1	Introduction	1
2	Function Spaces and General Concepts	17
2.1	Preliminaries	17
2.1.1	Notation	17
2.1.2	Lipschitz Domains and Their Boundaries	20
2.2	Classical Function Spaces	27
2.2.1	Sobolev and Fractional Sobolev Spaces	27
2.2.2	Banach-Space Valued Hölder, Lebesgue, and Sobolev Spaces	29
2.3	Besov and Triebel-Lizorkin Spaces	33
2.3.1	Spaces of Type $B_{p,q}^s, F_{p,q}^s$	34
2.3.2	Wavelet Characterization for $B_{p,q}^s$	37
2.3.3	Spaces of Type $\mathbf{B}_{p,q}^s$	40
2.3.4	Smooth and Non-smooth Atomic Decompositions for $\mathbf{B}_{p,q}^s$	43
2.3.5	Besov Spaces $\mathbf{B}_{p,q}^s$ on Boundaries of Lipschitz Domains	52
2.3.6	Properties of Besov Spaces $\mathbf{B}_{p,q}^s$ on Lipschitz Domains	56
2.3.7	Spaces of Type $\mathbf{F}_{p,q}^s$	60
2.4	Kondratiev Spaces	62
2.4.1	Definition and Basic Properties	63
2.4.2	Kondratiev Spaces on Domains of Polyhedral Type	66
2.4.3	Embeddings and Pointwise Multiplication	72
2.4.4	Relations Between Kondratiev and Other Function Spaces	74
2.4.5	Fractional Kondratiev Spaces	82
2.5	Smoothness Morrey Spaces and Their Generalizations	84
2.5.1	Spaces of Type $\mathcal{A}_{\mathcal{M}_{p,q}}^s$	85

2.5.2	Properties	92
2.5.3	Spaces of Type $B_{p,q}^{s,\tau}$	95
2.6	Function Spaces on Manifolds.....	102
2.6.1	Sobolev Spaces on Manifolds.....	104
2.6.2	Besov and Triebel-Lizorkin Spaces on Manifolds	111

Part I Besov and Fractional Sobolev Regularity of PDEs

3	Theory and Background Material for PDEs	115
3.1	Definitions and Classifications	115
3.2	Elliptic Boundary Value Problems	121
3.2.1	Bilinear Forms and Lax-Milgram Theorem	122
3.2.2	Existence of Weak Solutions	125
3.2.3	Fractional Sobolev Regularity on Smooth, Convex and Lipschitz Domains	128
3.3	Parabolic Boundary Value Problems	132
3.3.1	Existence of Weak Solutions	132
3.4	Hyperbolic Boundary Value Problems	135
3.5	Operator Pencils	136
4	Regularity Theory for Elliptic PDEs	145
4.1	The Fundamental Semilinear Elliptic Problem	146
4.2	Regularity of Semilinear Elliptic PDEs in Kondratiev Spaces	147
4.2.1	Composition Operators in Kondratiev Spaces.....	147
4.2.2	Fixed Points of Nonlinear Operators in Banach Spaces	155
4.2.3	Existence of Solutions in Kondratiev Spaces.....	166
4.2.4	Uniqueness of Solutions.....	167
4.3	Regularity of Semilinear Elliptic PDEs in Besov Spaces	173
5	Regularity Theory for Parabolic PDEs.....	175
5.1	The Fundamental Parabolic Problems.....	176
5.1.1	Problems I and II: Parabolic PDEs on Domains of Polyhedral Type	176
5.1.2	Problem III: Linear Parabolic PDEs of Second Order on Generalized Wedges	178
5.1.3	Problem IV: Linear Parabolic PDEs of Second Order on General Lipschitz Domains.....	179
5.2	Regularity Results in Sobolev and Kondratiev Spaces	181
5.2.1	Regularity Results in Sobolev Spaces for Problem I.....	181
5.2.2	Regularity Results in Kondratiev Spaces for Problem I.....	188
5.2.3	Regularity Results in Sobolev and Kondratiev Spaces for Problem II	202

5.2.4	Regularity Results in Kondratiev Spaces for Problem III	215
5.2.5	Regularity Results in Kondratiev Spaces for Problem IV	217
5.3	Regularity Results in Fractional Sobolev Spaces	218
5.3.1	Fractional Sobolev Regularity of Problem III	218
5.3.2	Fractional Sobolev Regularity of the Heat Equation on Specific Smooth Cones	225
5.4	Regularity Results in Besov Spaces	230
5.4.1	Besov Regularity of Problem I	230
5.4.2	Besov Regularity of Problem II	234
5.4.3	Hölder-Besov Regularity of Problem I	236
5.4.4	Besov Regularity of Problem IV	238
6	Regularity Theory for Hyperbolic PDEs	241
6.1	The Fundamental Hyperbolic Problem	241
6.2	Regularity Results in Kondratiev Spaces	243
6.3	Regularity Results in Besov Spaces	244
7	Applications to Adaptive Approximation Schemes	245
7.1	N -Term Approximation and Adaptive Wavelet Algorithms	245
7.2	Finite Element Approximation	249
7.3	Time-Marching Adaptive Algorithms	251

Part II Traces in Function Spaces

8	Traces on Lipschitz Domains	255
8.1	Boundedness of the Trace Operator	256
8.2	Construction of an Extension Operator	258
8.2.1	Extension of Atoms	258
8.2.2	Boundedness of the Extension Operator	265
8.3	Trace Results for Spaces $\mathbf{B}_{p,q}^s(\Omega)$, $\mathbf{F}_{p,q}^s(\Omega)$	265
8.3.1	The General Case $0 < s < 1$	266
8.3.2	The Limiting Case $s = 0$	267
8.4	Application: Pointwise Multipliers in Function Spaces	267
9	Traces of Generalized Smoothness Morrey Spaces on Domains	277
9.1	A Lift Operator	279
9.2	Construction of an Extension Operator	282
9.3	Trace Results	285
9.3.1	Trace Theorem for Spaces $\mathcal{A}_{\mathcal{M}_{p,q}^\varphi}^s(\Omega)$	287
9.3.2	Trace Theorem for Spaces $\mathcal{B}_{p,q}^{s,\tau}(\Omega)$	290
9.4	Application: A Priori Estimates for Solutions of Elliptic Boundary Value Problems	293

10	Traces on Riemannian Manifolds	295
10.1	Fermi Coordinates on Submanifolds	296
10.2	Trace Results	303
10.2.1	Trace Theorem for Spaces $H_p^s(M)$	304
10.2.2	Trace Theorem for Spaces $F_{p,q}^s(M), B_{p,q}^s(M)$	309
10.3	Application: Spaces with Symmetries.....	309
	Bibliography	315
	Index	325
