<i>Preface</i>	v
<i>About the Authors</i>	xi
<i>Acknowledgements</i>	xv
<b>Part 1 Questioning AI</b>	<b>1</b>
1. Setting Terms	3
2. More Terms	5
3. Questioning Terms, and a Provisional Concept of Intelligence	9
4. Elaborating Terms	15
5. Methods and Approaches	21
6. Methods and Field	27
7. Discerning the Intelligent Agent	33
8. Realising the Intelligent Agent	41
9. Recognising the Intelligent Agent	47
10. The Intelligent Agent in the Prospect	55
11. Devolving Evolution	63
12. Evolution as a Creativity Engine	69
13. Evolution and Articles of Faith	77

14. On Evolution: Ungrounded Hardwired Knowledge Short Circuits Intelligence	87
15. On Evolution: Intelligence Short Circuits Ungrounded Hardwired Knowledge	97
16. Reflections on the Artificial in AI	103
17. Parameters of the Artificial in AI	107
18. Limits of the Artificial in AI	113
19. Restrictions on AI Research	119
20. Expectations of AI Research	127
<b>Part 2 AI and Government Policy</b>	<b>133</b>
21. Policy and Legal Autonomy	137
22. Autonomy and Grounding Responsibility	147
23. Legal Autonomy: Rights and Responsibilities	153
24. Autonomy: Limiting and Conferring Rights	161
25. Note on Rights and Data Matters	169
26. Note on Qualia and Using Data	177
27. Doubting Qualia and Social Data	187
28. Data Users and Data Doubters	197
29. Data Distinctions and Data Nations	205
30. Data Doubters and Data Owners	217
31. Populism, Jobs and Policy Futures	225
32. Jobs, Futures and AI Engineers	235
<i>Bibliography</i>	249
<i>Appendices</i>	261
<i>Index</i>	277
