Preface by Werner Fricke	9
Foreword	13
Introduction	17
Part I: Participation in organizational changes	31
Chapter 1	
An example of tensions and dilemmas in organizational action research 'On the infinitely large in the infinitely small' in Team Product Support.	32
What and why	32
1. Tensions between participation as involvement and/ or as co-determination	34
2. Tensions, positionings and the exercising of power	40
3. Experimental change of communication patterns in Team Product Support	43
4. Tensions between the smaller project context and larger organizational, societal and global agendas	47
5. Tensions in the management of organizational difference through dissensus	54
Reflections	61
Chapter 2	
A historical view of employee participation: four understandings	64
What and why	64
1. Participation in working life: a mixed bag	65
2. Participation as industrial democracy	69
3. Two phases of participation as individualized involvement	70
4. Participation as autonomy	80
5. Some conclusions	81
Reflections	81

Part II: An empathetic-critical view of participation in organizational action research in the twentieth century—From self-managing groups to co-generation of practical and theoretical change?	83
Chapter 3	
Change-oriented social science: Early organizational action research in the USA in the 1940s.	84
What and why	84
1. Aims and perspectives.	85
2. The Harwood studies: Action research at Harwood	86
3. The Harwood Experiments.	89
4. Discussion of Lewin's view of participation	93
5. Discussion of Lewin's theory of change.	101
6. Lewin's view of action research: A philosophy of science perspective.	103
7. Some conclusions.	107
Reflections	108
Chapter 4	
The origin of socio-technical systems thinking—Studies at British coal mines in the 1950s.	110
What and why	110
1. Introduction and aims.	111
2. The Tavistock group's experiences before, during and after the Second World War	114
3. Initial studies at the Haighmoor mine	118
4. Follow-up studies in the Durham collieries	129
5. The new paradigm	137
6. Socially engaged accompanying research: between research 'on' and research 'with'	146
7. Conclusion	151
Reflections	152
Chapter 5	
Industrial democracy: Experiments in Norway in the 1960s	154
What and why	154
1. Introduction.	155
2. Background: the democratic endeavour.	157
3. Analysis of two field studies.	163
4. A democratic paradox?	174
5. Discussion of NIDP as applied research.	182
6. Conclusions	184
Reflections	186

Chapter 6	
Democratic dialogues—Dialogue conferences in Norway and Sweden in the 1980s.	188
What and why	188
1. Background	189
2. Aims and structure	193
3. The organization of democratic dialogic development processes	195
4. An example of democratic dialogue.	199
5. Participation in the practical dimension of the research process: deliberation and decision.	207
6. Deliberative democracy and democratic dialogues in organizations.	210
7. Participation and exclusion	218
8. Exclusion of research from democratic dialogues?	226
9. Conclusions	231
Reflections	234
Chapter 7	
Pragmatic action research—Projects in Spanish cooperatives in the latter half of the 1980s	238
What and why	238
1. Background	239
2. Aims and perspectives.	241
3. A characterization of pragmatic action research.	243
4. Organization of participatory action research in Fagor	251
5. Pragmatic action research as co-generative research	259
6. Is pragmatic action research a participatory, conventional, applied and/or phronetic science?	271
7. Conclusions	276
Reflections	278
Chapter 8	
Participation, past and future.	280
1. Introduction	280
2. Differences and similarities between change-oriented social science, STS, NIDP, democratic dialogues and pragmatic action research.	280
3. Action researchers' exercising of power as silent discourse.	288
4. Participation in the future?	290
5. A child of the Enlightenment?	304
Bibliography	307
Index.	327
