Preface	xiii
Acknowledgments	xiv
Contributors	xv
1. Introduction: Practical Guide, OCT for Glaucoma	1
<i>Jullia A. Rosdahl</i>	
1.1 Introduction	1
1.2 Overview of the Guide	1
1.2.1 Development of OCT	1
1.2.2 OCT of the Optic Nerve	1
1.2.3 OCT of the Macula	1
1.2.4 Illustrative Case Examples	1
1.2.5 Structure–Function Relationship ...	1
1.2.6 Comparison of Common Devices ...	2
1.2.7 Artifacts and Masqueraders	2
1.2.8 Anterior Segment OCT in Glaucoma ..	2
1.2.9 Special Considerations: OCT in Childhood Glaucoma	2
1.2.10 Special Considerations: High Refractive Errors	2
1.2.11 Future Directions: OCT Angiography for Glaucoma	2
1.2.12 Future Directions: Swept-Source OCT for Glaucoma ...	2
1.2.13 Future Directions: Artificial Intelligence Applications	2
1.3 How to Use the Guide	2
1.4 Conclusion	3
2. Development of Optical Coherence Tomography	4
<i>Joel S. Schuman and Rachel A. Downes</i>	
2.1 Introduction	4
2.2 Setting the Stage: Lasers Meet Medicine	4
2.2.1 Light in Flight	4
2.2.2 Interferometry	5
2.2.3 The Pivotal Role of Collaboration ...	6
2.3 Optical Coherence Tomography: The Debut	6
2.3.1 OCT versus Ultrasound	6
2.3.2 How OCT Works	7
2.3.3 The First OCT Images	8
2.3.4 Providing Clinical Value	8
2.4 Commercialization	9
2.4.1 From the Bench to the Bedside: The Need for Speed	9
2.4.2 The First Commercial OCT	9
2.4.3 OCT Instrument Design	10
2.5 The Fourier Switch	10
2.5.1 Spectral Domain OCT	10
2.5.2 Swept-Source OCT	11
2.6 OCT-Angiography	14
2.7 Impact	14
2.7.1 Financial	14
2.7.2 Scientific and Clinical	15

3.	Optical Coherence Tomography of the Optic Nerve.....	16
	<i>Andrew Williams and Jullia A. Rosdahl</i>	
3.1	Introduction	16
3.1.1	Glaucoma Imaging.....	16
3.1.2	Optical Coherence Tomography ...	16
3.2	OCT Output	21
3.2.1	Overview	21
3.2.2	OCT Interpretation.....	25
3.3	Utility of OCT in Glaucoma Management.....	29
3.3.1	Reproducibility	29
3.3.2	Reliability	30
3.3.3	Progression Analysis	30
3.3.4	Diagnostic Accuracy.....	33
3.3.5	Correlation with Patient-Centered Outcomes	33
3.4	Limitations and Pitfalls.....	33
3.4.1	Common Artifacts	33
3.4.2	Pitfalls	34
3.4.3	Green and Red Disease	34
3.4.4	Limitations.....	34
3.5	Future Directions	36
3.6	Conclusions	36
4.	Optical Coherence Tomography of the Macula.....	38
	<i>Divakar Gupta</i>	
4.1	Retinal Imaging for Glaucoma ..	38
4.1.1	Glaucoma and Retinal Ganglion Cells	38
4.1.2	RGCs and the Macula.....	39
4.2	OCT Image of the Macula	40
4.2.1	Devices and Segmentation.....	40
4.2.2	Correlation between Visual Field and Macular OCT	41
4.2.3	Complementing Peripapillary RNFL Scans with Macular OCT Scans....	41
4.2.4	Asymmetry Analysis	42
4.3	Macular OCT and Glaucoma Management.....	42
4.3.1	Diagnosis and Progression.....	42
4.3.2	Barriers to Proper OCT Interpretation	43
4.3.3	Practical Uses of Macular OCT	44
4.4	Artifacts.....	46
4.4.1	Vitreous Traction/Adherence	46
4.4.2	Cystic Changes.....	47
4.4.3	Epiretinal Membranes.....	47
4.4.4	Retinal Atrophy.....	47
4.4.5	Other Macular Pathologies	48
4.4.6	Myopia.....	48
4.4.7	Active Uveitis.....	49
4.4.8	Acquisition Artifacts	49
4.5	OCT Angiography	49
4.6	Conclusions	49
5.	Illustrative Case Examples.....	51
	<i>Jullia A. Rosdahl, Ahmad A. Aref, Lawrence S. Geyman, Teresa C. Chen, Catherine M. Marando, Elli Park, Ki Ho Park, Yong Woo Kim, Hana L. Takusagawa, Atalie Carina Thompson, Andrew Williams, and Ian Conner</i>	
5.1	Overview.....	51
5.2	Early (Preperimetric) Glaucoma	51

5.3	Mild-to-Moderate Glaucoma...	51	5.5	Glaucoma that Is Progressing..	58
5.4	Severe Glaucoma.....	58	5.6	Conclusions	69
5.4.1	Severe Stage Glaucoma, due to Significant Visual Field Constriction.....	58			
6.	Structure–Function Relationship	73			
	<i>Felipe A. Medeiros</i>				
6.1	Introduction	73	6.2.1	Does OCT Damage Precede Visual Field Loss in Glaucoma?	75
6.2	Mapping Structural to Functional Loss in Glaucoma ...	73	6.2.2	How Are Structural Changes Linked to Functional Changes in Glaucoma?	80
7.	Comparison of Common Devices	85			
	<i>Lawrence S. Geyman and Ahmad A. Aref</i>				
7.1	Retinal Nerve Fiber Layer Thickness	85	7.3	Macula	101
7.1.1	Cirrus 6000 (Carl Zeiss Meditec AG, Jena, Germany)	85	7.3.1	Cirrus 6000 (Carl Zeiss Meditec AG, Jena, Germany)	101
7.1.2	Spectralis (Heidelberg Engineering GmbH, Heidelberg, Germany).....	91	7.3.2	Spectralis (Heidelberg Engineering, Inc., Heidelberg, Germany)	103
7.1.3	Avanti RTVue XR (Optovue, Inc., Fremont, CA, USA)	94	7.3.3	Avanti RTVue XR (Optovue, Inc., Fremont, CA, USA)	105
7.1.4	3D OCT (Topcon Corporation, Tokyo, Japan).....	95	7.3.4	3D OCT (Topcon Corporation, Tokyo, Japan).....	106
7.2	Optic Nerve Head	98	7.4	Progression Analysis	106
7.2.1	Cirrus 6000 (Carl Zeiss Meditec AG, Jena, Germany)	98	7.4.1	Cirrus 6000 (Carl Zeiss Meditec AG, Jena, Germany)	106
7.2.2	Spectralis (Heidelberg Engineering, Inc., Heidelberg, Germany)	99	7.4.2	Spectralis (Heidelberg Engineering, Inc., Heidelberg, Germany)	107
7.2.3	Avanti RTVue XR (Optovue, Inc., Fremont, CA, USA)	100	7.4.3	Avanti RTVue XR (Optovue, Inc., Fremont, CA, USA)	107
7.2.4	3D OCT (Topcon Corporation, Tokyo, Japan).....	100	7.4.4	3D-OCT (Topcon Corporation, Tokyo, Japan).....	109
8.	Artifacts and Masqueraders.....	111			
	<i>Teresa C. Chen, Catherine M. Marando, and Elli Park</i>				
8.1	Incidence of Artifacts in OCT Imaging.....	111	8.2	Etiologies of Peripapillary RNFL OCT Artifacts.....	111

Contents

8.2.1	Artifacts from Errors in Scan Acquisition	111	8.3.2	Macular Asymmetry Analysis Artifacts.....	123
8.2.2	Artifacts in Boundary Segmentation	116	8.4	OCT Diseases.....	125
8.2.3	Artifacts due to Ocular Pathology Unrelated to Glaucoma	119	8.4.1	Red Disease	126
8.2.4	Artifacts due to Differences in OCT Machines	122	8.4.2	Green Disease	129
8.3	Etiologies of ONH and Macula Artifacts.....	122	8.5	A Relevant Summary of OCT Artifacts for Technicians	129
8.3.1	Bruch's Membrane Opening–Minimum Rim Width Artifacts	123	8.6	Future Directions	130
			8.6.1	Three-Dimensional Parameters	130
			8.6.2	OCT Angiography	130
9.	Anterior Segment Optical Coherence Tomography in Glaucoma	132			
	<i>Ying Han and Julius Oatts</i>				
9.1	Introduction to Anterior-Segment OCT	132	9.4.2	Primary Angle Closure Glaucoma (PACG)	134
9.2	Different AS-OCT Modalities and Systems	132	9.4.3	AS-OCT Following Laser Peripheral Iridotomy (LPI)	135
9.3	AS-OCT Identification of Anterior Segment Structures and Parameters	133	9.4.4	AS-OCT Following Dilation	137
			9.4.5	AS-OCT Following Lens Extraction.....	137
9.4	AS-OCT in Different Glaucomatous Conditions....	134	9.4.6	Other Glaucomatous Conditions	138
9.4.1	Primary Angle Closure Suspect (PACS)	134	9.5	AS-OCT in Postoperative Care	138
			9.6	AS-OCT in Additional Glaucoma-Related Situations	138
			9.7	Conclusions	139
10.	Special Considerations: OCT in Childhood Glaucoma	141			
	<i>Tanya S. Glaser, Michael P. Kelly, Mays A. El-Dairi, and Sharon F. Freedman</i>				
10.1	Introduction	141	10.3.3	Structural Considerations for Image Acquisition.....	143
10.2	Handheld and Portable OCT Imaging Modalities	141	10.4	Interpreting OCT Images in Pediatric Glaucoma	143
10.3	Image Acquisition.....	142	10.4.1	Optical and Anatomic Considerations for Image Acquisition and Interpretation..	143
10.3.1	How OCT Can be Used during Examination Under Anesthesia .	142	10.4.2	Comparing to a Normative Database	145
10.3.2	Tabletop OCT for Children	142			

10.4.3	OCT Changes in Childhood Glaucoma	145	10.6	Imaging Guidelines and Recommended Frequency of Imaging	150
10.4.4	Postoperative Changes in OCT ..	148			
10.5	Pitfalls and Masqueraders of Pediatric Glaucoma	149			
11.	Special Considerations: High Refractive Errors	152			
	<i>Ki Ho Park and Yong Woo Kim</i>				
11.1	Introduction	152	11.2.4	Normative Database	154
11.2	Technical Issues of OCT that Need to be Considered in High Myopia.....	152	11.2.5	Segmentation Errors	157
11.2.1	Scan-Circle Size: Ocular Magnification Error	152	11.3	Glaucoma Diagnosis in High Myopia.....	159
11.2.2	Scan-Circle Size: Pathologies Influencing the Scan Circle	153	11.3.1	Macular Parameters for Glaucoma Diagnosis	159
11.2.3	Scan-Circle Location: Effect of Major Vessels in Tilted Discs	154	11.3.2	Neuroretinal Rim Parameters for Glaucoma Diagnosis	159
			11.3.3	All at One Glance: 3D Wide-Field Map in SS-OCT	161
12.	Future Directions: Optical Coherence Tomography Angiography for Glaucoma	165			
	<i>Darrell WuDunn</i>				
12.1	Introduction	165	12.3	OCTA of the Macular Microvasculature	169
12.1.1	The Role of Ocular Blood Flow in Glaucoma	165	12.3.1	OCTA of the Normal Macular Microvasculature	169
12.1.2	Optical Coherence Tomography Angiography Technology	165	12.3.2	OCTA of Macular Microvasculature in Glaucoma.....	172
12.2	OCTA of the Optic Nerve Head and Peripapillary Microvasculature	168	12.4	OCTA of the Choroid	173
12.2.1	OCTA of the Optic Nerve Head Microvasculature in Normal Eyes	168	12.4.1	OCTA of the Normal Choroid....	173
12.2.2	OCTA of the Optic Nerve and Peripapillary Microvasculature in Glaucoma.....	169	12.4.2	OCTA of the Choroid in Glaucoma	174
			12.5	OCTA in the Future.....	174

13. Future Directions: Swept-Source OCT for Glaucoma	176
<i>Hana L. Takusagawa and Elizabeth Ann Zane Cretara</i>	
13.1 Introduction	176
13.2 Imaging of Intraocular Structures Using SS-OCT in Glaucoma	176
13.2.1 Anterior Segment Application of SS-OCT in Glaucoma	177
13.2.2 Analysis of Macular and Peripapillary Retina by SS-OCT	178
13.2.3 Choroidal Application of SS-OCT in Glaucoma.....	179
13.2.4 Optic Nerve Head Application of SS-OCT in Glaucoma	180
13.2.5 Lamina Cribrosa Application of SS-OCT in Glaucoma	180
13.3 Future Research in SS-OCT for Evaluation of Glaucoma	181
13.4 Conclusions	181
14. Future Directions: Artificial Intelligence Applications	183
<i>Atalie Carina Thompson</i>	
14.1 Introduction	183
14.2 Artificial Intelligence.....	184
14.2.1 Development of a Deep Learning Algorithm.....	184
14.2.2 Deep Learning Algorithms to Diagnose Glaucoma on SD-OCT	185
14.2.3 Deep Learning Algorithms Trained to Assess Color Fundus Photos Using SD-OCT	187
14.2.4 Limitations.....	188
14.2.5 Future Directions	189
Index	191
