

TABLE OF CONTENTS

INTRODUCTION TO THE SERIES	v
FOREWORD	vii
LIST OF TABLES	xiv
CHAPTER 1. INTRODUCTION	1
1.1. The empirical analysis of protection	1
1.2. The Australian economy and the evolution of protection	2
1.3. Tariff setting criteria in Australia	3
1.4. The justification of protection in Australia	4
1.5. Summary and conclusions of the study	5
CHAPTER 2. AN OUTLINE OF THE MODEL OF TRADE AND PROTECTION	8
2.1. Introduction	8
2.2. A simple classical model	8
2.3. Intermediate inputs and non-competitive imports	16
2.4. Indirect taxes on inputs and outputs	18
2.5. Capacity constraints on production	20
2.6. Summary of the static formulation of the model	23
2.7. Investment	26
2.8. Transport costs, variable terms of trade, import and export of capital	33
2.9. The introduction of non-traded goods	38
2.10. Technical change	44
2.11. Variable proportions in consumption	45
2.12. Skilled labour requirements	45
2.13. Some reflections on the model	46
CHAPTER 3. FACTOR PRICES AND EFFECTIVE PROTECTION: A THEORETICAL DIGRESSION	48
3.1. Introduction	48
3.2. Tariffs and factor prices	48
3.3. Measuring the effects of protection	51
CHAPTER 4. THE EMPIRICAL IMPLEMENTATION OF THE MODEL	54
4.1. Introduction	54
4.2. The objective function and public consumption	56
4.3. The commodity balance constraints	58
4.4. The labour supply constraints	65

4.5. The tariff and indirect tax constraints	66
4.6. The foreign exchange constraint	68
4.7. The capacity constraints	71
4.8. Optional minimum growth constraints	72
4.9. Export demand functions	73
4.10. Wholesale and retail stock balance	74
4.11. Specification of the 'free trade' and 'uniform tariff' alternatives	74
4.12. The iterative solution of the model	77
4.13. Summary of important parameter estimates	78
4.14. Summary of the complete model	78
CHAPTER 5. THE TARIFF SOLUTION AND THE FREE TRADE ALTERNATIVE	84
5.1. Introduction	84
5.2. Measuring the effects of free trade	84
5.3. The macro economics of the tariff and free trade alternatives	87
5.4. The tariff solution and the effects of the FT alternative on resource allocation	94
5.5. Conclusions	99
CHAPTER 6. THE UNIFORM TARIFF ALTERNATIVE	100
6.1. Introduction	100
6.2. The macro economics of the UT alternative	100
6.3. The resource pull of the UT alternative	106
6.4. Conclusions	108
CHAPTER 7. OTHER IMPLICATIONS OF ALTERNATIVE TARIFF POLICIES	109
7.1. Introduction	109
7.2. Welfare effects of the alternative tariff reforms	109
7.3. Income distribution and the tariff	112
7.4. Foreign investment	119
7.5. Growth and 'permanent' infant industries	123
7.6. Manufactured exports	124
7.7. Conclusions	128
CHAPTER 8. ON GENERAL AND PARTIAL EQUILIBRIUM MEASURES OF THE EFFECTS OF PROTECTION	129
8.1. Introduction	129
8.2. The general equilibrium measure of effective protection	129
8.3. The partial equilibrium model	136
8.4. Comparison of the general and partial equilibrium predictions	139
8.5. Conclusions	140
CHAPTER 9. AN ASSESSMENT OF THE MODEL	142
9.1. Introduction	142
→ 9.2. How 'general' is the general equilibrium model?	143
9.3. Data	144
9.4. Sensitivity tests	147
9.5. Conclusions	150

CHAPTER 10. SOME CONCLUDING REMARKS	151
10.1. Introduction	151
10.2. The results summarized	151
10.3. Comparative advantage	153
10.4. Policy implications	153
10.5. Application of the model to other economics and economic systems	154
APPENDICES	156
1. The 1958/9 input/output tables	156
2. Depreciation, capital, and inventory coefficients	164
3. Labour coefficients and technical change	178
4. Capacity utilization	183
5. Projections, labour force, and capital inflows	187
6. Specification of market behaviour for processed food exports	188
7. Aggregation and the measurement of the tariff	193
8. The modified golden rule for investment	197
9. The linear expenditure function	203
BIBLIOGRAPHY	207
INDEX	213
