1 Introduction	1
1 Overview	1
2 A basic classification of services	3
3 Decentralization and development	5
4 Re-organization and rationalization	7
5 The urban environment	8
6 Distribution and utilization	10
7 Conclusions	11
2 The spatial form of administrative areas	14
1 Introduction	14
2 Shape measures on homogeneous surfaces	16
3 Shape measures on non-homogeneous surfaces	22
4 Spatial efficiency measures	24
3 The size of administrative units	29
1 Introduction	29
2 The determination of size and spacing of facilities	30
3 Local sentiment and control	35
4 Distance-decay and utilization	37
5 Economies of scale	40
6 Satisfaction, justice and costs	46
4 Allocation-location models in the public sector	55
1 Introduction	55
2 Objectives, constraints and assumptions	58
3 Procedures	63
4 Exact versus intuitive solutions	68
5 Empirical examples	70
6 Conclusions	78
5 Interaction within administrative districts	80
1 Introduction	80
2 An overview of queuing problems	81

3	Graphical and statistical approaches to queuing	85
4	Average waiting-time and traffic intensity	88
5	The use of simulation procedures	90
6	Résumé	95
7	The concept of expected distance	96
8	Comparison of delivery systems using expected distance concepts	101
9	Conclusions	102
6	Interaction among administrative units	103
1	Introduction	103
2	Make-or-buy decisions	105
3	Inter-municipal cooperation	106
4	Patterns of inter-municipal cooperation	108
5	Two case studies	109
6	Patterns of municipal annexations	115
7	Conclusions	122
7	The evolution of service districts	124
1	Introduction	124
2	A general typology of the evolution process	127
3	Simulation and time variations	130
4	A spatial analysis of amalgamation	137
5	Evolution of the spatial configuration of centres	145
6	Conclusions	149
8	Control and organization: the role of decision-makers	151
1	Introduction	151
2	The development of theories of organizations	154
3	The ecological view - a case study	163
4	Conclusions	165
9	Conclusions and further work	167
