

CONTENTS

Prologue	I
Chapter 1. Causality and Causal Analysis	3
Causal Ordering, 3	
Operators, 6	
Definition of Causality, 11	
Causal Inference, 12	
Flows, 17	
<i>Additivity, 19</i>	
<i>Proportionality of Effect, 19</i>	
<i>Negative Multipliers, 20</i>	
<i>Terminology Conventions, 22</i>	
Linearity, 23	
<i>Interpreting Structural Coefficients, 26</i>	
Causal Systems, 27	
<i>Multiple Causes, 27</i>	
<i>Multiple Effects, 30</i>	
<i>Mutual Causation, 31</i>	
Sources and Additional Readings, 33	
Exercises, 35	
Chapter 2 Causal Diagrams and Flowgraph Analysis	38
Diagramming Causal Relationships, 38	

Complexities in Diagrams, 41

- Branches, 41*
- Loops, 42*
- Self-Loops, 43*
- Missing Arrows, 43*
- Disturbances, 44*
- Nonlinear Relations, 46*

Flowgraph Analysis, 48

- Equation Formation, 49*
- Structural-Equation Representations, 51*
- Reduction Rules, 52*
- Additional Interpretations of the Rules, 55*
- Flowgraphs with Loops, 56*
- Touching Paths, 61*
- Reduction with Loops, 62*
- Reduced Form of a System, 67*
- Semireduction, 67*
- Extensions of Flowgraph Analysis, 73*

Research Applications, 73

- Critical Cases, 73*
- Explanation, 74*
- Prediction, 75*
- Interdiction, 75*

- Sources and Additional Readings, 76
- Exercises, 77

Chapter 3 Statistical Concepts

82

Distributions, 82

- Graphs of Distributions, 83*
- The Mean, 85*
- Variance, 87*

Joint Distributions, 88

- Graphs of Joint Distributions, 88*
- Covariance, 95*
- The Correlation Coefficient, 96*

Linear Regression, 98

Residual Variance, 101

Multiple Regression, 103

Standardized Coefficients, 105

Regression and Causal Inference, 107

Sources and Additional Readings, 108

Exercises, 109

Chapter 4 Path Analysis

111

Flowgraph Modifications, 112

Loop Reduction, 112

Input Covariances, 113

Disturbance Covariances, 114

Analyzing Statistical Coordination, 114

Coordinating Paths, 114

Covariance Analysis, 120

Analysis of Correlations, 124

Standardized Versus Unstandardized, 126

Analyzing Statistical Diversity, 127

Path Analysis and Algebraic Derivations, 131

Gating Mechanisms, 132

General Implications, 135

Sources of Diversity, 135

Coordination of Outcomes, 138

Correlations in Loops, 140

Sources and Additional Readings, 142

Exercises, 142

Chapter 5 Identification and Estimation

148

Regression Analyses and Identification, 150

The Need for Theory, 152

Recursive Systems, 153

Ordinary Least Squares (OLS), 155

- Nonrecursive Systems, 160
 - Instrumental Variables*, 160
 - Instruments and Identification*, 165
 - Two-Stage Least Squares*, 168
 - Calculating Procedures*, 172
 - Graphical Interpretation of 2SLS*, 172
 - Identification Problems*, 175
 - Identifiability*, 177
 - Full-Information Methods*, 181
 - Self-Loops*, 182
 - Lagged Variables as Instruments*, 184
- Factors Affecting Estimates, 185
 - Sampling Error*, 185
 - Strength of Relations*, 186
 - Measurement Imprecision*, 188
 - Specification Errors*, 191
- Elaboration in Social Research, 193
- Zero Coefficients, 194
- Sources and Additional Readings, 195
- Exercises, 197

Chapter 6 Dynamic Considerations

205

- Simple System Dynamics, 206
 - Causal Lags*, 206
 - Elementary Dynamic Patterns*, 208
 - Feedback Effects*, 213
 - Higher Order Feedback*, 219
 - Complex Inputs*, 223
- Dynamic Confounding in Static Analyses, 225
 - Equilibration*, 226
 - Equilibration Time*, 227
 - Time-Varying Inputs*, 231
 - Dynamics of Lagged Variables*, 234
- Static and Dynamic Variance, 235
- Sources and Additional Readings, 237
- Exercises, 238

Contents	xiii
Answers to Exercises	245
Chapter 1, 245	
Chapter 2, 250	
Chapter 3, 258	
Chapter 4, 262	
Chapter 5, 271	
Chapter 6, 286	
Index	295
