Preface vii

Acknowledgments ix

SECTION I High-Resolution CT Techniques and Normal Anatomy 1

- 1 Technical Aspects of High-Resolution CT 2
- 2 Normal Lung Anatomy 50

SECTION II Approach to HRCT Diagnosis and Findings of Lung Disease 73

- 3 HRCT Findings: Linear, Reticular, and Fibrotic Opacities 74
- 4 HRCT Findings: Multiple Nodules and Nodular Opacities 104
- 5 HRCT Findings: Parenchymal Opacification 141
- 6 HRCT Findings: Air-Filled Lung Cysts 165
- 7 HRCT Findings: The Mosaic Attenuation Pattern/Decreased Attenuation 183

SECTION III High-Resolution CT Diagnosis of Diffuse Lung Disease 199

- 8 Fibrosing Idiopathic Interstitial Pneumonias 200
- 9 Other Idiopathic Interstitial Pneumonias: Cryptogenic Organizing Pneumonia, Acute Interstitial Pneumonia, Smoking-Related Interstitial Lung Diseases, Lymphoid Interstitial Pneumonia 234
- 10 Connective Tissue Diseases 259
- 11 Diffuse Pulmonary Neoplasms and Pulmonary Lymphoproliferative Diseases 280
- 12 Sarcoidosis 309
- 13 Pneumoconiosis, Occupational, and Environmental Lung Disease 334
- 14 Hypersensitivity Pneumonitis and Eosinophilic Lung Diseases 367
- 15 Drug-Induced Lung Diseases and Radiation Pneumonitis 387
- 16 Miscellaneous Infiltrative Lung Diseases 406

Contents

- 17 Infections 430
- 18 Pulmonary Edema and Acute Respiratory Distress Syndrome 490
- 19 Cystic Lung Diseases 502
- 20 Emphysema and Chronic Obstructive Pulmonary Disease 532
- 21 Airways Diseases 568
- 22 Pulmonary Hypertension and Pulmonary Vascular Disease 603

SECTION IV

High-Resolution CT Review 635

- 23 Illustrated Glossary of High-Resolution CT Terms 636
 - 24 Appearances and Characteristics of Common Diseases 654
- Index* 697
