List of Tables	xi
<b>Part I</b> Some Preliminary Issues	1
1. A Preamble	1
2. The Process of Technological Change	8
2.1 Introduction	8
2.2 The Basic Type	10
2.3 Patents and Research and Development Expenditure	12
2.4 The Impacts of Technological Change	14
2.5 Conclusion	15
3. Some Welfare Economics	16
3.1 Introduction	16
3.2 The Pareto Criterion and Market Equilibrium	17
3.3 Distortions and Imperfections	21
3.4 Conclusions	24
4. Some Aspects of the Relation between Technological Change and Economic Performance	26
4.1 Introduction	26
4.2 First-generation Studies	27
4.3 Second-generation Studies	28
4.4 International Trading Performance	32
4.5 Private vs. Social Rates of Return	33
4.6 Conclusions	33
5. Patterns of Government Intervention	36
5.1 Introduction	36
5.2 Towards Some Taxonomies	36
5.3 Government Expenditure on Research and Development	39
5.4 Diffusion-orientated Policies	43
5.5 Conclusions	45
<b>Part II</b> Modelling Technological Policy in a Unified Theoretical Framework	47
6. Diffusion: The Demand Side	51
6.1 The Theory and Empirics of Diffusion Studies	51

6.2	Some Analytical Approaches	53
6.2.1	Information-based models	53
6.2.2	Differences-based models	57
6.2.3	Game-theoretic approaches	60
6.2.4	Preliminary conclusions	62
6.2.5	Intra-firm diffusion	62
6.3	Conclusions	64
7.	Diffusion: Supply and Demand	67
7.1	Introduction	67
7.2	A Differences-based Model with Learning	68
7.3	A Game-theoretic Approach	75
7.4	The Open Economy	76
7.5	Conclusions	78
8.	Diffusion and R. & D.: An Integration	80
8.1	Introduction	80
8.2	Research and Development	80
8.3	Attempting Integration	84
8.3.1	Diffusion	85
8.3.2	Research, development, and diffusion	88
8.3.3	Industry equilibrium	90
8.3.4	Some comments on welfare	93
8.4	Implications	94
<b>Part III</b>	<b>Topics in the Economics of Technology Policy</b>	<b>99</b>
9.	Patents, Optimal Patents, and Research	102
9.1	Introduction	102
9.2	Intertemporal Discrimination	107
9.3	The Common-pool Problem	108
9.4	Secrecy	109
9.5	Licensing	111
9.6	Pre-emptive Patents	113
9.7	Some Empirical Observations	114
9.8	Conclusions	115
10.	Risk, Uncertainty, Insurance, and Finance for Innovation	117
10.1	Attitudes to Risk	117
10.2	Financial Risk	119
10.3	Some Empirical Observations	121
10.4	Conclusions	122

11. Standards and Compatibility	126
11.1 Introduction	126
11.2 The Costs and Benefits of Standardization	126
11.3 A Static Approach	127
11.4 The Dynamic Story	129
11.5 Conclusions	131
12. Some Aspects of the International Dimension	133
12.1 Introduction	133
12.2 Industrial Policy in an Open Economy	133
12.3 A Dynamic Approach	135
12.3.1 Static vs. dynamic efficiency	135
12.3.2 Market performance	140
12.3.3 Policy intervention	141
12.4 Trade under Imperfect Competition	142
12.5 International Technology Transfer	145
12.6 Multinational Companies	149
12.7 Conclusions	150
13. Technological Change and the Defence Sector	152
13.1 Introduction	152
13.2 The Determinants of Defence Expenditures	154
13.3 The Determination of Military R. & D.	157
13.4 Intramural vs. Extramural R. & D.	161
13.5 The Contract Decision	164
13.5.1 Contract forms	165
13.5.2 Short- vs. long-term contracts	168
13.5.3 Choice of contractor (source selection)	170
13.6 Military Technology and the Civilian Economy	172
13.7 Conclusions	176
14. Output, Employment, Technology, and Technology Policy	178
14.1 Introduction	178
14.2 A Basic Model	179
14.2.1 Preliminaries	179
14.2.2 The modelling framework	180
14.2.3 The path of employment, disregarding exit	181
14.2.4 The employment path with exit	189
14.2.5 The employment path with entry	192
14.3 Remarks	192
14.4 The Open Economy	194

14.5	Product Innovation	197
14.6	Conclusions	198
15.	Some Conclusions in the Light of Experience of Past Government Intervention in the Technological Change Process	201
15.1	Introduction	201
15.2	Tax-based Incentives to R. & D.	201
15.3	Government Support for Civilian Technological Development: Success or Failure	203
15.4	Some Conclusions Based on Theory	206
15.5	Technology Policy in the UK: A Personal View	208
	INDEX	221
