

## Table of Contents

1. Introduction.....	1
1.1 Nickel Catalysis in Organic Chemistry.....	2
1.1.1 Nickel-Catalyzed Reductive Cross-Coupling.....	4
1.1.2 C–S Bond Formations via Nickel Catalysis.....	6
1.2 Photocatalysis in Organic Chemistry.....	12
1.2.1 Photoredox Catalysis.....	12
1.2.2 Electron-Donor-Acceptor (EDA) Complexes in Photocatalysis.....	16
1.2.3 C–S Bond Formations via Photocatalysis.....	19
2. Results and Discussion.....	28
2.1 Thioesterification of <i>N</i> -(Hydroxy)phthalimides via Nickel Catalyzed Reductive Cross-Coupling.....	28
2.2 Decarboxylative Thiolation of <i>N</i> -(Hydroxy)phthalimides via Nickel Catalyzed Reductive Cross-Coupling.....	36
2.3 Metal-free and Oxidant-free Photoredox-catalyzed C–C bond cleavage/trifluoromethylthiolation.....	42
2.4 Photocatalytic Decarboxylative Thiolation Mediated by $\text{KHCO}_3$ and $\text{NaI}$ .....	49
3. Summary.....	59
4. Outlook.....	61
5. Experimental Details and Data.....	63
5.1 General Information.....	63
5.2 Procedures and Product Data.....	65
5.2.1 Procedures and Product Data for Thioester Synthesis of <i>N</i> -(Hydroxy)phthalimides via Nickel Catalyzed Reductive Cross-Coupling.....	65
5.2.2 Procedures and Product Data for Decarboxylative Thiolation of <i>N</i> -(Hydroxy)phthalimides via Nickel Catalyzed Reductive Cross-Coupling.....	71
5.2.3 Procedures and Product Data for Metal-free and Oxidant-free Photoredox-catalyzed C–C bond cleavage/trifluoromethylthiolation.....	78

5.2.4 Photocatalytic Decarboxylative Thiolation Mediated by $\text{KHCO}_3$ and NaI .....	89
6. List of Abbreviations.....	101
dimethyl sulfoxide.....	101
7. References.....	104
