PREFACE OF THE EDITOR-IN-CHIEF	vii
PREFACE OF THE CONSULTING EDITOR	xiii
PREFACE OF THE VOLUME EDITOR	xv
CONTRIBUTORS	xix
1 Chirality and Drug Discovery	1
2 Drug Discovery Beyond the Rule of Five	47
3 Microbes to Man: From Soils and the Depths to Drugs	83
4 Fragment-Based Lead Discovery	131
5 Recent Advances in Development, Validation, and Exploitation of QSAR Models	167
6 Structure-Based Drug Design	197
7 Docking, Scoring, and Virtual Screening in Drug Discovery	251
8 Computational Chemistry Tools	353
9 Assay Development and High-Throughput Screening	385
10 Advances in NMR-Based Characterization of Drug Substances, Impurities, Degradants, and Drug Metabolites	427
11 NMR-Based Screening and Drug Discovery	499
12 Mass Spectrometry and Drug Discovery	583
13 Cryo-Electron Microscopy in Drug Discovery and Development: Opportunities and Challenges	613
14 Combinatorial Chemistry and Its Associated Technologies	645
15 Recent Advances in Chemistry Technologies and Applications to Medicinal Chemistry	693
16 Automated Synthesis	771
17 Artificial Intelligence in Medicinal Chemistry	809
18 Medicinal Chemical Biology	829
INDEX	867
