Preface .....	xi
Acknowledgements .....	xiii
Authors.....	xv
<b>Chapter 1 Getting Started with Energy Simulation.....</b>	<b>1</b>
Building Energy Simulation .....	1
What Is Needed for Energy Simulation .....	1
How Simulation Software Works.....	2
Tutorial 1.1 Opening and Simulating an Example File .....	3
Tutorial 1.2 Creating a Single-Zone Model.....	17
Tutorial 1.3 Evaluating the Impact of Building Location and Orientation .....	32
Tutorial 1.4 Evaluating the Impact of Opaque Envelope Components.....	44
Tutorial 1.5 Evaluating the Impact of WWR and Glass Type.....	53
Tutorial 1.6 Evaluating the Impact of Occupancy Density .....	70
Tutorial 1.7 Evaluating the Impact of Space Activity .....	74
Tutorial 1.8 Evaluating the Impact of Lighting and Equipment Power .....	82
Tutorial 1.9 Evaluating the Impact of Daylight Controls.....	85
Tutorial 1.10 Evaluating the Impact of Setpoint Temperature .....	93
Tutorial 1.11 Evaluating the Impact of Fresh Air Supply Rate.....	96
<b>Chapter 2 Geometry of Buildings .....</b>	<b>99</b>
Tutorial 2.1 Defining Thermal Zoning for a Building .....	100
Tutorial 2.2 Evaluating the Effect of a Zone Multiplier .....	108
Tutorial 2.3 Evaluating the Impact of the Aspect Ratio.....	113
Tutorial 2.4 Evaluating the Impact of Adjacency of the Surface.....	122
<b>Chapter 3 Material and Construction.....</b>	<b>129</b>
Tutorial 3.1 Evaluating the Effect of Lightweight and Heavyweight Construction .....	130
Tutorial 3.2 Evaluating the Impact of Roof Insulation .....	144
Tutorial 3.3 Evaluating the Impact of the Position of Roof Insulation .....	152
Tutorial 3.4 Evaluating the Impact of the Air Gap between Roof Layers .....	156
Tutorial 3.5 Evaluating the Impact of Surface Reflectance .....	161
Tutorial 3.6 Evaluating the Impact of Roof Underdeck Radiant Barrier .....	168
Tutorial 3.7 Evaluating the Impact of a Green Roof.....	173
Tutorial 3.8 Evaluating the Impact of Phase-Change Material (PCM) in an External Wall .....	178
<b>Chapter 4 Openings and Shading .....</b>	<b>199</b>
Tutorial 4.1 Evaluating the Impact of Window-to-Wall Ratio and Glazing Type.....	200

Tutorial 4.2 Evaluating the Impact of Overhangs and Fins .....	213
Tutorial 4.3 Evaluating the Impact of Internal Operable Shades .....	226
Tutorial 4.4 Evaluating the Impact of Electrochromic Switchable Glazing on Windows' Solar Gains .....	238
<b>Chapter 5 Lighting and Controls .....</b>	<b>247</b>
Tutorial 5.1 Evaluating the Impact of Daylighting-Based Controls .....	248
Tutorial 5.2 Evaluating the Impact of Daylight Sensor Placement .....	253
Tutorial 5.3 Evaluating the Impact of Window External Shades and WWR on Daylight Performance .....	267
<b>Chapter 6 Heating and Cooling Design .....</b>	<b>279</b>
Tutorial 6.1 Evaluating the Impact of Temperature Control Types.....	280
Tutorial 6.2 Evaluating the Impact of Design Day Selection .....	294
Tutorial 6.3 Evaluating the Impact of the Airflow Calculation Method .....	301
<b>Chapter 7 Unitary HVAC Systems .....</b>	<b>307</b>
Tutorial 7.1 Evaluating the Impact of Unitary Air-Conditioner Coefficient of Performance (COP).....	308
Tutorial 7.2 Evaluating the Impact of Fan Efficiency of a Unitary Air-Conditioning System .....	314
Tutorial 7.3 Evaluating the Impact of Fan Pressure Rise .....	324
Tutorial 7.4 Evaluating the Impact of Heat Pumps on Heating Energy Consumption .....	328
<b>Chapter 8 Heating, Ventilation and Air Conditioning: Central Water Side .....</b>	<b>343</b>
Tutorial 8.1 Evaluating the Impact of Air- and Water-Cooled Chillers.....	344
Tutorial 8.2 Evaluating the Impact of a Variable-Speed Drive (VSD) on a Chiller .....	354
Tutorial 8.3 Evaluating the Impact of VSD on a Chilled-Water Pump .....	364
Tutorial 8.4 Evaluating the Impact of a Cooling Tower Fan Type .....	369
Tutorial 8.5 Evaluating the Impact of a Condenser Water Pump with a VSD .....	373
Tutorial 8.6 Evaluating the Impact of Boiler Nominal Thermal Efficiency .....	378
Tutorial 8.7 Evaluating the Impact of Chiller Sequencing .....	381
Tutorial 8.8 Evaluating the Impact of Thermal Storage and Time-of-Use Tariffs .....	397
<b>Chapter 9 Heating, Ventilation and Air Conditioning: Central Air Side .....</b>	<b>421</b>
Tutorial 9.1 Evaluating the Impact of an Air-Side Economiser .....	422
Tutorial 9.2 Evaluating the Impact of Supply Air Fan Operating Mode during Unoccupied Hours .....	426
Tutorial 9.3 Evaluating the Impact of Heat Recovery between Fresh and Exhaust Air .....	431

Tutorial 9.4 Evaluating the Impact of a Variable-Refrigerant-Flow (VRF) System .....	437
Tutorial 9.5 Evaluating the Impact of Demand Control Ventilation.....	468
<b>Chapter 10 Natural Ventilation .....</b>	<b>481</b>
Tutorial 10.1 Evaluating the Impact of Wind Speed on Natural Ventilation .....	482
Tutorial 10.2 Evaluating the Impact of Natural Ventilation with Constant Wind Speed and Direction.....	492
Tutorial 10.3 Evaluating the Impact of a Window Opening and Closing Schedule.....	503
Tutorial 10.4 Evaluating the Impact of Window Opening Control Based on Temperature.....	507
Tutorial 10.5 Evaluating the Impact of Window Opening Area Modulation on Natural Ventilation .....	526
Tutorial 10.6 Evaluating the Impact of Mixed-Mode Operation .....	536
<b>Chapter 11 Simulation Parameters .....</b>	<b>547</b>
Tutorial 11.1 Evaluating the Impact of Time Steps per Hour on Run Time.....	548
Tutorial 11.2 Evaluating the Impact of the Solar Distribution Algorithm .....	552
Tutorial 11.3 Evaluating the Impact of the Solution Algorithm .....	558
Tutorial 11.4 Evaluating the Effect of the Inside Convection Algorithm .....	562
Tutorial 11.5 Evaluating the Impact of the Shadowing Interval .....	567
<b>Chapter 12 Renewable Energy System .....</b>	<b>569</b>
Tutorial 12.1 Evaluating the Impact of Photo-Voltaic (PV) Panel Tilt Angle .....	570
Tutorial 12.2 Evaluating the Impact of Shading from Rooftop PV Panels.....	581
Tutorial 12.3 Evaluating the Impact of the Cell Efficiency of PV Panels.....	593
Tutorial 12.4 Evaluating the Performance of Glazing-Integrated PV Panels .....	601
Tutorial 12.5 Evaluating the Performance of Opaque Building-Integrated PV Panels.....	607
<b>Chapter 13 Costing, Sensitivity and Uncertainty Analysis.....</b>	<b>613</b>
Tutorial 13.1 Selecting Glazing Using Cost-Benefit Analysis.....	614
Tutorial 13.2 Selecting a HVAC System Using Cost-Benefit Analysis.....	634
Tutorial 13.3 Performing Sensitivity and Uncertainty Analysis .....	653
<b>Chapter 14 Building Energy Code Compliance .....</b>	<b>673</b>
Tutorial 14.1 Modelling Building Performance in Four Orientations .....	674
Tutorial 14.2 Creating the Base-Case External Wall for ASHRAE Standard 90.1–2010, Appendix G .....	677
Tutorial 14.3 Modelling Flush Windows for the Base Case .....	680
Tutorial 14.4 Selecting a HVAC System for the Base Case.....	681
Tutorial 14.5 Calculating Fan Power for the Base Case .....	682

Tutorial 14.6 Understanding Fan Cycling.....	684
Tutorial 14.7 Specifying Room-Air-to-Supply-Air Temperature Difference .....	685
Tutorial 14.8 Number of Chillers in the Base Case .....	686
Tutorial 14.9 Defining the Chilled-Water Supply Temperature Reset for the Base Case .....	692
Tutorial 14.10 Type and Number of Boilers for the Base Case.....	694
Tutorial 14.11 Defining the Hot-Water Supply Temperature Reset.....	696
Tutorial 14.12 Hot-Water Pumps.....	698
Tutorial 14.13 Defining Exhaust Air Energy Recovery Parameters.....	700
Tutorial 14.14 Defining Economiser Parameters.....	701
Tutorial 14.15 Finding Unmet Hours after Simulation.....	702
Tutorial 14.16 Generating the Performance-Rating Method Compliance Report in DesignBuilder .....	703
Tutorial 14.17 Finding Process Load for the Base Case .....	705
Tutorial 14.18 Getting the ASHRAE 62.1 Standard Summary in DesignBuilder .....	707
Tutorial 14.19 Automating Baseline Building Model Creation .....	708
Reference .....	723
