| Abbreviations | V |
| Abstract | 1 |
| 1. Introduction | 4 |
| 1.1. Directed evolution of enzymes..... | 4 |
| 1.2. Cytochromes P450 | 5 |
| 1.2.1. Decarboxylase OleT – a P450 peroxygenase | 5 |
| 1.3. Artificial metalloenzymes | 7 |
| 1.4. Challenges in the chemogenetic evolution of artificial metalloenzymes..... | 9 |
| 1.5. Objectives..... | 11 |
| 2. Experimental section..... | 13 |
| 2.1. General remarks | 13 |
| 2.2. Computational methods..... | 13 |
| 2.2.1. OleT-BM3R..... | 13 |
| 2.2.2. Nitrobindin | 14 |
| 2.3. Biomolecular methods | 14 |
| 2.3.1. Cloning and site-saturation mutagenesis | 14 |
| 2.3.2. Protein purification..... | 16 |
| 2.3.2.1. OleT-BM3R, OleT-BM3R variants, and PTDH | 16 |
| 2.3.2.2. Nitrobindin variants | 16 |
| 2.3.3. Cofactor conjugation of nitrobindin variants | 17 |
| 2.3.4. Screening of site-saturation mutagenesis libraries | 17 |
| 2.3.4.1. OleT-BM3R libraries | 17 |
| 2.3.4.2. Nitrobindin libraries – peroxidase activity screening | 19 |
| 2.3.4.3. Nitrobindin libraries – epoxygenase activity screening | 20 |
| 2.4. Catalyses with purified protein | 21 |
| 2.4.1. Decarboxylation reactions with purified OleT-BM3R | 21 |

| | | |
|----------|--|----|
| 2.4.2. | Comparison of peroxidase-like activity of metalloporphyrins in the presence of different nitrobindin variants..... | 22 |
| 2.4.3. | Decolorization of recalcitrant dyes using ArMs..... | 22 |
| 2.4.4. | Epoxidation of styrene derivatives using ArMs..... | 22 |
| 2.5. | Characterization of ArMs | 23 |
| 2.5.1. | Kinetic characterization of ArMs..... | 23 |
| 2.5.2. | Isothermal titration calorimetry (ITC)..... | 23 |
| 2.5.3. | UV/Vis spectroscopy..... | 23 |
| 2.5.4. | Circular dichroism spectroscopy | 24 |
| 2.5.5. | Crystallization and structure analysis..... | 24 |
| 2.6. | Analytical methods..... | 25 |
| 2.6.1. | Photoclick assay..... | 25 |
| 2.6.2. | GC-FID and GC-MS methods | 25 |
| 3. | Results and discussion..... | 26 |
| 3.1. | Directed evolution of the decarboxylase OleT | 26 |
| 3.1.1. | Development of a photoclick-based high-throughput screening assay..... | 26 |
| 3.1.2. | Directed evolution of OleT-BM3R toward aromatic substrates | 29 |
| 3.1.3. | Comparison to the state of the art..... | 33 |
| 3.2. | Chemogenetic evolution of nitrobindin toward artificial enzymes for oxidation reactions..... | 34 |
| 3.2.1. | Development of a chemogenetic evolution platform..... | 35 |
| 3.2.1.1. | Nitrobindin as artificial peroxidase-like enzyme..... | 36 |
| 3.2.1.2. | Nitrobindin as artificial epoxygenase | 45 |
| 3.2.2. | Mechanistic investigations | 49 |
| 3.2.3. | Comparison to the state of the art..... | 55 |
| 3.3. | Lessons from directed OleT and nitrobindin evolution..... | 59 |
| 4. | Summary..... | 60 |
| 5. | References..... | 62 |
| 6. | Appendix | 74 |
| 6.1. | Supporting information..... | 74 |

| | |
|--|-----|
| 6.2. Media and buffers | 93 |
| 6.3. DNA sequences..... | 94 |
| 6.3.1. Gene sequences | 94 |
| 6.3.2. Primer sequences..... | 99 |
| 6.4. Bacteria and plasmids..... | 100 |
| 6.4.1. Bacteria | 100 |
| 6.4.2. Plasmids..... | 100 |
| Declaration/Eidesstattliche Erklärung..... | 103 |
| Publication summary..... | 106 |
| Curriculum vitae..... | 109 |
