
Table of Content

Summary.....	1
Zusammenfassung.....	2
1. Introduction.....	3
1.1. Immune system.....	3
1.1.1. Biological function and regulation Th2 of polarized CD4 ⁺ T-cells.....	5
1.1.2. Role of IL33 and its receptor ST2 in Th2 immunity.....	9
1.2. The liver.....	10
1.2.1. General pathogenesis of liver fibrosis.....	11
1.2.2. Profibrotic mechanisms of Th2 cytokines.....	12
1.2.3. The importance of the Th2 immune response for fibrosing processes in different organs.....	15
1.3. Aim of the study.....	18
2. Material and Methods.....	19
2.1. Chemicals.....	19
2.2. Solutions.....	21
2.3. Buffer recipes.....	21
2.4. Devices and Software.....	22
2.5. Consumables.....	23
2.6. Cell lines.....	24
2.6.1. HuH7 cell line.....	24
2.6.2. LX.2 cell line.....	24
2.6.3. TWNT4 cell line.....	24
2.6.4. Jurkat cell line.....	25
2.6.5. Primary hepatic stellate cells.....	25
2.6.6. Liver sinusoidal endothelial cells.....	25
2.7. Tissue and biopsies.....	26
2.8. Primary human cells.....	27
2.8.1. Isolation of liver non-parenchymatic cells (LNPCs).....	27
2.8.2. Peripheral blood mononuclear cells (PBMCs).....	27
2.8.3. Magnetic-activated cell sorting (MACS) isolation of immune cells.....	28
2.8.4. Human Serum.....	28
2.9. Quantitative Reverse Transcription Polymerase chain reaction (qRT- PCR).....	29
2.10. Immunofluorescence staining.....	31

2.11. Immunohistochemistry	31
2.12. Sirius red.....	31
2.13. Mouse models.....	33
2.13.1. Chronic DDC (0,1%) diet.....	33
2.13.2. Chronic CCl ₄ model.....	33
2.13.3. Chronic TAA model	34
2.13.4. <i>Mdr2</i> -deleted mouse model of chronic cholangitis.....	34
2.13.5. Common bile duct ligation	34
2.14. Enzyme-Linked Immunosorbent Assay (ELISA).....	35
2.15. Fluorescence Activated Cell Sorting (FACS).....	35
2.16. Fluorescence In Situ Hybridization (FISH).....	36
2.17. T-cell polarization	36
2.18. Gel electrophoresis and Western Blot	37
2.19. Chemotaxis Assay	38
2.20. Scratch Assay	39
2.21. Migration Assay	39
2.22. Nano String.....	40
2.23. Label free mass spectrometry	42
3. Results	43
3.1. T-helper cell status in liver disease	43
3.1.1. T-cell status in total liver tissue.....	43
3.1.2. Th2 inducing factors in serum	47
3.1.3. Th2 inducing factors in the liver	48
3.2. Intrahepatic CD4 ⁺ T-cell profile.....	48
3.2.1. Role of inflammasome-independent NLRP3.....	52
3.2.2. Role of IL-33 in T-cell stimulation	53
3.3. Source of IL-33	58
3.3.1. Monocytes.....	58
3.3.2. Liver sinusoidal endothelial cells	66
3.3.3. Oval cells	68
3.4. T-cell recruitment and activation.....	72
3.4.1. Site of T-cell polarization in liver fibrosis.....	72
3.4.2. Recruitment.....	76
3.4.3. T-cell activation	84
3.5. Activation of hepatic stellate cells.....	88
3.5.1. IL-13 as an activator of hepatic stellate cells	88

Summary

3.5.2. Environmental influence on hepatic stellate cells.....	92
3.5.3. T-cells interact with hepatic stellate cells.....	96
4. Discussion	102
5. Literature	112
6. Appendix	V
6.1. Abbreviations	V
6.2. Table index	VIII
6.3. Figure index	IX
6.4. Nano Sting Result Table	XI
6.5. Mass spectrometry Result Table	XIII
Eidesstattliche Erklärung.....	V
