

## TABLE OF CONTENTS

<b>Chapter 1</b>	
<b>Introduction . . . . .</b>	<b>1</b>
<b>Chapter 2</b>	
<b>Solubility Studies of PAH in Water . . . . .</b>	<b>13</b>
I. General Solution Theory . . . . .	13
II. Experimentally Determined Solubilities . . . . .	14
A. Preparation of a Saturated Solution of PAH in Water . . . . .	14
B. Analytical Determination of Solubilities . . . . .	20
III. Application of Solubility Data to Environmental Systems . . . . .	22
<b>Chapter 3</b>	
<b>Sampling and Preconcentration . . . . .</b>	<b>25</b>
I. Introduction . . . . .	25
II. Collection and Storage of Water Samples . . . . .	25
III. Solid Adsorbents . . . . .	26
A. Tenax-GC® . . . . .	26
B. Amberlite® Resins . . . . .	27
C. Open Pore Polyurethane . . . . .	39
D. Carbon . . . . .	42
IV. Liquid Extraction . . . . .	44
V. Coupled Column Liquid Chromatography . . . . .	51
VI. Headspace Extraction . . . . .	55
VII. Thermal Desorption . . . . .	59
VIII. Steam Distillation . . . . .	62
IX. Analysis of Heavily Contaminated Environmental Samples . . . . .	62
X. Summary and Outlook . . . . .	70
<b>Chapter 4</b>	
<b>Chromatographic Methods of Analysis for PAH . . . . .</b>	<b>73</b>
I. Introduction . . . . .	73
II. Fractionation and Cleanup Procedures . . . . .	73
A. Introduction . . . . .	73
B. Thin Layer Chromatographic Methods . . . . .	74
C. Column Chromatographic Methods . . . . .	75
III. Thin Layer Chromatography . . . . .	79
A. Separation Studies . . . . .	79
B. Methods of Detection . . . . .	81
C. Future Trends . . . . .	84

IV.	High Performance Liquid Chromatography . . . . .	84
A.	Introduction . . . . .	84
B.	Separation Studies . . . . .	84
1.	Introduction . . . . .	84
2.	Reversed Phase High Performance Liquid Chromatographic Separations of PAH-C <sub>18</sub> Bonded Phases . . . . .	86
3.	Alternative Reversed Phase Systems . . . . .	96
4.	Normal Phase PAH Separations . . . . .	99
C.	Methods of Detection . . . . .	103
D.	Future Outlook . . . . .	112
V.	Gas Chromatography . . . . .	115
A.	Introduction . . . . .	115
B.	Packed Column Separations . . . . .	116
1.	Introduction . . . . .	116
2.	Practical Considerations . . . . .	116
3.	Dexsil® 300 Separations . . . . .	117
4.	Liquid Crystal Stationary Phases . . . . .	121
C.	Capillary Column Gas Chromatography . . . . .	124
1.	Introduction . . . . .	124
2.	Deactivation of Glass Capillary Columns . . . . .	128
3.	Separations of PAH . . . . .	132
D.	Methods of Detection . . . . .	141
E.	Gas Chromatographic Detection with a Mass Spectrometer . . . . .	146
VI.	Summary . . . . .	151
<b>Chapter 5</b>		
Spectroscopic Methods of Analysis for PAH . . . . .		153
I.	Introduction . . . . .	153
II.	Room Temperature Phosphorimetry . . . . .	153
III.	Synchronous Luminescence Spectroscopy . . . . .	154
IV.	Matrix Isolation Fluorescence and Infrared Analysis . . . . .	158
V.	Low Temperature Fluorescence--The Shpol'skii Effect . . . . .	161
VI.	Developments in Fluorescence Spectroscopy Applied to PAH . . . . .	166
VII.	Derivative and Wavelength Modulation Techniques in Spectroscopy . . . . .	168
A.	Derivative Spectroscopy . . . . .	168
B.	Wavelength Modulation Techniques . . . . .	169
<b>Chapter 6</b>
