

Brief Contents

Preface	xiii
Features of This Text	xvii
Acknowledgments	xxi
About the Authors	xxiii
Reviewers	xxv

UNIT I **Background** **1**

Chapter 1	Understanding Motor Development: An Overview	2
Chapter 2	Models of Human Development	23
Chapter 3	Motor Development: Theoretical Models	46
Chapter 4	Selected Factors Related to Motor Development	63

UNIT II **Infancy** **85**

Chapter 5	Prenatal Factors Affecting Development	86
Chapter 6	Prenatal and Infant Growth	105
Chapter 7	Infant Reflexes and Rhythmical Stereotypies	116
Chapter 8	Rudimentary Movement Abilities	130
Chapter 9	Infant Perception	144

UNIT III **Childhood** **159**

Chapter 10	Childhood Growth and Development	160
Chapter 11	Development of Fundamental Movement: Manipulation Skills	176

Chapter 12	Development of Fundamental Movement: Locomotor Skills.....	219
Chapter 13	Physical Development of Children.....	248
Chapter 14	Perceptual Motor Development and Motor Skill Interventions.....	267
UNIT IV	Adolescence	299
Chapter 15	Adolescent Growth, Puberty, and Reproductive Maturity.....	300
Chapter 16	Specialized Movement Skills.....	315
Chapter 17	Fitness Changes During Adolescence.....	339
UNIT V	Adulthood	357
Chapter 18	Physiological and Psychosocial Development in Adults.....	358
Chapter 19	Motor Performance in Adults.....	383
Appendix		401
Glossary		405
Index		415

UNIT I Background **1**

Chapter 1 Understanding Motor Development: An Overview **2**

Life Span Study of the Developmental Process.....	4
History of Motor Development.....	5
Methods of Studying Development.....	7
Age Classifications of Development.....	9
Terminology Used in Motor Development.....	10
Growth and Development.....	11
Domains of Behavior.....	12
The Psychomotor Domain.....	12
Movement Forms.....	14
Classifying Movement Skills.....	15
One-Dimensional Schemes.....	15
Two-Dimensional Models.....	17
Multidimensional Schemes.....	19
Summary.....	20
Questions for Reflection.....	20
Critical Readings.....	21
References.....	21

Chapter 2 Models of Human Development **23**

Theoretical Models of Human Development.....	24
Conceptual Viewpoints of Development.....	26
Phase-Stage Theory.....	26
Developmental Task Theory.....	28
Developmental Milestone Theory.....	28
Ecological Theory.....	28
Behavior Setting Branch.....	31

Information Processing.....	34
Two Leading Theories of Human Development.....	35
Erik Erikson.....	35
Jean Piaget.....	39
Summary.....	43
Questions for Reflection.....	43
Critical Readings.....	43
References.....	44

Chapter 3 Motor Development: Theoretical Models **46**

Describing and Explaining Motor Development.....	47
The Phases of Motor Development.....	48
Reflexive Movement Phase.....	49
Rudimentary Movement Phase.....	50
Fundamental Movement Phase.....	51
Specialized Movement Phase.....	53
The Triangulated Hourglass: A Life Span Model.....	54
The Mountain of Motor Development.....	58
Summary.....	60
Questions for Reflection.....	60
Critical Readings.....	61
References.....	61

Chapter 4 Selected Factors Related to Motor Development **63**

Factors Within the Individual.....	64
Developmental Direction.....	64
Rate of Growth.....	65
Reciprocal Interweaving.....	65
Readiness.....	66
Critical and Sensitive Learning Periods.....	67
Individual Differences.....	68
Phylogeny and Ontogeny.....	68
Factors in the Environment.....	69
Bonding.....	69
Stimulation and Deprivation.....	69
Physical Task Factors.....	72
Prematurity.....	72

Eating Disorders	73
Obesity and Overweight.....	73
Fitness Levels.....	77
Biomechanics	78
Summary.....	80
Questions for Reflection.....	81
Critical Readings	81
References.....	81

UNIT II Infancy **85**

Chapter 5 Prenatal Factors Affecting Development 86

Nutritional and Chemical Factors.....	88
Prenatal Malnutrition.....	88
Common Maternal Drugs	89
“Necessary” Maternal Drugs	90
Alcohol and Tobacco.....	91
Hereditary Factors.....	93
Chromosome-Based Disorders	93
Gene-Based Disorders	94
Environmental Factors	96
Radiation	96
Chemical Pollutants.....	97
Medical Problems.....	97
Sexually Transmitted Diseases/Infections.....	97
Maternal Infections.....	98
Rh Incompatibility.....	99
Teenage Pregnancy.....	99
Toxoplasmosis.....	99
Prenatal Diagnosis and Treatment	100
Vigorous Activity During Pregnancy	101
Birth Process Factors.....	101
Birth Entry	102
Summary.....	103
Questions for Reflection.....	103
Critical Readings	103
References.....	103

Chapter 6 Prenatal and Infant Growth ... 105

Prenatal Growth.....	105
Zygotic Period (Conception–1st Week).....	106
Embryonic Period (Second Week to Second Month).....	106
Early Fetal Period (Third to Sixth Month)	107
Later Fetal Period (7th–9th Month).....	108

Infant Growth	110
Neonatal Period (Birth to 4 Weeks).....	110
Early Infancy (4 Weeks–1 Year)	111
Later Infancy (1–2 Years)	114
Summary.....	114
Questions for Reflection.....	115
Critical Readings	115
References.....	115

Chapter 7 Infant Reflexes and Rhythmical Stereotypies 116

Reflexive Behavior and Voluntary Movement.....	117
Diagnosing Central Nervous System Disorders.....	118
Primitive Reflexes.....	119
Moro and Startle Reflexes.....	119
Search and Sucking Reflexes.....	119
Hand-Mouth Reflexes.....	121
Palmar Grasping Reflex.....	121
Babinski and Plantar Grasping Reflexes	121
Asymmetrical and Symmetrical Tonic Neck Reflexes	122
Postural Reflexes	123
Labyrinthine and Optical Righting Reflexes	123
Pull-Up Reflex.....	123
Parachute and Propping Reflexes	123
Neck and Body Righting Reflexes	124
Crawling Reflex	124
Primary Stepping Reflex.....	125
Swimming Reflex	126
Rhythmical Stereotypies	126
Legs and Feet.....	126
Torso	127
Arms, Hands, and Fingers	127
Head and Face	127
Summary.....	127
Questions for Reflection.....	128
Critical Readings	128
References.....	128

Chapter 8 Rudimentary Movement Abilities 130

Study of Infant Motor Development	131
Stability.....	132
Control of the Head and the Neck	133
Control of the Trunk	133
Sitting	133
Standing	134

Locomotion..... 134
 Crawling.....134
 Creeping.....135
 Upright Gait.....136
 Manipulation.....137
 Reaching.....137
 Grasping.....137
 Releasing.....138
 Special Programs for Infants..... 139
 Infant Aquatic Programs 140
 Motor Assessment in Infancy 141
 Summary..... 141
 Questions for Reflection..... 142
 Critical Readings..... 142
 References..... 142

Chapter 9 Infant Perception 144

Methods of Studying Infant Perception 145
 Visual Perception147
 Contrast Sensitivity.....149
 Visual Acuity, Accommodation, and Peripheral Vision ...149
 Binocularity, Fixation, and Tracking 150
 Depth Perception 151
 Color Perception152
 Form Perception152
 Auditory, Olfactory, Gustatory, and
 Tactile Perception 153
 Summary..... 155
 Questions for Reflection..... 156
 Critical Readings..... 156
 References..... 156

UNIT III Childhood 159

Chapter 10 Childhood Growth and Development 160

Growth in Early Childhood..... 165
 Development in Early Childhood..... 165
 Physical and Motor Development
 Characteristics.....167
 Cognitive Development Characteristics167
 Affective Development Characteristics.....167
 Implications for the Developmental Movement
 Program167
 Growth in Later Childhood 168

Development in Later Childhood 169
 Physical and Motor Development
 Characteristics..... 169
 Cognitive Development Characteristics170
 Affective Development Characteristics170
 Implications for the Developmental Movement
 Program170
 Factors Affecting Child Growth
 and Development..... 171
 Nutrition 171
 Exercise and Injury172
 Illness and Climate173
 Secular Trends.....174
 Summary.....174
 Questions for Reflection.....174
 Critical Readings.....175
 References.....175

Chapter 11 Development of Fundamental Movement: Manipulation Skills 176

Importance of Fundamental Motor Skills 178
 Developmental Trajectory Model179
 Understanding the Development of FMS 180
 Sequences of Fundamental Motor Skill
 Development 181
 Dynamic Systems Theory and Stages of FMS 181
 Manipulative Skills 182
 Throwing.....182
 Catching195
 Kicking 201
 Punting.....205
 Striking.....207
 Rolling..... 211
 Summary..... 213
 Questions for Reflection..... 214
 Critical Readings..... 214
 References..... 214

Chapter 12 Development of Fundamental Movement: Locomotor Skills..... 219

Development of Locomotor Skills.....220
 Running 222
 Prerequisites to Running 222
 Proficient Runners 222

Development of Running..... 223
 Product Measures of Running..... 225
 Constraints in Running..... 225
 Galloping and Sliding 226
 Prerequisites to Galloping & Sliding..... 226
 Proficient Gallopers 226
 Development of Galloping 227
 Skipping 228
 Prerequisites to Skipping..... 228
 Proficient Skippers 229
 Development of Skipping 229
 Jumping..... 230
 Prerequisites to Jumping..... 231
 Proficient Jumpers 231
 Development of Horizontal Jumping..... 232
 Hopping..... 236
 Prerequisites to Hopping..... 236
 Proficient Hoppers 236
 Development of Hopping 237
 National Guidelines and Fundamental Motor Skills ... 240
 Standard 1 240
 Assessment of Fundamental Motor Skills..... 240
 Test of Gross Motor Development (TGMD) 243
 Movement Assessment Battery for Children 2 243
 Peabody Developmental Motor
 Scale–Second Edition (PDMS-2) 243
 Bruininks–Oseretsky Test of Motor
 Proficiency (BOTMP, BOT-2) 244
 Developmental Sequences 244
 Which Assessment? 244
 Summary..... 244
 Questions for Reflection..... 245
 Critical Readings 245
 References..... 245

**Chapter 13 Physical Development
 of Children 248**

Health-Related Fitness 249
 Cardiovascular or Aerobic Endurance..... 249
 Muscular Strength..... 251
 Muscular Endurance 252
 Joint Flexibility..... 253
 Body Composition 253
 Children’s Fitness Training..... 254
 Aerobic Training 254
 Strength Training..... 255
 Flexibility Training..... 256
 Health-Related Fitness and Movement Abilities 257

Performance-Related Fitness..... 258
 Coordination 260
 Balance 260
 Speed 261
 Agility..... 262
 Power 262
 Summary..... 263
 Questions for Reflection..... 263
 Critical Readings 264
 References..... 264

**Chapter 14 Perceptual Motor
 Development and Motor
 Skill Interventions 267**

Perceptual Development in Childhood 268
 Visual Acuity 269
 Figure-Ground Perception 271
 Depth Perception 271
 Visual-Motor Coordination..... 272
 Perceptual Training 273
 Perceptual-Motor Development in Children..... 273
 What Is “Perceptual-Motor”?..... 274
 The Perceptual-Motor Components..... 275
 Body Awareness..... 275
 Spatial Awareness 275
 Directional Awareness 276
 Temporal Awareness 277
 Perceptual-Motor Activities..... 278
 Intervening in the Motor Skills of Young Children 279
 Developmental Delays and Gender Differences
 in Fundamental Motor Skills 279
 Successful Kinesthetic Instruction for
 Preschoolers (SKIP) 281
 SKIP Program Content..... 284
 Motor Skill Intervention Research..... 285
 Theoretical Framework of Motor Skill Interventions... 286
 Region/Country of Studies 287
 Dose-Response: How Much Intervention Is Enough? ... 287
 Pedagogical Approaches to Motor Skill Intervention –
 Child-Centered vs. Teacher-Centered 288
 Different Types of Implementers of Motor
 Skill Instructions 289
 Fidelity of Implementation..... 289
 Providing Feedback to the Learner 290
 Effect Sizes: Measuring the Effectiveness of the
 Intervention..... 291
 Evidenced-based Principles for Motor Skill
 Interventions..... 292
 Implications for Professional Practice 293

Summary.....294
 Questions for Reflection.....294
 Critical Readings.....295
 References.....295

UNIT IV Adolescence 299

Chapter 15 Adolescent Growth, Puberty, and Reproductive Maturity300

Adolescent Growth 301
 Height..... 301
 Weight304
 Heart and Lungs.....305
 Puberty.....306
 Sequence of Puberty308
 Hormonal Influences.....308
 Reproductive Maturity..... 310
 Females..... 311
 Males..... 311
 Maturity Assessment.....312
 Summary..... 313
 Questions for Reflection..... 313
 Critical Readings..... 314
 References..... 314

Chapter 16 Specialized Movement Skills..... 315

Developmental Sequence of Specialized Movements.....317
 Transition Stage318
 Application Stage.....318
 Lifelong Utilization Stage.....318
 Youth Sports and Early Sport Specialization..... 319
 Fostering Improvement329
 Knowing the Learner..... 330
 Cues to Teaching a New Movement Skill330
 Levels and Stages of Movement Skill Learning.....330
 Fitts and Posner’s Three Stages of Skill Learning331
 Gentile’s Two Stages of Skill Learning.....331
 Combining Levels and Stages of Skill Learning..... 332
 Open Motor Skills and Improving “Thinking Time” 335
 Changing a Well-Learned Technique 336
 Summary.....336

Questions for Reflection..... 337
 Critical Readings..... 337
 References..... 337

Chapter 17 Fitness Changes During Adolescence339

Health-Related Fitness340
 Aerobic Endurance..... 342
 Muscular Strength and Endurance 343
 Flexibility..... 345
 Body Composition 346
 Performance-Related Fitness.....350
 Running Speed 352
 Jumping for Distance..... 352
 Throwing for Distance 354
 Balance 354
 Summary.....354
 Questions for Reflection..... 355
 Critical Readings..... 355
 References.....355

UNIT V Adulthood 357

Chapter 18 Physiological and Psychosocial Development in Adults.....358

Why Do We Age? 361
 Physiological Changes in the Adult
 Musculoskeletal System363
 Skeleton363
 Muscles and Joints366
 Central Nervous System.....368
 Circulatory and Respiratory Systems370
 Body Composition.....372
 Sensory Systems.....373
 Visual System..... 373
 Auditory System..... 374
 Proprioception 376
 Psychosocial Development376
 Psychological Factors..... 376
 Socialization Factors..... 377
 Successful Aging378
 Summary.....380
 Questions for Reflection.....380

Critical Readings380
References 381

**Chapter 19 Motor Performance
in Adults.....383**

Reaction Time.....384
Balance and Postural Control 387
Falls389
Gait.....392
Activities of Daily Living and Instrumental
Activities of Daily Living392

Automobile Driving393
Elite Performance394
Assessment.....396
Summary.....396
Questions for Reflection.....397
Critical Readings397
References.....397

Appendix..... 401
Glossary 405
Index.....415
