

CONTENTS

Summary	2
1. Introduction	4
2. Commonly reported problems in nitric acid plants	4
2.1. Changes in plant efficiency	4
2.2. Emissions	5
2.3. Ammonia slip	5
2.4. Gauze tearing	5
2.5. Other reported problems	5
3. Methods to identify root causes	6
4. Root causes of poor performance and solutions	7
4.1. Catalyst design	7
4.2. Basket design and failure	8
4.3. Operating transients	9
4.4. Absorption column	10
4.5. Maldistribution of flow	10
4.6. Compressor leakage	10
4.7. Tails gas abatement systems	11
4.8. Catalyst contamination and filtration maintenance	11
5. Conclusions	13
Related Proceedings of the Society	14

Keywords: root cause analysis, nitric acid, nitrous oxide, catalysts.
