Preface	v
1 Mechanics of Random Motion	1
1.1 Smooth Motion and Random Motion	1
1.2 On Stochastic Processes	7
1.3 Itô's Path Analysis	20
1.4 Equation of Motion for a Stochastic Process	30
1.5 Kinematics of Random Motion	37
1.6 Free Random Motion of a Particle	46
1.7 Hooke's Force	49
1.8 Hooke's Force and an Additional Potential	52
1.9 Complex Evolution Functions	58
1.10 Superposition Principle	63
1.11 Entangled Quantum Bit	70
1.12 Light Emission from a Silicon Semiconductor	71
1.13 The Double-Slit Problem	73
1.14 Double-Slit Experiment with Photons	76
1.15 Theory of Photons	81
1.16 Principle of Least Action	83
1.17 Transformation of Probability Measures	85
1.18 Schrödinger Equation and Path Equation	87
2 Applications	91
2.1 Motion induced by the Coulomb Potential	91
2.2 Charged Particle in a Magnetic Field	108
2.3 Aharonov-Bohm Effect	110
2.4 Tunnel Effect	112
2.5 Bose-Einstein Distribution	114
2.6 Random Motion and the Light Cone	118
2.7 Origin of the Universe	120
2.8 Classification of Boundary Points	125
2.9 Particle Theory of Electron Holography	130
2.10 Escherichia coli and Meson models	135

2.11	High-Temperature Superconductivity	136
3	Momentum, Kinetic Energy, Locality	149
3.1	Momentum and Kinetic Energy	149
3.2	Matrix Mechanics	153
3.3	Function Representations of Operators	156
3.4	Expectation and Variance	158
3.5	The Heisenberg Uncertainty Principle	164
3.6	Kinetic Energy and Variance of Position	168
3.7	Theory of Hidden Variables	169
3.8	Einstein's Locality	174
3.9	Bell's Inequality	178
3.10	Local Spin Correlation Model	181
3.11	Long-Lasting Controversy and Random Motion	185
4	Markov Processes	193
4.1	Time-Homogeneous Markov Processes	193
4.2	Transformations by M -Functionals	198
4.3	Change of Time Scale	214
4.4	Duality and Time Reversal	220
4.5	Time Reversal, Last Occurrence Time	228
4.6	Time Reversal, Equations of Motion	237
4.7	Conditional Expectation	243
4.8	Paths of Brownian Motion	247
5	Applications of Relative Entropy	253
5.1	Relative Entropy	253
5.2	Variational Principle	260
5.3	Exponential Family of Distributions	267
5.4	Existence of Entrance and Exit Functions	270
5.5	Cloud of Paths	274
5.6	Kac's Phenomenon of Propagation of Chaos	279
6	Extinction and Creation	287
6.1	Extinction of Particles	287
6.2	Piecing-Together Markov Processes	292
6.3	Branching Markov Processes	297
6.4	Construction of Branching Markov Processes	306
6.5	Markov Processes with Age	308
6.6	Branching Markov Processes with Age	312
	Bibliography	321
	Index	335
