Contents

Preface *xi*
Acknowledgments *xv*
The Names "ASCC" and "Mark I" *xix*

1
Introduction to a Pioneer *1*

2
Early Life and Education *9*

3
A Harvard Graduate Student *21*

4
First Steps Toward a New Type of Calculating Machine *33*

5
An Unsuccessful Attempt to Get the Machine Built *39*

6
Seeking Support from IBM *45*

7
The Proposal for an Automatic Calculating Machine *53*

8
Aiken's Background in Computing and Knowledge of Babbage's Machines 61

9
Planning and Beginning the Construction of the Machine 73

10
How to Perform Multiplication and Division by Machine 87

11
Construction of the Machine 95

12
Installing the ASCC/Mark I in Cambridge and Transferring It to the Navy 109

13
Aiken at the Naval Mine Warfare School 115

14
The Dedication 121

15
The Aftermath 131

16
Some Features of Mark I 147

17
Programming and Staffing, Wartime Operation, and the Implosion Computations 159

18
The Mystery of the Number 23 169

19
Tables of Bessel Functions 177

20
Aiken's Harvard Program in Computer Science 185

21
Later Relations between Aiken and IBM 197

22
Aiken at Harvard, 1945–1961 201

23
Life in the Comp Lab 215

24
Retirement from Harvard 227

25
Businessman and Consultant 231

26
A Summing Up 237

Appendixes

A *The Harvard News Release* 249

B *Aiken's Talk at the Dedication* 253

C *Aiken's Memorandum Describing the Harvard Computation Laboratory* 263

D *The Stored Program and the Binary Number System* 269

E *Aiken's Three Later Machines* 275

F *How Many Computers Are Needed?* 283

G *The NSF Computer Tree* 295

H Who Invented the Computer? Was Mark I a Computer? 297

I The Harvard Computation Laboratory during the 1950s 305
