Contents

1 Introduction 1

2 Multiplier Hopf Algebras 5
- 2.1 Hopf Algebras 5
- 2.2 Multiplier Hopf Algebras 8
  - 2.2.1 Essential Algebras 8
  - 2.2.2 Algebraic Multiplier Algebras 9
  - 2.2.3 Multiplier Hopf Algebras 10
- 2.3 Integrals 12
  - 2.3.1 The Definition of Integrals 13
  - 2.3.2 The Dual Multiplier Hopf Algebra 14
- 2.4 The Drinfeld Double: Algebraic Level 18

3 Quantized Universal Enveloping Algebras 25
- 3.1 q-Calculus 25
- 3.2 The Definition of $U_q(\mathfrak{g})$ 27
  - 3.2.1 Semisimple Lie Algebras 27
  - 3.2.2 The Quantized Universal Enveloping Algebra Without Serre Relations 29
  - 3.2.3 The Serre Elements 35
  - 3.2.4 The Quantized Universal Enveloping Algebra 39
  - 3.2.5 The Restricted Integral Form 43
- 3.3 Verma Modules 55
  - 3.3.1 The Parameter Space $\mathfrak{h}_q^*$ 56
  - 3.3.2 Weight Modules and Highest Weight Modules 58
  - 3.3.3 The Definition of Verma Modules 59
- 3.4 Characters of $U_q(\mathfrak{g})$ 60
- 3.5 Finite Dimensional Representations of $U_q(\mathfrak{sl}(2, \mathbb{K}))$ 61
- 3.6 Finite Dimensional Representations of $U_q(\mathfrak{g})$ 65
  - 3.6.1 Rank-One Quantum Subgroups 65
  - 3.6.2 Finite Dimensional Modules 66

3.7 Braid Group Action and PBW Basis 69
3.7.1 The Case of $\mathfrak{sl}(2,\mathbb{K})$ 70
3.7.2 The Case of General $\mathfrak{g}$ 75
3.7.3 The Braid Group Action on $U_q(\mathfrak{g})$ 86
3.7.4 The Poincaré-Birkhoff-Witt Theorem 94
3.7.5 The Integral PBW-Basis 108
3.8 The Drinfeld Pairing and the Quantum Killing Form 110
3.8.1 Drinfeld Pairing 110
3.8.2 The Quantum Killing Form 115
3.8.3 Computation of the Drinfeld Pairing 119
3.8.4 Nondegeneracy of the Drinfeld Pairing 137
3.9 The Quantum Casimir Element and Simple Modules 137
3.9.1 Complete Reducibility 141
3.10 Quantized Algebras of Functions 142
3.11 The Universal R-Matrix 145
3.11.1 Universal R-Matrices 145
3.11.2 The R-Matrix for $U_q(\mathfrak{g})$ 147
3.12 The Locally Finite Part of $U_q(\mathfrak{g})$ 154
3.13 The Centre of $U_q(\mathfrak{g})$ and the Harish-Chandra Homomorphism 160
3.14 Noetherianity 168
3.14.1 Noetherian Algebras 168
3.14.2 Noetherianity of $U_q(\mathfrak{g})$ 172
3.14.3 Noetherianity of $\mathcal{O}(G_q)$ 173
3.14.4 Noetherianity of $FU_q(\mathfrak{g})$ 175
3.15 Canonical Bases 178
3.15.1 Crystal Bases 179
3.15.2 Global Bases 181
3.16 Separation of Variables 185
3.16.1 Based Modules 186
3.16.2 Further Preliminaries 188
3.16.3 Separation of Variables 191

4 Complex Semisimple Quantum Groups 195
4.1 Locally Compact Quantum Groups 195
4.1.1 Hopf C^*-Algebras 195
4.1.2 The Definition of Locally Compact Quantum Groups 196
4.2 Algebraic Quantum Groups 199
4.2.1 The Definition of Algebraic Quantum Groups 199
4.2.2 Algebraic Quantum Groups on the Hilbert Space Level 200
4.2.3 Compact Quantum Groups 204
4.2.4 The Drinfeld Double of Algebraic Quantum Groups 206
4.3 Compact Semisimple Quantum Groups 212
4.4 Complex Semisimple Quantum Groups 217
4.4.1 The Definition of Complex Quantum Groups 217
4.4.2 The Connected Component of the Identity 221

4.5 Polynomial Functions 223
4.6 The Quantized Universal Enveloping Algebra of a Complex Group 227
4.7 Parabolic Quantum Subgroups 232

5 Category $\mathcal{O}$ 235
5.1 The Definition of Category $\mathcal{O}$ 235
5.1.1 Category $\mathcal{O}$ Is Artinian 236
5.1.2 Duality 239
5.1.3 Dominant and Antidominant Weights 240
5.2 Submodules of Verma Modules 244
5.3 The Shapovalov Determinant 249
5.4 Jantzen Filtration and the BGG Theorem 255
5.5 The PRV Determinant 260
5.5.1 The Spaces $F\,\mathrm{Hom}(M, N)$ 260
5.5.2 Conditions for $F\,\mathrm{Hom}(M, N) = 0$ 263
5.5.3 Multiplicities in $F\,\mathrm{Hom}(M, N)$ 266
5.5.4 Hilbert-Poincaré Series for the Locally Finite Part of $U_q(\mathfrak{g})$ 269
5.5.5 The Quantum PRV Determinant 276
5.6 Annihilators of Verma Modules 283

6 Representation Theory of Complex Semisimple Quantum Groups 287
6.1 Verma Modules for $U_q^{\mathbb{R}}(\mathfrak{g})$ 288
6.1.1 Characters of $U_q^{\mathbb{R}}(\mathfrak{b})$ 288
6.1.2 Verma Modules for $U_q^{\mathbb{R}}(\mathfrak{g})$ 289
6.2 Representations of G_q 294
6.2.1 Harish-Chandra Modules 294
6.2.2 Unitary G_q-Representations 295
6.3 Action of $U_q^{\mathbb{R}}(\mathfrak{g})$ on K_q-Types 297
6.4 Principal Series Representations 301
6.4.1 The Definition of Principal Series Representations 301
6.4.2 Compact Versus Noncompact Pictures 303
6.4.3 The Action of the Centre on the Principal Series 306
6.4.4 Duality for Principal Series Modules 307
6.4.5 Relation Between Principal Series Modules and Verma Modules 309
6.5 An Equivalence of Categories 314
6.6 Irreducible Harish-Chandra Modules 324
6.7 The Principal Series for $SL_q(2, \mathbb{C})$ 331
6.8 Intertwining Operators in Higher Rank 335
6.8.1 Intertwiners in the Compact Picture 335
6.8.2 Intertwiners Associated to Simple Roots 337
6.8.3 Explicit Formulas for Intertwiners 342

6.9 Submodules and Quotient Modules of the Principal Series 350
6.10 Unitary Representations 353

List of Symbols and Conventions 357
