List of figures	xi
List of tables	xv
1 The clay world of Çatalhöyük.....	1
Clay in the Neolithic - why study?.....	1
Situating Çatalhöyük.....	2
The regional context.....	3
A familiarity with clay	4
A clay paradox.....	5
A holistic clay materials-clay landscape approach.....	6
Clay defined	6
Key themes.....	7
How was clay used at Çatalhöyük?.....	8
What were the clay resources and how did these change?.....	8
What was the nature of Çatalhöyük's clay landscape?.....	8
What was the relationship between material culture and landscape?	8
Was Çatalhöyük's success due to its clays?	9
Landscape, taskscape, clayscape.....	9
2 Clay-based material culture studies at Çatalhöyük: a review	11
Clay in the Neolithic	12
Clay-based materials at Çatalhöyük.....	13
Mudbrick	14
Plaster	15
Pottery	18
Clay Balls.....	19
Geometric clay objects	20
Stamp seals.....	21
Figurines.....	22
Beyond the existing studies.....	22
3 The clay landscape of Çatalhöyük.....	25
New landscape thinking questions clay's role	27
Biogenic studies	28
Clay studies	29
Summary	30
4 Establishing the sequences of clay use	31
Mapping the clay-based material culture	31
The clays	33
Clay colour as an investigative approach.....	33
Clay colour explained	34
The four fundamental clay groups of Neolithic Çatalhöyük.....	36
Summary	36
5 Reinterpreting the Holocene alluvium: challenging Çatalhöyük's clay foundation.....	39
Reconstructing the Holocene landscape of Çatalhöyük.....	39
KOPAL's wetland.....	39
Physiographic constraints.....	40
The wrong river.....	41
Alluvial deposition – vertical not lateral accretion	42
Why these clays are dark.....	43
The clayscape emerges.....	44

Summary	46
6 The Holocene alluvium – a clay for all purposes.....	49
What kind of clay is the Lower Alluvium?	49
Performance	51
Non-architectural uses.....	52
Clay balls and geometric clay objects (GCOs)	52
Mini-balls	53
Figurines	53
Pottery	53
Early mudbricks – buildings and consequences.....	54
Chaine opératoire	57
Alluvial clay abandoned – understanding the first major clay transition at Çatalhöyük	59
Possible causes	59
A likely story	59
Wider consequences	61
Landscape expression.....	62
Summary	63
7 A common ground: the white marls and lake clays of the Konya Plain	65
The plaster sequence in detail	65
The white marls at Çatalhöyük	66
Differentiating white marl and burnt lime plasters.....	66
The burnt lime plaster up close	67
Up in smoke – re-examining the evidence for burnt lime technology	69
Implications.....	70
The multi-layer plasters.....	70
Single layer white marl plaster.....	71
Beyond the pale – the non-white marls.....	74
The geomorphological setting.....	74
Material culture expression	74
Landscape affordances	76
Summary	77
8 Colluvium: the rise of a new clay.....	79
Colluvium and the ‘clay cycle’ at Çatalhöyük	79
The composition of East Mound colluvium	79
The processes and variables of colluvium formation.....	80
The main areas of colluvium formation	81
Early occupation – the beginnings of the clay cycle	82
Mid to late occupation – the full clay cycle established.....	82
Interpreting the use of colluvial clay.....	82
Çatalhöyük’s History Houses and colluvium	84
Stable clay aggregates	85
The consequences of colluvial clay use	87
Social implications	87
Local landscape consequences	87
Summary	89
9 Arrivals from a distant clayscape	91
Pottery at Çatalhöyük.....	91
The fabric sequence.....	92
Questions: what, how, where, why and who?	93
Procedure.....	94
Fabrics and sources	94
Thin section analysis	96
The expected local fabric.....	96
The ‘gritty ware’ fabrics.....	97
A non-local provenance confirmed.....	97
Possible volcanic sources	98

Findings.....	99
Modelling a higher resolution provenance.....	100
Closing in.....	101
Gritty ware production and properties.....	101
How – comparative production sequences.....	101
Why?.....	102
Who?.....	103
Wider activity.....	105
Summary.....	105
10 Conclusions.....	107
Findings.....	107
Çatalhöyük’s four main clay groups.....	107
The need to re-interpret Çatalhöyük’s clay landscape.....	108
The Lower Alluvium – both a versatile raw material and a soil resource.....	108
Changes in Lower Alluvium use explained.....	108
White plasters – challenging held views and recognising innovation.....	109
The non-white marls.....	109
Colluvium and the clay cycle at Çatalhöyük.....	110
Distant clays.....	110
Answering the question.....	110
Another view.....	110
Final remarks.....	111
Bibliography.....	113
