About the Author.....	iv	Fracture Profiles of Alloy 356.0 (AlSi7Mg), Refined, Modified, T6, Permanent Mold Casting.....	58
Preface.....	v	Fracture Surfaces of Alloy 356.0 (AlSi7Mg), Refined, Modified, Permanent Mold Casting, Fracture after Static Tensile Test.....	61
<b>Chapter 1 Introduction to Aluminum-Silicon Casting Alloys.....</b>	<b>1</b>	Fracture Surfaces of Alloy 356.0 (AlSi7Mg), Refined, Modified, Permanent Mold Casting, Fracture after V-Notch Impact Test at 21°C (70 °F).....	67
1.1 Properties of $\alpha$ -Aluminum Solid Solution.....	1	Fracture Surfaces of Alloy 356.0 (AlSi7Mg), Refined, Modified, Permanent Mold Casting, Fracture after V-Notch Impact Test at -160 °C (-256 °F).....	69
1.2 Properties of Silicon Crystals.....	3	Fracture Surfaces of Alloy 356.0 (AlSi7Mg), Refined, Modified, Permanent Mold Casting, T6, Fracture after Static Tensile Test.....	73
1.3 Properties of Aluminum-Silicon Alloys.....	5	Fracture Surfaces of Alloy 356.0 (AlSi7Mg), Refined, Modified, Permanent Mold Casting, T6, Fracture after V-Notch Impact Test, at 21 °C (70 °F).....	76
1.4 Effects of Different Levels of Silicon Contents.....	8	<b>Chapter 7 Alloy 359.0 (AlSi9Mg).....</b>	<b>79</b>
<b>Chapter 2 Fractography.....</b>	<b>11</b>	Composition and Properties.....	79
2.1 Methods of Fracture Investigation.....	11	Microstructures.....	79
2.2 Qualitative Fractography.....	12	Fracture Profiles of Alloy 359.0 (AlSi9Mg), Refined, Permanent Mold Casting.....	80
2.3 Quantitative Fractography.....	21	Fracture Surfaces of Alloy 359.0 (AlSi9Mg), Refined, Modified, Permanent Mold Casting, Fracture after Static Tensile Test.....	84
<b>Chapter 3 Microstructural Aspects of the Failure of Aluminum-Silicon Casting Alloys.....</b>	<b>29</b>	Alloy 359.0 (AlSi9Mg), Refined, Modified, Permanent Mold Casting, Fracture after V-Notch Impact Test at 21 °C (70 °F).....	88
3.1 Transcrystalline Brittle Fracture.....	29	<b>Chapter 8 Alloy 390.0 (AlSi21CuNi).....</b>	<b>95</b>
3.2 Cellular Fracture.....	29	Composition and Properties.....	95
<b>Chapter 4 Alloy 336.0 (AlSi13Mg1CuNi).....</b>	<b>31</b>	Microstructures.....	95
Composition and Properties.....	31	Fracture Profiles of Alloy 390.0 (AlSi21CuNi), Refined, Modified, Permanent Mold Casting.....	96
Microstructures.....	31	Fracture Surfaces of Alloy 390.0 (AlSi21CuNi), Refined, Modified, Permanent Mold Casting, Fracture after Static Tensile Test.....	97
Fracture Profiles of Alloy 336.0 (AlSi13Mg1CuNi), Refined, Modified, Die Cast Parts.....	32	<b>Chapter 9 Alloy 413.0 (AlSi11).....</b>	<b>107</b>
Fracture Surfaces for Alloy 336.0 (AlSi13Mg1CuNi), Refined, Metal Mold Cast Part, Fracture after Static Tensile Test.....	33	Composition and Properties.....	107
Alloy 336.0 (AlSi13Mg1CuNi), Refined, Modified, Metal Mold Cast Part, Fracture after Static Tensile Test.....	35	Microstructures.....	107
<b>Chapter 5 Alloy 355.0 (AlSi5Cu).....</b>	<b>39</b>	Fracture Profiles of Alloy 413.0 (AlSi11), Refined, Modified, Permanent Mold Casting.....	108
Composition and Properties.....	39	Fracture Surfaces of Alloy 413.0 (AlSi11), Refined, Permanent Mold Casting, Fracture after Static Tensile Test.....	109
Microstructures.....	39	Fracture Surfaces of Alloy 413.0 (AlSi11), Refined, Modified, Permanent Mold Casting, Fracture after Static Tensile Test.....	110
Fracture Profiles of Alloy 355.0 (AlSi5Cu), Refined, Modified, T6, Permanent Mold Casting.....	40	<b>Chapter 10 Material Defects on Fracture Surfaces.....</b>	<b>115</b>
Fracture Surfaces of Alloy 355.0 (AlSi5Cu), Refined, Modified, Permanent Mold Casting, T6, Fracture after Static Tensile Test.....	45	<b>Index.....</b>	<b>121</b>
Fracture Surfaces of Alloy 355.0 (AlSi5Cu), Refined, Modified, Permanent Mold Casting, T6, Fracture after V-Notch Impact Test at 21 °C (70 °F).....	48		
Fracture Surfaces of Alloy 355.0 (AlSi5Cu), Refined, Modified, Permanent Mold Casting, T6, Fracture after Low Cycle Fatigue Test.....	52		
<b>Chapter 6 Alloy 356.0 (AlSi7Mg).....</b>	<b>57</b>		
Composition and Properties.....	57		
Microstructures.....	57
