## AUTHOR'S NOTE

I have tried to ensure that this book is as accurate as possible, but some of the entries are incomplete, there are bound to be some errors and there are artists omitted who should be in here. A book of this type is never really finished! I'd like to hear from anyone who is able to supply information that is missing in my book, correct errors or add additional entries. Who knows? If enough of you buy it there may be a second volume! If you can do any of these please contact me care of:
