Author Contributions . . . . .	xv
<b>1 Introduction</b>	<b>1</b>
1.1 The ontological status of morphemes . . . . .	1
1.2 Morphological and syntactic processing . . . . .	4
1.3 Measurements and timing of morphological processing . . . . .	6
1.4 Motivations . . . . .	8
1.5 Overview of the thesis . . . . .	10
<b>2 Storage or decomposition in Dutch morphological processing</b>	<b>13</b>
2.1 Introduction . . . . .	13
2.2 Models of morphological processing . . . . .	15
2.2.1 Single-mechanism connectionist model . . . . .	15
2.2.2 Dual-mechanism models . . . . .	17
2.2.3 The Parallel Race Model . . . . .	20
2.3 Empirical Evidence . . . . .	21
2.4 On the need for a neuropsychological approach: The syntactic mismatch negativity response . . . . .	26
2.5 Discussion . . . . .	31
<b>3 Constituent-based storage plural Dutch nouns: An EEG study</b>	<b>33</b>
3.1 Introduction . . . . .	33
3.1.1 Dutch plural inflection . . . . .	34
3.1.2 Methodological challenges . . . . .	36
3.1.3 Event-related potentials and the mismatch negativity . . . . .	37
3.2 The present study . . . . .	39
3.3 Methods . . . . .	41
3.3.1 Participants . . . . .	41
3.3.2 Materials . . . . .	41

3.3.3	Procedure	44
3.3.4	EEG recording	45
3.3.5	EEG data analysis	45
3.3.6	Statistical analysis	46
3.4	Results	49
3.4.1	Lexical MMN on high-frequency singular noun <i>wapen</i>	50
3.4.2	Lexical MMN on low-frequency singular noun <i>baken</i>	54
3.4.3	Syntactic MMN on high-frequency plural noun <i>boeken</i>	57
3.4.4	Syntactic MMN on low-frequency plural noun <i>doeken</i>	59
3.4.5	Frequency effect on singular and plural	62
3.4.6	Frequency effect on plural nouns	64
3.5	Conclusion	67
<b>4</b>	<b>MMN responses to the Dutch past tense and one derived noun</b>	<b>73</b>
4.1	Introduction	73
4.2	The study of storage and decomposition	75
4.3	Morphological processing: empirical results and the case of Dutch	77
4.3.1	Variables and experimental paradigms	77
4.3.2	The case of Dutch	78
4.3.3	Limitations of previous results and the need for neuro-physiological evidence	80
4.4	The present study	81
4.5	Methods	84
4.5.1	Participants	84
4.5.2	Materials	84
4.5.3	Procedure	86
4.5.4	EEG recording and processing	87
4.6	Analysis	88
4.7	Results	91
4.7.1	MMN on monomorphemic Dutch nouns	91
4.7.2	MMN on past tense verbs	96
4.7.3	MMN on the derived noun	102
4.8	Conclusions	107
<b>5</b>	<b>Early processing of Dutch gender and number agreement: cognitive mechanisms probed by the MMN response</b>	<b>113</b>
5.1	Introduction	113
5.2	Previous findings	116
5.3	The present study	118
5.4	Methods	119
5.4.1	Participants	119
5.4.2	Materials	120
5.4.3	EEG recording and processing	122

5.5	Analysis . . . . .	124
5.6	Results . . . . .	129
5.6.1	Gender agreement . . . . .	129
5.6.2	Number agreement . . . . .	131
5.6.3	Second MMN peak . . . . .	134
5.7	Conclusions . . . . .	135
<b>6</b>	<b>Conclusion</b> . . . . .	<b>139</b>
6.1	Summary of the research . . . . .	139
6.2	Summary of results . . . . .	140
6.2.1	Lexical MMN on monomorphemic words . . . . .	141
6.2.2	Plural nouns . . . . .	142
6.2.3	Past tense verbs . . . . .	142
6.2.4	Derived noun <i>zwaarte</i> . . . . .	143
6.2.5	Syntactic agreement . . . . .	144
6.2.6	Frequency effect . . . . .	145
6.2.7	Cognitive mechanism of the sMMN . . . . .	145
6.2.8	Secondary research questions . . . . .	146
6.3	Conclusion . . . . .	148
6.4	Ideas for future research . . . . .	150
