

CONTENTS

Series Editor Introduction	ix
Acknowledgments	xi
About the Author	xii
Chapter 1: Introduction	1
A. Limitations of Traditional Approaches	4
B. Long-Range Dependencies	7
C. The Search for Complexity	9
D. Plan of the Book	12
Chapter 2: Autoregressive Fractionally Integrated Moving Average or Fractional Differencing	15
A. Basic Results in Time Series Analysis	15
<i>Seasonal Patterns</i>	18
<i>Integration</i>	19
<i>Testing for Stationarity</i>	21
B. Long-Range Dependencies	22
C. Application of the Models to Real Data	24
<i>Competitive Modeling Strategies</i>	30
<i>Differencing Detrended Data</i>	37
<i>Analyzing the Residuals</i>	38
<i>Interpretation of the Differencing Parameter</i>	39
<i>The Hurst Exponent</i>	40
D. Chapter Summary and Reflection	41
Chapter 3: Power Spectral Density Analysis	43
A. From the Time Domain to the Frequency Domain	44
<i>Amplitudes and Relative Frequencies</i>	44
<i>The Fourier Transform</i>	46
<i>Periodograms</i>	49
<i>Power Spectral Density</i>	50
B. Spectral Density in Real Data	52

C. Fractional Estimates of Gaussian Noise and Brownian Motion	55
D. Chapter Summary and Reflection	57
Chapter 4: Related Methods in the Time and Frequency Domains	59
A. Estimating Fractal Variance	59
<i>Detrended Fluctuation Analysis</i>	60
<i>Rescaled Range Analysis</i>	63
<i>Higuchi's Fractal Dimension</i>	65
<i>Related Approaches</i>	69
B. Spectral Regression	69
C. The Hurst Exponent Revisited	73
D. Chapter Summary and Reflection	74
Chapter 5: Variations on the Fractality Theme	77
A. Sensitive Dependence on Initial Conditions	78
B. The Multivariate Case	78
C. Regular Long-Range Processes and Nested Regularity	80
D. The Impact of Interventions	81
Chapter 6: Conclusion	85
A. Benefits and Drawbacks of Fractal Analysis	86
B. Interpretation of Parameters in Terms of Complexity Theory	89
C. A Note About the Software and Its Use	90
References	93
Appendix	101
Index	103
