

Contents

1	Introduction	1
2	Theory	7
2.1	Navier-Stokes equation	7
2.2	Flow-profile of liquid(s) through parallel infinite plates	9
2.3	Lipid Bilayers	12
2.3.1	Electrical measurement of lipid bilayers	17
3	Materials and Methods	23
3.1	Micromachining	23
3.2	Additive Manufacturing	23
3.2.1	Extrusion printing	25
3.2.2	Stereolithography	25
3.2.3	Two-Photon polymerization	26
3.2.4	Fabrication example using micromachining, stereolithography and two-photon polymerization	28
3.3	Self-assembly on micromachined chips	32
4	Optofluidic flow-ratio sensor system	37
4.1	Introduction	38
4.2	Fabrication	40
4.3	Experimental Setup	42
4.4	Measurements and Results	44
4.4.1	Velocity Profiles	44
4.4.2	Concentration profiles	47
4.4.3	Interference	49
4.5	Interface control and verification of interferometer	53
4.5.1	Phase- vs. intensity-measurements	55
4.6	Results and discussion	56
4.7	Conclusion	60

5	Microfluidic Swapper	63
5.1	Introduction	63
5.2	Mixing Principle	66
5.3	Fabrication	67
5.4	Design	69
5.5	Simulations	76
5.6	Experiments and results	77
5.7	Conclusion	83
6	Lipid Bilayer	85
6.1	Introduction	85
6.2	Fabrication	86
6.3	Electrical measurements	90
6.4	Lipid Bilayer AFM measurements	97
6.5	Lipid bilayer lens	105
6.6	Conclusion	115
7	Conclusion	117
7.1	Optofluidic flow-ratio sensor system	117
7.2	Microfluidic Swapper	118
7.3	Lipid Bilayer	119
	Bibliography	127
