protection of Historic Monuments	119
3.10	State Liability	120
3.10.1	General	120
3.10.2	Liability for Breach of Official Duty (<i>Amtshaftungsanspruch</i>)	120
	3.10.2.1 General Requirements	120
	3.10.2.2 Individualized Groups of People as Third Parties and Land Use Plans	122
3.10.3	Intervention of Equivalent Effect to Expropriation (<i>Enteignungsgleicher Eingriff</i>)	123
3.10.4	Indirect Expropriation (<i>Enteignender Eingriff</i>)	123
3.10.5	Summary	124
3.11	Summary	124
3.12	Evaluation and Recommendations	125
3.12.1	Focus on Technical Flood Protection	126

3.12.1.1	Reliance on Technical Solutions	126
3.12.1.2	Coordination of Different Actors	129
3.12.1.3	Limits of Technical Solutions	130
3.12.1.3.1	Factual and Economical Limitations	130
3.12.1.3.2	Need for an Integrated Approach	130
3.12.2	Different Protection Standards for Different Areas? . . .	131
3.12.2.1	The Netherlands and the United Kingdom as Role Models?	132
3.12.2.2	Implementation Possibility in Germany	132
3.12.2.2.1	Equality Before the Law	133
3.12.2.2.2	Protection of Legitimate Expectation (<i>Vertrauensschutz</i>)	134
3.12.2.2.3	Suggested Criteria	135
3.12.3	Strengthening Adaptation in Planning Law	135
3.12.3.1	Spatial Planning	136
3.12.3.2	Land Use Planning	137
3.12.3.3	Relocatable Buildings	138
3.12.3.3.1	No Relocation Requirements in Land Use Plans	139
3.12.3.3.2	Temporary Building Permit	139
3.12.3.3.3	Relocatable Buildings on Shifting Islands	140
3.12.4	Managed Retreat Strategy	140
3.12.4.1	Status quo and the Necessity for Enabling Retreat Strategies	141
3.12.4.2	Decision on Managed Retreat	142
3.12.4.3	Suggested Criteria	143
3.12.4.4	Second Dikeline	144
3.12.4.5	Summary	144
3.12.5	No Voluntary Compensation	144
3.12.6	Recommended Changes for Planning and Decision-Making	145
3.12.6.1	Long-Term Focus	145
3.12.6.2	More Flexibility for Administrative Decisions	146
3.12.6.2.1	Coping with Uncertainties	146
3.12.6.2.2	Adaptable and Flexible Instruments	147
3.12.6.2.3	Examples	148
3.12.6.3	Fixed Plan Review Intervals	148
3.12.6.4	Summary	149
3.12.7	Climate Proofing	149

3.12.7.1	Definition and Purpose	150
3.12.7.2	Taking into Account Climate Change in Current Instruments	151
3.12.7.3	Procedural Aspects	151
3.12.7.4	Specialist Planning on Climate Change	152
3.12.7.5	'Stress Test'	153
3.12.8	Integrated Coastal Zone Management (ICZM)	154
3.12.9	More Uniformity Through Federal or EU Legislation	155
3.13	Chapter Conclusion	156
