	Introduction	ix
part one	Presuppositions of field-theories in social science	
1	Certain observations on field-theory in physics	3
2	Gestalt psychology as field-theory	13
3	Basic assumptions of Lewin's topological psychology: psychological field-theory, part one	21
4	Basic assumptions of Lewin's dynamic psychology: psychological field-theory, part two	37
part two	The path followed by field-theory from individual psychology to social science	
5	Moving from the unit of consciousness to the multi-personal field, by way of 'psychological induction'	51
6	The social field as an interpersonal space of conflict and tension	57
7	Contributions to the theory of the 'role-field'	76
part three	The field-theory in social science versus the theories of system and structures	
8	A criticism of the 'system' of structural functionalism and of the departure from 'elements'	89

CONTENTS

9	A first attempt at the field-theory of society as a whole	103
10	Thoughts on structure and change	124
part four	Social field-theories concerned with fields of opinion and interests	
11	Fields of opinion as a basis for norm- and role-formation	149
12	Multi-person fields, image-fields and the norm-field of society	156
13	Interest-fields and fields of social conflict	172
part five	Further applications of the field-concept, and field-theoretical methods in social sciences	
14	Field-ideas as applied in cultural anthropology	189
15	On the educational concept of field	197
16	The theory of level of aspiration, and 'opportunities for climbing' in the social field	208
17	'Field-models' in the sense of a 'formal field-method', together with final conclusions concerning the methodology	223
