

Contents

Part I Corpus Design

- | | | |
|----------|----------------------------------|----|
| 1 | Corpus Compilation | 3 |
| | Annelie Ädel | |
| 2 | Corpus Annotation | 25 |
| | John Newman and Christopher Cox | |
| 3 | Corpus Architecture | 49 |
| | Amir Zeldes | |

Part II Corpus methods

- | | | |
|----------|---|-----|
| 4 | Analysing Frequency Lists | 77 |
| | Don Miller | |
| 5 | Analyzing Dispersion | 99 |
| | Stefan Th. Gries | |
| 6 | Analysing Keyword Lists | 119 |
| | Paul Rayson and Amanda Potts | |
| 7 | Analyzing Co-occurrence Data | 141 |
| | Stefan Th. Gries and Philip Durrant | |
| 8 | Analyzing Concordances | 161 |
| | Stefanie Wulff and Paul Baker | |
| 9 | Programming for Corpus Linguistics | 181 |
| | Laurence Anthony | |

Part III Corpus types

- | | | |
|-----------|-------------------------------------|-----|
| 10 | Diachronic Corpora | 211 |
| | Kristin Davidse and Hendrik De Smet | |

11	Spoken Corpora	235
	Ulrike Gut	
12	Parallel Corpora	257
	Marie-Aude Lefer	
13	Learner Corpora	283
	Gaëtanelle Gilquin	
14	Child-Language Corpora	305
	Sabine Stoll and Robert Schikowski	
15	Web Corpora	329
	Andrew Kehoe	
16	Multimodal Corpora	353
	Dawn Knight and Svenja Adolphs	
Part IV Exploring Your Data		
17	Descriptive Statistics and Visualization with R	375
	Magali Paquot and Tove Larsson	
18	Cluster Analysis	401
	Hermann Moisl	
19	Multivariate Exploratory Approaches	435
	Guillaume Desagulier	
Part V Hypothesis-Testing		
20	Classical Monofactorial (Parametric and Non-parametric) Tests	473
	Vaclav Brezina	
21	Fixed-Effects Regression Modeling	505
	Martin Hilpert and Damián E. Blasi	
22	Mixed-Effects Regression Modeling	535
	Roland Schäfer	
23	Generalized Additive Mixed Models	563
	R. Harald Baayen and Maja Linke	
24	Bootstrapping Techniques	593
	Jesse Egbert and Luke Plonsky	
25	Conditional Inference Trees and Random Forests	611
	Natalia Levshina	

Part VI Pulling Everything Together

- 26 Writing up a Corpus-Linguistic Paper** 647
Stefan Th. Gries and Magali Paquot
- 27 Meta-analyzing Corpus Linguistic Research** 661
Atsushi Mizumoto, Luke Plonsky, and Jesse Egbert
