CONTENTS

Series Editor's Introduction 7

Acknowledgments 9

1. Linear Regression 11

Hypothesized Relationships 11
A Numerical Example 12
Estimating a Linear Relationship 17
Least Squares Regression 19
Examples 22
The Linear Correlation Coefficient 23
The Coefficient of Determination 26
Regression and Correlation 28

2. Multiple Linear Regression 29

Estimating Regression Coefficients 29
Standardized Coefficients 31
Associated Statistics 32
Examples 34

3. Hypothesis Testing 36

Introduction 36
The Testing Procedure 40
The Standard Error of the Estimated Coefficient 41
The Student's t Distribution 43
Forming Test Values 44
The Role of Standard Error and Sample Size 45
Changing the Level of Significance 46
t Ratio 46
Left-Tail Tests 47
Two-Tail Tests 48
Confidence Intervals 49
F Statistic 51
What Tests of Significance Can and Cannot Do 53

4. Extensions to the Multiple Regression Model 53

Types of Data 54
Dummy Variables 56
Interaction Variables 58
Transformations 59
Prediction 62
Examples 63

5. Problems and Issues of Linear Regression 65

Specification 67
Proxy Variables and Measurement Error 70
Selection Bias 71
Multicollinearity 71
Autocorrelation 72
Heteroskedasticity 75
Simultaneous Equations 77
Limited Dependent Variables 79
Conclusions 80

Appendix A: Derivation of a and b 81

Appendix B: Critical Values for Student's t Distribution 82

Appendix C: Regression Output from SAS and SPSS 83

Appendix D: Suggested Textbooks 87

Notes 88
