

Table of contents

Preface	V
List of tables	XI
List of figures	XIII
List of abbreviations	XVII
I. Introduction	1
1. World War One as a study object of the economic historian	1
2. The war and sources on how it was perceived by the public	11
3. Capital market data as an alternative indicator of perception	17
3.1. Bond prices – how new an indicator?	17
3.2. What do bond prices say?	19
3.3. Agnostic event analysis	23
3.4. Pros and cons of the “capital market data approach to perception”	26
4. Study design	28
4.1. Research questions	28
4.2. Why Amsterdam?	30
4.3. Structure of the study	35
4.4. Placing the study	36
II. Historical background, sources, and data	39
1. The Netherlands and World War One	39
2. Sources on sovereign bonds traded in Amsterdam	47
2.1. Amsterdam bond prices	47
2.2. Additional bond price and miscellaneous data	55
3. Description of the created sovereign bond database	57
3.1. The Amsterdam cross-section of sovereign bonds	57
3.2. Market price indices and liquidity	66
3.3. Representative bonds versus country indices	78

3.4. Comparative market development and cross-trading	81
4. Potential and limitations of the database	89
4.1. Time frame	89
4.2. Price formation	92
4.3. Capital market regulation	95
4.4. Who were the investors?	96
III. Turning points in the perception of the Great Powers' war effort	105
1. The problem	105
2. Which breaks have been detected so far?	112
3. How timetable analysis can help	117
4. Data selection	120
5. Empirical findings	124
5.1. Shifting mean regressions as the technical point of departure ..	124
5.2. Turning points in investors' perception at a glance	127
5.3. Explaining turning points in the major powers' series	142
5.4. Explaining turning points in the minor powers' series	163
6. Checking for the turning points' robustness	171
6.1. Including economic variables	171
6.2. Results of the robustness check	179
7. Discussion	184
7.1. Turning points versus blips – the example of Germany	185
7.2. Agnostic turning points versus turning points “informed by historiography”	194
7.3. Simple sovereign bonds-based perception indices	199
IV. Perception of alliance credibility	205
1. The problem	205
2. Alliance formation before and during the war	209
2.1. The various alliances at a glance	209
2.2. Measuring the alliances' strength	211
3. Alliance credibility	214
4. Data selection	217
5. Empirical findings on a “global” test	225
5.1. Starting from a simple approximation of co-movement – correlation coefficients	225

5.2. Do we find cointegrating relationships?	227
6. Empirical findings on a “sub-periods” test	234
6.1. Correlation coefficients once more	234
6.2. Was perceived credibility unstable?	237
7. Discussion	244
7.1. Measuring the degree of alliance integration	245
7.2. What can Granger-causality tell?	246
V. Conclusions	249
1. Turning points summary	250
2. Have historians missed out on major events?	255
3. Alliance perception summary	256
4. Outlook	260
List of sources and references	263
Primary sources – Dutch historical newspapers/journals/ handbooks/laws	263
Primary sources – contemporary monographs/articles up until 1924 ..	264
Secondary literature	267
Online Appendix	303
Index	305
