

Contents

| | |
|---|-----------|
| <i>Contributors</i> | <i>xi</i> |
| 1. Using proteomic and transcriptomic data to assess activation of intracellular molecular pathways | 1 |
| Anton Buzdin, Victor Tkachev, Marianna Zolotovskaia, Andrew Garazha, Sergey Moshkovskii, Nicolas Borisov, Nurshat Gaifullin, Maksim Sorokin, and Maria Suntsova | |
| 1. Molecular pathways | 2 |
| 2. Quantitative analysis of gene expression | 6 |
| 3. Quantization of pathway activities | 14 |
| 4. Applications in life sciences | 22 |
| 5. Applications in medicine | 26 |
| 6. Software for PAL calculation | 36 |
| 7. Concluding remarks | 37 |
| Acknowledgments | 37 |
| References | 37 |
| 2. Proteomics in systems toxicology | 55 |
| Carolina Madeira and Pedro M. Costa | |
| 1. The proteome as toxicological endpoint | 56 |
| 2. Proteomics methods and approaches in toxicology | 70 |
| 3. Applications | 76 |
| 4. Take-home lessons | 83 |
| Acknowledgments | 84 |
| References | 84 |
| 3. Posttranslational modifications in systems biology | 93 |
| Suruchi Aggarwal, Priya Tolani, Srishti Gupta, and Amit Kumar Yadav | |
| 1. Introduction | 94 |
| 2. Major PTM types | 95 |
| 3. PTM identification and quantification | 96 |
| 4. Data analysis strategies | 98 |
| 5. PTM code | 103 |

| | |
|--|----------------|
| 6. PTM and PPIs networks | 104 |
| 7. Advances in PTM studies | 106 |
| 8. Resources for systems analysis | 108 |
| 9. PTMs and systems biology | 113 |
| 10. Challenges and outlook for PTM systems biology | 115 |
| 11. Conclusion | 116 |
| Acknowledgments | 117 |
| Conflict of interest | 117 |
| References | 117 |
| 4. Big data, integrative omics and network biology | 127 |
| Priya Tolani, Srishti Gupta, Kirti Yadav, Suruchi Aggarwal, and Amit Kumar Yadav | |
| 1. Introduction | 128 |
| 2. Rise of the omics | 130 |
| 3. Network biology across regulatory layers and across omics | 139 |
| 4. Data science in big data era | 143 |
| 5. Integrated omics | 147 |
| 6. Ethics of big data sharing and reuse | 153 |
| 7. Future perspectives, challenges and conclusion | 154 |
| Acknowledgments | 155 |
| Conflict of interest | 155 |
| References | 155 |
| 5. Proteome analysis using machine learning approaches and its applications to diseases | 161 |
| Abhishek Sengupta, G. Naresh, Astha Mishra, Diksha Parashar, and Priyanka Narad | |
| 1. Introduction to proteomics | 162 |
| 2. Overview of machine learning algorithms | 189 |
| 3. MS in proteomics | 195 |
| 4. Case study 1: Classification and biomarker prediction using proteomics data | 201 |
| 5. Case study 2: Deep learning to large-scale data analysis in mass spectrometry-based proteomics | 207 |
| 6. Application of deep learning in proteomics | 210 |
| 7. Conclusion | 211 |
| References | 212 |

| | |
|--|----------------|
| 6. Network-based strategies for protein characterization | 217 |
| Alessandra Merlotti, Giulia Menichetti, Piero Fariselli, Emidio Capriotti, and Daniel Remondini | |
| 1. Introduction | 217 |
| 2. The protein folding problem | 218 |
| 3. Modeling folding kinetics | 219 |
| 4. Protein structure representation | 220 |
| 5. Contact maps and graph Laplacian | 221 |
| 6. Protein folding state discrimination and Laplacian spectrum | 222 |
| 7. A case study: Methods for protein 3D-structure reconstruction | 224 |
| 8. Discussion | 245 |
| References | 247 |
| 7. Proteomics and systems biology in optic nerve regeneration | 249 |
| Sean D. Meehan, Leila Abdelrahman, Jennifer Arcuri, Kevin K. Park, Mohammad Samarah, and Sanjoy K. Bhattacharya | |
| 1. Introduction to nerve regeneration | 250 |
| 2. Proteomics levels and their integration | 252 |
| 3. Standardization approaches | 254 |
| 4. Insight about biological knowledge from proteomics and connectivity with other omics | 258 |
| 5. Conclusion | 264 |
| Acknowledgments | 264 |
| References | 264 |
| 8. Proteomics of pseudoexfoliation materials in the anterior eye segment | 271 |
| Jada Morris, Ciara Myer, Tara Cornet, Anna K. Junk, Richard K. Lee, and Sanjoy K. Bhattacharya | |
| 1. Introduction | 272 |
| 2. Anterior segment anatomy and aqueous outflow in pseudoexfoliation glaucoma | 275 |
| 3. Genetic risk factors and proteins | 278 |
| 4. Origin of ocular anterior segment proteins | 284 |
| 5. Environmental factors and interplay | 286 |
| 6. Conclusion | 288 |
| Acknowledgments | 288 |
| References | 288 |

| | |
|---|------------|
| 9. A systems biology approach to COVID-19 progression in population | 291 |
| Magdalena Djordjevic, Andjela Rodic, Igor Salom, Dusan Zigic, Ognjen Milicevic, Bojana Ilic, and Marko Djordjevic | |
| 1. Introduction | 292 |
| 2. An overview of compartmental models of epidemic progression | 295 |
| 3. Systems biology approach to compartmental modeling of the COVID-19 epidemic | 297 |
| 4. Parameter analysis and inference | 301 |
| 5. Analysis of COVID-19 transmission in China | 303 |
| 6. Conclusions | 311 |
| Acknowledgment | 312 |
| References | 312 |
| 10. An integrative analysis to distinguish between emphysema (EML) and alpha-1 antitrypsin deficiency-related emphysema (ADL)—A systems biology approach | 315 |
| S. Udhaya Kumar, N. Madhana Priya, D. Thirumal Kumar, V. Anu Preethi, Vibhaa Kumar, Dhanushya Nagarajan, R. Magesh, Salma Younes, Hatem Zayed, and C. George Priya Doss | |
| 1. Introduction | 316 |
| 2. Methods | 318 |
| 3. Results | 320 |
| 4. Discussion | 332 |
| 5. Conclusion | 337 |
| Acknowledgments | 337 |
| Conflicts of interest | 337 |
| Author contributions | 337 |
| Role of funding source | 337 |
| References | 338 |
| 11. A systemic approach to explore the mechanisms of drug resistance and altered signaling cascades in extensively drug-resistant tuberculosis | 343 |
| S. Udhaya Kumar, Aisha Saleem, D. Thirumal Kumar, V. Anu Preethi, Salma Younes, Hatem Zayed, Iftikhar Aslam Tayubi, and C. George Priya Doss | |
| 1. Introduction | 344 |
| 2. Materials and methods | 346 |

| | |
|------------------------|-----|
| 3. Results | 348 |
| 4. Discussion | 357 |
| 5. Conclusion | 360 |
| Acknowledgments | 361 |
| Conflict of interest | 361 |
| Author contributions | 361 |
| Role of funding source | 361 |
| References | 361 |
