Contents

1 Introduction 1
- 1.1 Sampled-Data Systems . . . 1
- 1.2 Approaches to SD Controller Design . . . 8
- 1.3 Notation . . . 10
- Exercises . . . 13
- Notes and References . . . 15

I Indirect Design Methods 17

2 Overview of Continuous-Time $\mathcal{H}_2$- and $\mathcal{H}_\infty$-Optimal Control 19
- 2.1 Norms for Signals and Systems . . . 19
- 2.2 $\mathcal{H}_2$-Optimal Control . . . 22
- 2.3 $\mathcal{H}_\infty$-Optimal Control . . . 29
- Notes and References . . . 32

3 Discretization 33
- 3.1 Step-Invariant Transformation . . . 33
- 3.2 Effect of Sampling . . . 39
- 3.3 Step-Invariant Transformation Continued . . . 44
- 3.4 Bilinear Transformation . . . 53
- 3.5 Discretization Error . . . 54
- Exercises . . . 59
- Notes and References . . . 64

4 Discrete-Time Systems: Basic Concepts 65
- 4.1 Time-Domain Models . . . 65
- 4.2 Frequency-Domain Models . . . 69
- 4.3 Norms . . . 72
- 4.4 Multivariable Systems . . . 78
- 4.5 Function Spaces . . . 83

4.6 Optimal Discretization of Analog Systems 88
Exercises 90
Notes and References 94

5 Discrete-Time Feedback Systems **95**
5.1 Connecting Subsystems 95
5.2 Observer-Based Controllers 97
5.3 Stabilization 103
5.4 All Stabilizing Controllers 106
5.5 Step Tracking 111
Exercises 115
Notes and References 120

6 Discrete-Time $\mathcal{H}_2$-Optimal Control **121**
6.1 The LQR Problem 121
6.2 Symplectic Pair and Generalized Eigenproblem 128
6.3 Symplectic Pair and Riccati Equation 131
6.4 State Feedback and Disturbance Feedforward 138
6.5 Output Feedback 143
6.6 $\mathcal{H}_2$-Optimal Step Tracking 152
6.7 Transfer Function Approach 160
Exercises 163
Notes and References 169

7 Introduction to Discrete-Time $\mathcal{H}_\infty$-Optimal Control **171**
7.1 Computing the $\mathcal{H}_\infty$-Norm 171
7.2 Discrete-Time $\mathcal{H}_\infty$-Optimization by Bilinear Transformation . 176
Exercises 180
Notes and References 181

8 Fast Discretization of SD Feedback Systems **183**
8.1 Lifting Discrete-Time Signals 183
8.2 Lifting Discrete-Time Systems 185
8.3 Fast Discretization of a SD System 186
8.4 Design Examples 193
8.5 Simulation of SD Systems 201
Exercises 203
Notes and References 205

II Direct SD Design **207**

9 Properties of S and H **209**
9.1 Review of Input-Output Stability of LTI Systems 209
9.2 M. Riesz Convexity Theorem 210
9.3 Boundedness of S and H 211
9.4 Performance Recovery 216
Exercises 219
Notes and References 220

10 Continuous Lifting **221**
10.1 Lifting Continuous-Time Signals 221
10.2 Lifting Open-Loop Systems 223
10.3 Lifting SD Feedback Systems 227
10.4 Adjoint Operators 229
10.5 The Norm of SG 232
10.6 The Norm of GH 237
10.7 Analysis of Sensor Noise Effect 239
Exercises 242
Notes and References 245

11 Stability and Tracking in SD Systems **247**
11.1 Internal Stability 247
11.2 Input-Output Stability 252
11.3 Robust Stability 258
11.4 Step Tracking 262
11.5 Digital Implementation and Step Tracking 267
11.6 Tracking Other Signals 271
Exercises 276
Notes and References 279

12 $\mathcal{H}_2$-Optimal SD Control **281**
12.1 A Simple $\mathcal{H}_2$ SD Problem 281
12.2 Generalized $\mathcal{H}_2$ Measure for Periodic Systems 291
12.3 Generalized $\mathcal{H}_2$ SD Problem 297
12.4 Examples 302
Exercises 307
Notes and References 307

13 $\mathcal{H}_\infty$-Optimal SD Control **309**
13.1 Frequency Response 310
13.2 $\mathcal{H}_\infty$-Norm in the Frequency Domain 313
13.3 $\mathcal{H}_\infty$-Norm Characterization 316
13.4 $\mathcal{H}_\infty$ Discretization of SD Systems 317
13.5 Computing the $\mathcal{L}_2[0, h)$-Induced Norm 320

13.6 Computing the Matrices in $G_{eq,d}$ 326
13.7 $\mathcal{H}_\infty$ SD Analysis 336
13.8 $\mathcal{H}_\infty$ SD Synthesis 341
Exercises 345
Notes and References 347

A State Models **349**

Bibliography **357**

Index **369**
