Abbreviations	xxxiv

<b>PART ONE THE RESEARCH PROCESS</b>	<b>1</b>
<b>Chapter 1 The nature and process of social research</b>	<b>3</b>
1.1 Introduction	4
1.2 Social research: what is it and why do it?	4
What is 'social research'?	4
Why do social research?	4
1.3 The context of social research methods	6
Theory and its role in research	6
Existing knowledge: the literature	7
Epistemological and ontological questions	7
Values, ethics, and politics	7
1.4 The main elements of social research	8
Literature review	8
Concepts and theories	8
Research questions	10
Sampling	11
Data collection	11
Data analysis	12
Writing up	12
1.5 The messiness of social research	13
<i>Key points</i>	14
<i>Questions for review</i>	15
<b>Chapter 2 Social research strategies: quantitative research and qualitative research</b>	<b>16</b>
2.1 Introduction	17
2.2 Theory and research	18

What type of theory?	18
Deductive and inductive theory	19
2.3 Epistemological considerations	23
Positivism	23
Interpretivism	24
2.4 Ontological considerations	27
Objectivism	28
Constructionism	28
Ontology and social research	31
2.5 Research strategy: quantitative and qualitative research	31
2.6 Further influences on how we conduct social research	33
Values	33
Practical considerations	35
<i>Key points</i>	36
<i>Questions for review</i>	36

## **Chapter 3 Research designs** 38

3.1 Introduction	39
3.2 Quality criteria in social research	40
Reliability	40
Replication	40
Validity	40
The relationship between quality criteria and research strategy	42
3.3 Experimental design	43
Features of the classical experimental design	43
Classical experimental design and validity	44
The laboratory experiment	47
Quasi-experiments	47
The significance of experimental design	49
3.4 Cross-sectional design	50
Features of the cross-sectional design	50
Reliability, replicability, and validity	53
Non-manipulable variables	53
Cross-sectional design and research strategy	53
3.5 Longitudinal designs	54
Features of longitudinal designs	54
Reliability, replicability, and validity	57
Problems associated with longitudinal designs	57
Longitudinal designs and research strategy	58
3.6 Case study design	59
Features of the case study design	59
Types of case	60
Longitudinal research and the case study	61
Reliability, replicability, and validity	61
3.7 Comparative design	62
Features of the comparative design	62
Reliability, replicability, and validity	63
The multiple-case study	63
3.8 Bringing research strategy and research design together	65
<i>Key points</i>	66
<i>Questions for review</i>	66

<b>Chapter 4</b>	<b>Planning a research project and formulating research questions</b>	<b>68</b>
4.1	Introduction	69
4.2	Preparing for your project	69
	What does your institution expect from you?	69
	Working with your supervisor	69
	Working with the time and resources available	70
4.3	Starting your project	74
	Formulating suitable research questions	74
	Writing your research proposal	78
	Preparing to conduct your research	79
4.4	Doing your research and analysing your results	80
	<i>Key points</i>	81
	<i>Questions for review</i>	82
<b>Chapter 5</b>	<b>Reviewing the literature</b>	<b>83</b>
5.1	Introduction	84
5.2	Narrative reviews	84
	What is a narrative review?	84
	Why conduct a narrative review?	86
	Getting the most from your reading	88
5.3	Systematic reviews	89
	What is a systematic review?	89
	Evaluating the systematic review	93
5.4	Searching the existing literature	94
	Online databases	94
	Keywords and defining search parameters	97
5.5	Referencing your work	98
	Methods of referencing	99
	The role of the bibliography or reference list	102
5.6	Avoiding plagiarism	103
	What is plagiarism?	103
	Why is it important to avoid plagiarism?	103
	How can you avoid plagiarism?	104
	<i>Key points</i>	104
	<i>Questions for review</i>	105
<b>Chapter 6</b>	<b>Ethics and politics in social research</b>	<b>106</b>
6.1	Introduction	107
6.2	Existing ethical guidance	107
	Guidance from professional associations	107
	Guidance from your institution	108
6.3	Thinking about ethics in social research	109
	The difficulties of discussing ethics	110
	Stances on ethics	111
6.4	Ethical principles for conducting social research	113
	Avoidance of harm for participants	113
	Avoidance of harm for researchers	117
	Informed consent	117
	Privacy	120
	Deception	125

6.5 The difficulties of ethical decision-making	126
Ethical dilemmas	126
Ethical issues for secondary data	128
Ethical issues for online data	128
Ethical issues for visual data	130
6.6 Politics in social research	130
Taking sides in research	131
Funding of research	133
Gaining access	134
Working with and within a research setting	134
Working in a team	134
Publishing findings	135
Method and expertise	135
<i>Key points</i>	135
<i>Questions for review</i>	136

## PART TWO QUANTITATIVE RESEARCH 139

<b>Chapter 7 The nature of quantitative research</b>	<b>141</b>
7.1 Introduction	142
7.2 What is quantitative research?	142
7.3 The main preoccupations of quantitative researchers	144
Measurement	144
Causality	144
Generalization	144
Replication	145
7.4 The main steps in quantitative research	146
7.5 Concepts and their measurement	150
What is a concept?	150
Why measure?	150
How do we measure?	151
Dimensions of concepts	152
7.6 Reliability and validity of measures	154
Reliability	154
Validity	155
Reflections on reliability and validity	159
7.7 The critique of quantitative research	159
Treating the social world the same as 'the world of nature'	159
An artificial measurement process	159
<i>Limited connection to everyday life</i>	159
A static view of social life	160
The feminist critique	160
7.8 From theory to practice	161
Reverse operationism	161
Reliability and validity testing	161
Sampling	162
<i>Key points</i>	162
<i>Questions for review</i>	162

<b>Chapter 8</b>	<b>Sampling in quantitative research</b>	164
	8.1 Introduction	165
	8.2 What is sampling?	166
	8.3 Sampling error	169
	8.4 Probability sampling	171
	Types of probability sample	171
	The qualities of a probability sample	174
	8.5 Types of non-probability sampling	176
	Convenience sampling	176
	Snowball sampling	177
	Quota sampling	178
	8.6 Sample size	180
	Absolute and relative sample size	180
	Time and cost	181
	Non-response	181
	Heterogeneity of the population	183
	Kind of analysis	184
	8.7 Sampling issues in online surveys	184
	8.8 Limits to generalization	187
	8.9 Error in survey research and the role of sampling	187
	<i>Key points</i>	188
	<i>Questions for review</i>	189
<b>Chapter 9</b>	<b>Structured interviewing</b>	190
	9.1 Introduction	191
	9.2 The structured interview	191
	Advantages of the structured interview	191
	Other types of interview	193
	9.3 Interview contexts	193
	In person, video interview, or telephone?	193
	Computer-assisted interviewing	195
	More than one interviewee	196
	9.4 Preparing to conduct a structured interview	197
	Approaching interviewees	197
	Knowing the schedule	197
	Question wording	198
	Question order	199
	Training and supervision	201
	9.5 Conducting a structured interview	203
	Building rapport	204
	Asking questions	204
	Recording answers	205
	9.6 Ending a structured interview	206
	9.7 Problems with structured interviewing	206
	Characteristics of interviewers	206
	Response sets	206
	The problem of meaning	208
	<i>Key points</i>	208
	<i>Questions for review</i>	208

<b>Chapter 10</b>	<b>Self-completion questionnaires</b>	210
	10.1 Introduction	211
	10.2 Different forms of self-completion questionnaires	211
	10.3 Comparing self-completion questionnaires with structured interviews	211
	Advantages of self-completion questionnaires compared with structured interviews	212
	Disadvantages of self-completion questionnaires compared with structured interviews	213
	10.4 Designing a self-completion questionnaire	217
	Consider presentation and layout	217
	Provide clear instructions about how to respond	218
	Keep question and answers together	220
	10.5 Email and online surveys	221
	Email surveys	221
	Online surveys	222
	10.6 Mixed modes of administering surveys	223
	10.7 Choosing which mode to use to administer your survey	226
	10.8 Diaries as a form of self-completion questionnaire	228
	10.9 Experience and event sampling	232
	<i>Key points</i>	233
	<i>Questions for review</i>	233
<b>Chapter 11</b>	<b>Asking questions</b>	234
	11.1 Introduction	235
	11.2 Question formats: open- or closed-ended?	235
	Open-ended questions	235
	Closed-ended questions	237
	11.3 Types of questions	240
	Personal factual questions	240
	Factual questions about others	240
	Informant factual questions	240
	Questions about attitudes	240
	Questions about beliefs	240
	Questions about normative standards and values	241
	Questions about knowledge	241
	Choosing the right types of question	241
	11.4 Vignette questions	242
	11.5 Rules for designing questions	243
	<i>General principles</i>	244
	DOs when designing questions	244
	DON'Ts when designing questions	246
	11.6 Piloting and pre-testing questions	250
	11.7 Using existing questions	251
	<i>Key points</i>	252
	<i>Questions for review</i>	253
<b>Chapter 12</b>	<b>Structured observation</b>	255
	12.1 Introduction	256
	12.2 Why observe behaviour?	256
	12.3 Conducting structured observation	258
	The observation schedule	259

Strategies for observing behaviour	261
Sampling for an observation	262
12.4 Field stimulations as a form of structured observation	263
12.5 Analysing structured observation data	264
12.6 Evaluating structured observation	265
Advantages of structured observation	265
Challenges of structured observation	265
<i>Key points</i>	268
<i>Questions for review</i>	268
<b>Chapter 13 Content analysis</b>	<b>270</b>
13.1 Introduction	271
13.2 What is content analysis?	271
13.3 Conducting content analysis	273
Determining the focus	273
Selecting a sample	273
Deciding what to count	276
Devising a coding scheme	279
13.4 Content analysis of particular types of data	284
Content analysis of online data	285
Content analysis of visual materials	288
13.5 Evaluating content analysis	290
Advantages of content analysis	290
Disadvantages of content analysis	291
<i>Key points</i>	291
<i>Questions for review</i>	292
<b>Chapter 14 Using existing data</b>	<b>293</b>
14.1 Introduction	294
14.2 Secondary analysis of other researchers' data	294
Advantages of secondary analysis	295
Limitations of secondary analysis	298
Accessing data archives	298
14.3 Meta-analysis	303
14.4 Official statistics	305
Advantages of official statistics	305
Limitations of official statistics	305
14.5 Big Data	310
<i>Key points</i>	313
<i>Questions for review</i>	314
<b>Chapter 15 Quantitative data analysis</b>	<b>315</b>
15.1 Introduction	316
15.2 Approaching quantitative data analysis	317
15.3 An example of a small research project	318
15.4 Types of variable	323
15.5 Univariate analysis	325
Frequency tables	325
Diagrams	326
Measures of central tendency	331
Measures of dispersion	331
Boxplots: displaying both central tendency and dispersion	332

15.6	Bivariate analysis	333
	Relationships, not causality	333
	Contingency tables	334
	Line graphs	334
	Pearson's $r$	335
	Spearman's rho	336
	Phi and Cramér's $V$	337
	Comparing means and eta	337
15.7	Multivariate analysis	338
	Could the relationship be spurious?	338
	Could there be an intervening variable?	338
	Could a third variable moderate the relationship?	338
	Multiple regression	339
15.8	Statistical significance	339
	The chi-square test	342
	Correlation and statistical significance	343
	Comparing means and statistical significance	344
	<i>Key points</i>	344
	<i>Questions for review</i>	344

## **PART THREE QUALITATIVE RESEARCH**

**347**

<b>Chapter 16</b>	<b>The nature of qualitative research</b>	<b>349</b>
16.1	Introduction	350
16.2	What is qualitative research?	350
	Traditions and perspectives in qualitative research	351
	Data-collection methods in qualitative research	352
16.3	The main preoccupations of qualitative researchers	353
	Seeing through the eyes of the people being studied	354
	The importance of context	355
	Emphasis on process	355
	Flexibility	357
	Concepts and theory that are grounded in data	357
16.4	The main steps in qualitative research	358
	Step 1. General research question(s)	358
	Step 2. Selection of relevant site(s) and subjects	359
	Step 3. Collection of relevant data	359
	Step 4. Interpretation of data	359
	Step 5. Conceptual and theoretical work	359
	Steps 5a and 5b. Tighter specification of the research question(s) and collection of further data	359
	Step 6. Writing up findings/conclusions	360
16.5	Theory and concepts in qualitative research	361
16.6	Research quality and qualitative research	362
	The use of reliability and validity in qualitative research	363
	Alternative criteria for evaluating qualitative research	363
	Between quantitative and qualitative research criteria	366
	Overview of the issue of quality criteria	369
16.7	The critique of qualitative research	369
	Too subjective	369
	Difficult to replicate	369

Problems of generalization	370
Lack of transparency	370
16.8 From theory to practice	371
16.9 Comparing quantitative and qualitative research	372
Differences between quantitative and qualitative research	372
Similarities between quantitative and qualitative research	373
<i>Key points</i>	374
<i>Questions for review</i>	375
<b>Chapter 17 Sampling in qualitative research</b>	<b>376</b>
17.1 Introduction	377
17.2 Levels of sampling	377
17.3 What is purposive sampling?	378
17.4 Common forms of purposive sampling	380
Theoretical sampling	380
Generic purposive sampling	382
Snowball sampling	383
17.5 Key considerations for sampling in qualitative research	385
Sample size	386
Sampling contexts as well as people	388
Using more than one sampling approach	388
<i>Key points</i>	389
<i>Questions for review</i>	389
<b>Chapter 18 Ethnography and participant observation</b>	<b>391</b>
18.1 Introduction	392
18.2 What are ethnography and participant observation?	392
18.3 Doing ethnography	393
Gaining access to a research setting	393
The roles of the ethnographic researcher	399
Taking field notes	403
Bringing ethnographic research to an end	407
18.4 Writing ethnography	408
18.5 Reflecting on ethnography	410
Newer forms of ethnography	410
Can there be a feminist ethnography?	419
The changing nature of ethnography	420
<i>Key points</i>	421
<i>Questions for review</i>	422
<b>Chapter 19 Interviewing in qualitative research</b>	<b>424</b>
19.1 Introduction	425
19.2 The qualitative interview	425
Qualitative interviews vs structured interviews	425
Types of qualitative interview	425
19.3 Preparing to conduct a qualitative interview	427
Semi-structured or unstructured interview?	428
Preparing an interview guide	428
Practical preparations	431
19.4 Conducting a qualitative interview	431
Qualities of an effective interviewer	432

Using an interview guide	433
Methods of interviewing	436
Recording and transcription	441
19.5 Ending a qualitative interview	444
19.6 Life history and oral history interviewing	445
Life history interviews	445
Oral history interviews	446
19.7 Evaluating qualitative interviewing	446
<i>Key points</i>	450
<i>Questions for review</i>	450
<b>Chapter 20 Focus groups</b>	452
20.1 Introduction	453
20.2 What is a focus group?	453
Exploring how people construct meaning through social interactions	454
Using group dynamics to obtain better data	454
Giving participants freedom to shape the discussion	455
20.3 Conducting focus groups	456
Number of groups	456
Size of groups	457
Level of moderator involvement	457
Selecting participants	459
Asking questions	462
Beginning and finishing	463
Recording and transcription	464
20.4 Group interaction in focus group sessions	465
Complementary and argumentative interactions	465
Analysing group interactions	467
20.5 Online focus groups	467
Synchronous and asynchronous groups	467
Conducting an online focus group	468
Advantages and disadvantages of online focus groups	468
20.6 Limitations of focus groups	472
<i>Key points</i>	474
<i>Questions for review</i>	474
<b>Chapter 21 Language in qualitative research</b>	476
21.1 Introduction	477
21.2 Conversation analysis	477
What is conversation analysis?	477
Principles of conversation analysis	478
Transcription and attention to detail	479
Basic tools of conversation analysis	480
Evaluating conversation analysis	481
21.3 Discourse analysis	484
What is discourse analysis?	484
Aims of discourse analysis	487
Critical discourse analysis	492
Evaluating discourse analysis	492

21.4 Overview of language analysis in qualitative research	495
<i>Key points</i>	495
<i>Questions for review</i>	496
<b>Chapter 22 Documents as sources of data</b>	<b>497</b>
22.1 Introduction	498
22.2 The nature of 'documents'	498
22.3 Personal documents	498
Diaries, letters, and autobiographies	499
Visual objects	501
22.4 Official documents	506
Official documents produced by the state	506
Official documents from private sources	506
22.5 Mass-media documents	509
22.6 Digital media	510
Websites	510
Blogs and vlogs	510
Chatrooms, forums, and online communities	510
Social media	512
22.7 Interpreting documents	514
Do documents reflect reality?	514
Approaches to interpreting documents	516
22.8 An overview of documentary research	520
<i>Key points</i>	521
<i>Questions for review</i>	522
<b>Chapter 23 Qualitative data analysis</b>	<b>523</b>
23.1 Introduction	524
23.2 An overview of qualitative data analysis	524
23.3 Analytic induction	524
23.4 Grounded theory	526
Tools of grounded theory	526
Coding in grounded theory	528
Processes and outcomes of grounded theory	529
Criticisms of grounded theory	532
23.5 Coding qualitative data	533
How to code qualitative data	534
Problems with coding qualitative data	535
23.6 Thematic analysis	537
<i>The Framework approach to thematic analysis</i>	538
How to identify themes using the Framework approach	538
Thematic analysis as the basis for a generic approach to qualitative data analysis	540
23.7 Narrative analysis	541
Features of narrative analysis	541
Criticisms of narrative analysis	543
23.8 Synthesizing qualitative studies	545
Meta-ethnography	545
Thematic synthesis	546
23.9 Computer-assisted qualitative data analysis software (CAQDAS)	547

The increasing use of CAQDAS	548
Evaluating CAQDAS	548
Should you use CAQDAS?	551
<i>Key points</i>	551
<i>Questions for review</i>	551

## **PART FOUR MIXED METHODS RESEARCH AND WRITING UP** **553**

<b>Chapter 24 Mixed methods research</b>	<b>555</b>
24.1 Introduction	556
24.2 Why mix methods?	556
Triangulation	556
Completeness	558
Sampling	559
Enhancement	561
24.3 How definitive is the quantitative/qualitative divide?	562
Epistemological and ontological positions	563
The 'divisions' between quantitative and qualitative research	565
24.4 Types of mixed methods research	567
The convergent design	567
The explanatory sequential design	568
The exploratory sequential design	569
24.5 Conducting mixed methods research	571
What is the added value of using mixed methods?	571
Is the research design appropriate for the research question(s)?	572
How will the data be integrated?	572
Are the ethical procedures thorough for both methods?	573
Is the project doable within the time frame?	573
Further considerations	573
<i>Key points</i>	575
<i>Questions for review</i>	575
<b>Chapter 25 Writing up social research</b>	<b>577</b>
25.1 Introduction	578
25.2 Tips for a successful write-up	578
Start early	578
Structure your writing	579
Be persuasive	580
Signpost your work	581
Justify your decisions	581
Maintain an argument	581
Get to know your institution's writing conventions and expectations	581
Avoid discriminatory language	583
Get feedback	583
Fulfil your obligations	584
25.3 How to structure your write-up	584
Title page	584
Acknowledgements	585
List of contents	586
Abstract	586

Introduction	586
Literature review	586
Research methods	586
Results	587
Discussion	589
Conclusion	590
Appendices	590
References	590
25.4 Writing up quantitative, qualitative, and mixed methods research	590
Writing up quantitative research	591
Writing up qualitative research	594
Writing up mixed methods research	598
<i>Key points</i>	602
<i>Questions for review</i>	603
Glossary	604
References	617
Name index	647
Subject index	652
