Experiments as Building Blocks of Knowledge	1
Gorazd Planinšič	
Active Learning Methods and Strategies to Improve Student Conceptual Understanding: Some Considerations from Physics Education Research	15
Claudio Fazio	
Dialogue on Primary, Secondary and University Pre-service Teacher Education in Physics	37
Marisa Michelini	
Primary, Secondary and University Pre-service Physics Teacher Education—What Scientific Education Is Relevant for Becoming a Physics Teacher in a Technological World?	53
Knut Neumann	
Concerns About Relevant Physics Education in a Technological World: An Overview of GIREP Participants' Questions	63
María Gabriela Lorenzo	
Critiquing Explanations in Physics: Obstacles and Pedagogical Decisions Among Beginning Teachers	71
Laurence Viennot and Nicolas Décamp	
Didactical Reconstructions in Knowledge Organization and Consolidation in Physics Teacher Education	79
Terhi Mäntylä	
Examining Students Reasoning in Physics Through the Lens of the Dual Process Theories of Reasoning: The Context of Forces and Newton's Laws	91
Mila Kryjevskaja and Nathaniel Grosz	

Design Tools as a Way to Explicitly Connect Research Insights with Design Decision for Teaching Learning Sequences	109
Jenaro Guisasola, Kristina Zuza, Jaime Ametller, and Paulo Sarriugarte	
Results of a Design-Based-Research Study to Improve Students' Understanding of Simple Electric Circuits	119
Jan-Philipp Burde and Thomas Wilhelm	
Teaching Particle-Wave Duality with Double-Slit Single-Photon Interference in Dutch Secondary Schools	135
Ed van den Berg, Aernout van Rossum, Jeroen Grijsen, Henk Pol, and Jan van der Veen	
Eye-Movement Study of Mechanics Problem Solving Using Multimodal Options	145
Jouni Viiri, Jarkko Kilpeläinen, Martina Kekule, Eizo Ohno, and Jarkko Hautala	
Derivatives, Integrals and Vectors in Introductory Mechanics: The Development of a Multi-representation Test for University Students	155
Marta Carli, Stefania Lippiello, Ornella Pantano, Mario Perona, and Giuseppe Tormen	
Research-Based Innovation in Introductory Physics Course for Biotechnology Students	169
Daniele Buongiorno and Marisa Michelini	
Investigating the Interplay of Practical Work and Visual Representations on Students' Misconceptions: The Case of Seasons . . .	183
Silvia Galano, Francesca Monti, Giacomo Bozzo, Claudia Daffara, and Italo Testa	
Using Theory to Inform Practice in the Advanced Physics Classroom	197
Ramon E. Lopez, Michael A. Greene, and Ximena Cid	
Development of Preservice Teachers' Sense of Agency	209
Michael M. Hull and Haruko Uematsu	
Is Participation in Public Engagement an Integral Part of Shaping Physics Students' Identity?	225
Claudia Fracchiolla, Brean Prefontaine, Manuel Vasquez, and Kathleen Hinko	
Enhancing the Teaching and Learning of Physics at Lower Second Level in Ireland	239
Deirdre O'Neill and Eilish McLoughlin
